Preventing AAC Device Abandonment in Adults with
Developmental Disabilities

Summary:

Discover strategies to prevent AAC device abandonment in adults with developmental disabilities. This article will address common challenges like inadequate training and poor device fit, exploring their impact on communication and daily participation. Readers will learn practical solutions, including personalized assessments, customized training, device personalization, and community integration. Backed by evidence-based insights and realworld examples, the article will empower assis-

Augmentative and Alternative Communication (AAC) devices play a crucial role in supporting adults with developmental disabilities by providing a reliable means of communication. These devices empower users to express their needs, engage in social interactions, and fully participate in their communities. Despite their potential, many AAC devices are discontinued due to various challenges. Factors such as mismatched devices, inadequate training, and systemic barriers often contribute to this ongoing issue.

Addressing this issue requires a comprehensive, person-centered approach focusing on the user's communication needs and their support network. Evidence-based practices in AAC emphasize the critical role of person-centered planning in supporting adults with developmental disabilities. Person-centered planning ensures that interventions align with individual needs, preferences, and goals rather than imposing generalized solutions. This approach integrates the user's voice into every process stage, from device selection to training and community integration. By emphasizing personal agency and collaboration with caregivers, professionals, and the broader support network, person-centered planning enhances the usability of AAC devices and fosters meaningful participation in daily life. Research consistently demonstrates that tailoring AAC interventions to reflect individual priorities leads to better communication outcomes, greater device retention, and improved quality of life.

This article explores the common barriers to AAC device retention, outlines evidence-based strategies for preventing abandonment, and provides actionable insights for assistive technology professionals and paraprofessionals.

UNDERSTANDING DEVICE ABANDONMENT

Device abandonment occurs when users discontinue using their AAC assistive technology due to personal, systemic, or environmental factors. Understanding these barriers is the first step in addressing the problem.

AAC device abandonment is often linked to issues like inadequate system maintenance, negative attitudes, insufficient training, lack of support, poor device fit, and environmental or social barriers. Devices that are not regularly updated to align with the user's changing needs can become irrelevant, resulting in disuse. Negative attitudes or misconceptions from caregivers, professionals, or the broader community—such as believing natural speech is the only valid form of communication—further discourage AAC use. Moreover, insufficient training for users and support networks leads to improper use, frustration, and eventual abandonment. Environments that fail to support AAC use consistently across settings, combined

---

CELESTE R. HELLING, M.A., CCC-SLP, ATP is a speech-language pathologist specializing in augmentative communication and assistive technology service delivery for children and adults with developmental and acquired disabilities. Her background includes assistive technology service delivery for children and adults with developmental and acquired disabilities. Celeste is employed by the North Carolina Assistive Technology Program in Charlotte, NC.

with mismatches in cognitive, sensory, or physical capabilities, increase the likelihood of device abandonment. Social stigma and the absence of caregiver support compound the problem.

The consequences of AAC abandonment are severe. Users lose a critical tool for communication, leading to increased isolation and decreased participation in daily activities. Financially, thousands of dollars invested in technology and training go to waste.

STRATEGIES FOR PREVENTION

Comprehensive and Dynamic Assessments

Effective AAC use begins with a thorough assessment that considers the individual's unique needs and circumstances. Comprehensive assessments evaluate the user's communication goals, such as whether the device will be used for social, functional, or a combination of purposes. Key stakeholders, including caregivers, educators, and healthcare providers, must be involved to provide holistic perspectives. Environmental factors are also assessed to ensure that the device is practical across various settings, from home to work and community spaces. Frameworks like the Participation Model are employed to identify barriers and provide actionable solutions to support meaningful communication.

For example, Michael, a 45-year-old with cerebral palsy, was referred to identify an augmentative communication solution tailored to accommodate his limited fine motor skills. A comprehensive assessment was conducted to determine an appropriate AAC solution. Michael expressed a desire to communicate independently at home and during social events. His family, an occupational therapist, and a speech-language pathologist collaborated to identify his specific needs. The device was customized with vocabulary for personal care routines, social interactions, and navigating public spaces. Using the Participation Model, the team addressed barriers such as fine motor challenges and trained caregivers to reinforce effective AAC use. This personalized approach empowered Michael to engage actively in familiar and new environments.

Tailored Training Programs

Training programs are critical for the success and retention of AAC devices, bridging the gap between acquiring the assistive technology and using it effectively in everyday life. These programs must be personalized, practical, and dynamic to address the unique needs of each user and their communication partners. Hands-on practice is a cornerstone of effective training, allowing users and their caregivers the opportunity to familiarize themselves with the device in real-life scenarios. For example, users can practice ordering food at a restaurant, asking for assistance at a store, or participating in discussions during family gatherings. These activities build operational competence and reinforce the practical value of AAC in daily interactions.

Caregivers and support networks play a vital role in AAC training. They must be equipped with the knowledge and skills to model effective device use during interactions, demonstrating its functionality and purpose. For instance, a caregiver might use the AAC device to initiate a conversation, guiding the user to respond using the same technology. Observing and practicing makes the user more confident and consistent in their device usage. Additionally, caregivers can create supportive environments by encouraging AAC use in a variety of contexts, ensuring that communication opportunities are plentiful and meaningful.

Training programs should also focus on skill maintenance and growth. Regular refresher sessions help users, and their support teams stay proficient as device features evolve or as communication goals shift. For example, as a user transitions from requesting basic needs to engaging in complex social exchanges, the training program should adapt to introduce new vocabulary and interaction strategies.

Effective AAC training is an ongoing process, evolving with the user's needs and goals. By prioritizing hands-on practice, caregiver involvement, interdisciplinary collaboration, and continuous adaptation, tailored training programs empower AAC users to achieve meaningful and sustained communication success.

Device Customization and Personalization

Personalization ensures that the AAC device reflects the user's personality, preferences, and communication needs. Vocabulary sets are tailored to include commonly used phrases and words related to the user's life. Voice output should match the user's age, gender, and cultural background, and the interface should be intuitive and logical.

Ben, a 37-year-old with autism, was considered to be at risk for AAC device abandonment. Ben's team focused on device customization and personalization, tailoring the system to reflect his unique interests, daily routines, and unique needs. His team included words related to his favorite activities, such as swimming and attending Monster Jam events. Functional phrases like "Can we go to the pool?" and "When is the next Monster Jam?" were added to empower him to participate in conversations. The interface was designed with visuals paired with text to make navigation easier, and regular training sessions reinforced effective device use. Ben's team ensured long-term engagement and use by embedding AAC into his daily routines and updating the system to align with evolving interests.

BACK TO CONTENTS

Community Integration

AAC devices are most effective when users participate actively in their communities. Encouraging involvement in inclusive recreational programs, volunteering opportunities, or public events can reinforce AAC use and reduce stigma. For example, users can join local community centers, contribute to food bank efforts, or attend advocacy events to raise awareness about AAC.

Continuous Monitoring and Feedback

Ongoing support is essential for addressing challenges and adapting devices to evolving needs. Regular follow-ups with AAC specialists ensure technical issues are resolved, and feedback mechanisms allow users and caregivers to share experiences and request adjustments. Scheduled check-ins help maintain the device's functionality and relevance, while routine updates align the technology with the user's changing circumstances.

CONCLUSION

AAC devices have the potential to transform lives, but their success depends on thoughtful planning, training, and sustained support. Preventing abandonment requires collaboration among families, professionals, and communities. By advocating for comprehensive assessments, personalized interventions, and inclusive environments, assistive technology professionals can ensure that every AAC user has the tools and confidence to communicate effectively and fully participate in all daily activities and environments.

Attento Board

UNLOCK AUTONOMY
Achievement Board

My name is Will Pearce, and I'm from Charleston, South Carolina. I'm the founder of Attento Board, a small business dedicated to creating simple yet effective tools for people with disabilities and the elderly. My path to the world of assistive technology isn't a traditional one—I don't have a background in medicine or engineering. But I'm a firm believer in keeping things simple and purposeful.

On April 1, 2017, my life changed forever. I collapsed from cardiac arrest while running a 10K race in Charleston. Thankfully, EMTs witnessed the incident, defibrillated me twice, and got me to the hospital in under five minutes. I was placed in an induced hypothermic coma for 3.5 days and given just a 4% chance of survival. Against all odds, I made a full recovery.

People often told me, "You're still here for a reason," but it wasn't until a few years later that I discovered my purpose.

During the COVID pandemic, a friend and I started making bamboo cutting and charcuterie boards to sell at local markets. Our boards were unique, featuring a peg system that allowed users to secure dishes and transport them with ease. While working at a farm stand, I befriended a woman who was losing dexterity in her hands. I gave her one of our boards, hoping it might help her in the kitchen. Instead, she began using it as a dinner tray, securing her dishes while sitting in her recliner.

Briella uses the Achievement Board to work on her motor skills.

WILL PEARCE, Founder of Attento Board. The name "Attento" stems from the Italian word for "Careful," and our motto is all about "Helping Achieve Independence". This journey began when my life took an unexpected turn. In April 2017, I collapsed from Cardiac Arrest and was given a 4% chance of survival while running a 10K race. Defying the odds, emerged with a newfound purpose. In the pursuit of making a positive impact, the Attento Board was started with some "Covid Creativity". Originally conceived as a cutting board and dish carrier, it evolved into something more significant—a versatile board with incredible potential for people with disabilities, children, and the elderly.

Briella's First Use - YouTube Shorts Video
https://www.youtube.com/shorts/viHciHB6K18

Her creative use of the board sparked an idea. In June 2023, I decided to create a plastic version that could better serve people with disabilities. This became the Achievement Board—a lightweight, customizable transport tray designed to enhance independence and daily living.

In a leap of faith, I brought the Achievement Board to the Abilities Expo in Dallas to connect with the assistive technology community. The response was incredible, and the experience solidified my decision to go all in on this journey.

Vivvi uses the Achievement Board to secure her dinner.

Meagan, who is visually impaired, uses the Achievement Board to help her while she paints her fingernails.

With all of the expensive and advanced technology, I wanted to keep the design of the Achievement Board simple so that people could find their own customizable and useful ways to use it and the price low. What's great about the customization potential is that it benefits a wide variety of users. Whether it's being used for motor skills development, supporting neurological disabilities, or assisting visually impaired individuals, the Achievement Board adapts to the needs of its users. Unlike many assistive technology products that are designed for very specific purposes, the Achievement Board is versatile enough to benefit all. At a price of just $60, it is affordable for all.

HERE ARE A FEW FAQ'S

Who does the Attento Board help?

It's designed for individuals with disabilities such as cerebral palsy (CP), multiple sclerosis (MS), visual impairments, Parkinson's disease, and autism. It can also be used by therapists and doctors who assist these individuals, helping to enhance their therapy and support efforts.

How does the Attento Board help?

The Attento Board enhances daily living by supporting various needs. It accommodates traditional plateware for easier eating, integrates with assistive technology like talking pads and tablets to facilitate communication, and aids in developing or relearning motor skills.

- A small non-slip pad to stabilize the board.
- A cleaning brush for easy maintenance.
- Five rubber bands for added customization.
- A small parts bag for accessories storage.

At Attento Board, our mission is to "Help Achieve Independence". I want to prove that sometimes the simplest solutions make the biggest differences.

https://attentoboard.com/home ∎

Do you or someone you know struggle with balance or fine motor control? YouTube Shorts Video -
https://www.youtube.com/shorts/DT3aDNNyri8

Why is the Attento Board important?

Attento Board helps people complete challenging tasks on their own, boosting confidence and independence. It reduces reliance on others and promotes inclusivity, making life more accessible for everyone.

To enhance its usability, the Achievement Board comes with a few accessories:

- 12 pegs, available in black plastic or natural birch wood. The wood pegs are perfect for painting with color combinations that assist the visually impaired or for creative projects.
- A carabiner clip to hang the board on power chairs or other items.

Build Capacity With State-of-the-Art Training, Tools and Resources

Closing The Gap offers a dynamic, online platform of on-demand professional development, resources and tools for individuals, school districts, rehabilitation centers, non profit organizations and universities who are using assistive technologies to support children and adults with disabilities.

Mentoring:
Supporting Professional and Personal Growth and Development

Research has shown that proper mentoring supports educator retention and classroom performance, as well as keeping staff motivated and on a continuous path of supported growth, allowing them to develop new skills while also benefiting students.

Training, coaching and mentoring are vital components for professional development and personal growth for adults, however the goals and objectives for each are very different. Support provided by these three key interconnected means through training, coaching and mentoring is similar in any field of practice. In the field of Augmentative and Alternative Communication (AAC), support for users and their communication partners progresses through these distinct stages of training, coaching, and mentoring, and each stage serves a unique purpose in helping individuals become more independent and effective communicators.

Training typically focuses on the **technical aspects** of AAC, such as how to edit buttons or back up a system. While this foundational knowledge is essential, it addresses only the operational side of AAC usage. Training equips providers with the skills to set up and maintain AAC devices, but it does not directly contribute to the goal of fostering meaningful communication. The same is true in other fields of practice. You will find that in many workshops the focus of the training is to demonstrate and acquire the knowledge of the basic use of tools and processes.

The next level of support, **coaching**, is where the focus shifts to improving implementation strategies that promote language development and communication independence. Coaching goes beyond just teaching users how to operate their device; it involves modeling language use, increasing wait time, and encouraging communication through open-ended questions. By giving users more time to process

---

BRENDA ROBERTSON DEL MONTE AMA, CCC-SLP, is a speech language pathologist and an assistive technology evaluator and facilitator. She worked as an SLP in Washington State public schools and is currently a private practitioner in Arizona, where she does AAC evaluations and trainings. Brenda has presented her knowledge at Closing the Gap and her collaborative research on accessing AAC at ATIA. Brenda Del Monte is a co-founder of Believe Beyond Ability, a non-profit organization that evaluates, determines, provides and trains those with multiple disabilities on assistive technology to increase independence. Brenda is also an author of the newly published book, "I See You In There," a collection of stories from her 20+ years of experience working with children and adults with disabilities. She is currently a co-host of the Awe and Wonder Podcast hosted by the Special Ed Tech Center. brenda.delmonte@gmail.com

DAN HERLIHY, AT Specialist, B.S., M.A., Dan is an Assistive Technology Specialist currently designing learning modules and training on utilizing AI in K-12 education. dherlihy@juno.com

and respond, and reducing reliance on yes/no or choice-based questions, coaches help create a space for authentic communication. In this stage, the coach also emphasizes the importance of **modeling** language use on the AAC system, demonstrating how to communicate thoughts, needs, and ideas. These strategies are key to building AAC users' confidence and proficiency in using their devices to express themselves. We see the role of coaches in many other aspects of life, from the sports field to the classroom where constructive feedback on practice is what elevates and enhances performance.

The most nuanced level of support, **mentoring**, is a long-term, relational process. Mentoring recognizes that both the AAC user and their communication partners are continually learning and adapting. Rather than simply providing solutions, mentors focus on fostering a collaborative environment where challenges are acknowledged and explored. This relationship involves open-ended problem-solving through "I wonder" statements, which encourage mutual reflection and shared learning. The mentor's role is to create a space where both the user and their support team feel empowered to address difficulties creatively and proactively. Mentoring also requires acknowledging the emotional and practical challenges faced by all parties, allowing for empathy and understanding throughout the process.

This process applies to mentoring in any field or situation. As you think back, how often were you assigned a "mentor," only to find that their goal was simply bringing you on board with how things are done, how to fill out forms, or informing you of the rules and regulations of the organization? Was the mentoring really a "training," with little regard to your own personal goals?

Hearing and addressing pain points is essential for building trust and rapport in a mentoring relationship, especially in the context of AAC support. A key responsibility of the mentor in any field of practice is to carefully navigate the balance between acknowledging the challenges faced by the mentee, and guiding them toward potential solutions. The process of "admiring the problem"—taking time to truly understand and reflect on the issue—helps validate the mentee's experience and shows empathy. This phase is critical in fostering an environment where the mentee feels heard and supported.

However, it is equally important for the mentor to know when to transition from simply exploring the problem to fostering solution-based thinking. Effective mentoring involves encouraging the mentee to generate their own ideas for addressing the challenge. When the mentee is involved in the problem-solving process, they are more likely to feel ownership of the solution and are, therefore, more motivated to try it.

On page 6 in Zachary & Fain's Mentor's Guide: Facilitating Effective Learning Relationships there is a table titled Elements in the Learner-Centered Mentoring Paradigm. In it we find many adult learning principles that are brought to the mentoring process. It includes wording and phrases such as "Adults learn best when they are involved in diagnosing, planning, implementing, and evaluating their own learning,"… "adult learners need to be self-directing, the life experiences of others enrich the learning process,".. "create and maintain a supportive climate that promotes the conditions necessary for learning to take place,"...and, "critical reflection and application" (Zachary & Fain, 2022, p. 6).

By guiding the mentee toward solutions rather than imposing them, mentors help build confidence and empower the mentee to take active steps toward resolving their difficulties. This collaborative approach not only enhances the mentee's problem-solving skills, but also strengthens the trust and partnership that underpins the mentoring relationship.

Ultimately, training, coaching, and mentoring represent a continuum of support that helps AAC users move from basic device operation to confident, independent communication. Each stage builds upon the previous one, ensuring that AAC users not only have the technical skills to use their devices, but also the strategies and support they need to communicate their thoughts and ideas with greater autonomy and impact. As you think about your own field of practice, employing these elements in a continuing and fluid process provides a very supportive space for personal growth.

Dan and Brenda at Closing The Gap Conference.

BACK TO CONTENTS

In K-12 education, the veteran professional constitutes a category requiring a more differentiated approach to mentoring. Their needs from a mentoring relationship are different from those new to the profession. Bressman, et al., (2018) discussed targeted professional development (PD) in the form of mentoring, directly connected to the field and focus of the professional. Their findings included a desire by the veteran teachers for differentiated professional development that helped them examine practice in a way that would not have developed in the traditionally provided PD.

There are many other topics related to the mentoring process that need to be considered, such as positionality (the awareness of one's social and cultural identities and how these influence the mentoring relationship), intersectionality (the overlapping identities and experiences that shape each mentee's unique perspective such as race, gender, class or culture for example, and how they impact in complex ways). These are important considerations if we are truly focusing on the mentee and can impact the process in ways we may be blind to.

The Mentor's Guide: Facilitating Effective Learning Relationships, by Zachary & Fain (2022), is a good place to learn more about this process. Their discussions include intergenerational understanding when working with mentees, setting boundaries in the mentoring relationship (you're not there to put out fires!) as well as enabling growth and closure - all very important in the process. Although this may seem like a lot, keep in mind, it is all about the mentee. Creating a "mini me" is never the goal. By bringing support to our professions in the form of mentoring, we all benefit, both personally and professionally, as well as the students and adults we serve.

Closing The Gap 2025 CONFERENCE

43RD ANNUAL CONFERENCE
OCTOBER 21-24, 2025

Pre Conference Workshops: Monday and Tuesday, October 20-21, 2025
DOUBLETREE BY HILTON HOTEL BLOOMINGTON

See why Closing The Gap has earned a reputation for exceptional

The Closing The Gap Conference is an annual assistive technology conference that presents an opportunity to deepen your assistive technology (AT) knowledge and strengthen your implementation strategies. The conference week is designed to dig deeper into critical areas that have the power, when implemented strategically, to transform your classroom, your school, your district, your practice. When you start thinking differently about how to reach ALL students, how to infuse technology into learning, how to leverage AT strategies in all areas – then we begin to transform these areas and ultimately increase achievement and independence.

THE CONFERENCE FOR EXCEPTIONAL LEARNING

INSIGHT

What Makes Closing The Gap Unlike Other AT Conferences?

Immersive Learning: Each day is packed with engaging educational sessions led by experienced and expert presenters. The conference (Wednesday – Friday) is offered for up to 17 hours of CEUs. *Add pre conference Monday and/or Tuesday for up to 14 more hours!*

In-Depth Exploration: Unique to Closing The Gap, you'll find 1-hour and 2.5-hour sessions that provide participants with a deep dive into the latest topics in the field.

Actionable Insights: In the exhibit hall, participants will discover valuable information, strategies, and products that can be directly applied to their work and improve their lives.

Topics include:

- accessibility & UDL
- assessment & IEPs
- augmentative and alternative communication (AAC)
- autism spectrum disorder (ASD)
- blind / low vision

- deaf and hard of hearing
- early childhood development
- instruction, literacy & inclusion
- leadership, policy & implementation
- mathematics

- mobility, mounting, seating & positioning
- research
- transition, employment & vocational rehab

CONNECTIONS

Where the AT Community Comes to Network and Learn

Renowned for its exceptional learning opportunities and vibrant networking atmosphere, this conference is truly one-of-a-kind!

Who should attend?

ANYONE interested in finding practical and readily available AT solutions for ALL disabilities, mild to significant, infant through adult.

- Speech Language Pathologists
- Occupational Therapists
- Physical Therapists
- Autism Specialists
- Vision Specialists
- Special Educators

- Special Education Directors
- Administrators
- University Instructors
- Technology Specialists
- Parents

- End Users
- Manufacturers / Producers / Company Representatives

CALL FOR PROPOSALS

Share Your Knowledge and Expertise

Closing The Gap will consider proposals for one-hour or multiple-hour sessions that describe and/or demonstrate successful applications of assistive technology for persons with disabilities.

Groups or individuals who wish to participate should submit their proposals for one-hour and multiple-hour presentations as soon as possible.

Call for Proposals will open February 19, 2025. Deadline to submit is Thursday, May 1, 2025.

LEARN MORE

Using the Knoster Model
to Navigate AT/AAC Teams Through Change

Summary:

Working in AT and AAC services requires strong teamwork to drive positive change. This article highlights how the Knoster Model can significantly enhance your team's approach to managing change, leading to improved services for your students. This model provides a robust framework for achieving meaningful transformation. It underscores the necessity of structured processes, open communication, and a shared vision to foster an environment where everyone can thrive. Embrace the Knoster Model to elevate your impact!.

"Change, after all, is only another word for growth, another synonym for learning, we can all do it, if we want to." - Charles Handy, Irish author/philosopher specializing in organizational behavior and management.

Have you ever been part of a team that isn't getting the job done? As an educator, you spend hours in meetings. Meetings about systems, about students, about other meetings. As a special education teacher, administrator, and occupational therapist, I have led and participated in evaluation, IEP, wrap-around, department, and many other meetings that increased access for students and ones that have circled the drain. These meetings were at district and student levels, varied in size and expertise, and often encountered issues that disrupted the processes, misdirected the efforts, or completely derailed the goals.

Imagine you are working with a team that meets monthly. At the meeting, the team is energized by the prospect of providing communication options for a particular student. You participate in lively discussions about potential strategies in detail and leave each meeting with a clear action plan. How-ever, when we reconvened the following month, many tasks remained unattempted or a team member had taken a completely different approach. After several months of this recurring pattern, the team and you start questioning whether the student is ready to engage.

Perhaps in another instance, a team would methodically work through our checklist but ultimately abandon the data collection process because the student simply wanted to press the buttons without engaging with the intended communication tools.

During my work with assistive technology (AT) and teams focused on augmentative and alternative communication (AAC), I realized that the challenges encountered were not due to a student's "failure" or their lack of ability, need, or desire. Instead, these challenges often stemmed from issues related to team facilitation, teamwork dynamics, and systemic changes. Like many others in the field, I pursued various professional development opportunities and read extensively to improve my skills in participating in and facilitating teams.
IRENE HUGHES - Began my career as a Special Education Teacher in Roseburg, Oregon, in 1979. In 1984, I earned my Master's degree in Occupational Therapy. Throughout my career in education, I have primarily focused on teaching and advocating for individuals from infancy to age 21. My emphasis has been on utilizing assistive technology (AT) and augmentative and alternative communication (AAC) devices and services to support students with complex and diverse needs. This work aims to promote access, equity, independence, and self-determination among these individuals. Currently, I provide consulting, coaching, and professional development services to school districts. I believe, "everything is figureoutable" (Marie Forleo, 2020).

By implementing several strategies—such as maintaining a timed agenda, starting and ending meetings on time, establishing ground rules, and fostering a safe environment— team productivity was enhanced. For these groups, integrating and applying the Knoster Model into our processes led to significant positive changes in how we provided devices and services to students who utilize AT and AAC.

"When I first started working in this area AAC I remember hearing older therapists talking about "systemic change" and thinking that that had nothing to do with me. But I now know it has everything to do with me." Jane Farrall of Special Educator, Speech Pathologist and Disability Rights Advocate (June, 2014)

Managing the rapid changes in assistive technology AT and AAC is essential for meeting the complex needs of students with Individualized Education Programs (IEPs) and Section 504 plans. As schools become increasingly diverse, the demand for individualized and customizable AT and AAC devices also rises. Each student's unique circumstances necessitate a supportive team with a clear vision to achieve desired outcomes while minimizing challenges among team members.

This article explores the Knoster Model to assist teams in designing, implementing, and maintaining meaningful change when selecting and implementing AAC and AT programs for students. This process goes beyond focusing solely on the individual; it is crucial to consider all factors involved.

Specifically, let's examine the context of use—where, when, how, and why the technology will be utilized. Additionally, understanding the various systems that support the individual is essential. System change theory can enhance our practices by minimizing team conflicts and reducing the likelihood of system abandonment. The Knoster Model serves as one framework that teams can utilize to facilitate meaningful change effectively.

THE KNOSTER MODEL

At first glance, understanding the Knoster Model may seem overwhelming due to its numerous components and unfamiliar vocabulary, particularly in the context of assistive technology (AT) and augmentative and alternative communication (AAC). This section aims to bridge that gap.

At the core of the Knoster Model are the Stages of Change: Unfreeze, Change, and Refreeze. Each stage is crucial for ensuring that necessary adjustments are made thoughtfully and effectively.

1. **Unfreeze**: This stage focuses on creating awareness and fostering a sense of urgency among team members and stakeholders. This can occur when the IEP team notices that a student with communication challenges struggles to engage and participate in class discussions and activities. Through open and safe brainstorming and problem-solving sessions, the team identifies the specific student challenges and recognizes the need for assistive technology to enhance communication.

2. **Change**: In this stage, the team evaluates the situation using tools such as the SETT framework (Student, Environment, Task, Tools). For instance, they assess various communication devices and software that align with the students' strengths and preferences. They might decide to implement a speech-generating device to help the student express their thoughts more effectively. It is essential to develop a comprehensive plan during this stage, outlining specific activities, methodologies, and communication strategies to facilitate the change.

3. **Refreeze**: The team follows three steps of "Refreeze" when implementing the new device into the student's life. They establish regular check-ins to monitor the student's progress and gather feedback from key stakeholders. The goal is to integrate assistive technology seamlessly into the student's daily routine. Continuous progress monitoring ensures that the changes achieve their intended impact and allows for necessary adjustments. Understanding how sustained change occurs is crucial for recognizing the overall process that the team follows. This knowledge enables the use of the Knoster Model to anticipate and effectively address challenges.

To achieve successful outcomes, teams apply four key principles: flexibility, adaptation, collaboration, and communication. These principles help shape the plan's outcome and ensure it accurately reflects the team's current state while outlining a realistic path forward; they keep the team focused on their work and aligned with common ground rules.

In addition, let's examine how the components of the Knoster Model interconnect, which includes six essential elements: vision, consensus, skills, resources, motivation, and action plan. The four guiding principles steer the plan's outcome and its understanding. They ensure that the model aligns with the team's present circumstances while providing a clear direction for the future. Each key element acts as a building block, ensuring that every step of the process is carefully considered. Together, these components enhance team performance and facilitate successful change implementation. For effective change to occur, all elements must be present.

Vision	Consensus	Skills	Resources	Incentives	Action plan	=	Change
Elements of the Knoster Model

THE KNOSTER MODEL

Vision	Consensus	Skills	Resources	Incentives	Action plan	=	Change
Missing	Consensus	Skills	Resources	Incentives	Action plan		Confusion
Vision	Missing	Skills	Resources	Incentives	Action plan	=	Sabotage
Vision	Consensus	Missing	Resources	Incentives	Action plan	=	Anxiety
Vision	Consensus	Skills	Missing	Incentives	Action plan	=	Frustration
Vision	Consensus	Skills	Resources	Missing	Action plan	=	Resistance
Vision	Consensus	Skills	Resources	Incentives	Missing	=	False Start

The Knoster Change Management Model

Missing any component can lead to project failure, impacting team members; without a clear vision outlining needs, roles, and action plans, team members end up feeling confused about their tasks.

A lack of consensus on the need for a device, its selection, or its implementation can foster a sense of sabotage, especially if even one team member is not aligned with the plan. Additionally, if the team lacks the necessary skills for assessing needs and managing implementation, anxiety can rise. While skills development is a potential solution, it requires access to resources.

Moreover, without support from administration, families, and stakeholders, essential supplies and training may be unavailable, leading to frustration and potentially causing team members to consider quitting.

Incentives can be complex and may be misunderstood as bribery or simple reward systems. In this context, intrinsic incentives focus on addressing each team member's underlying motivations. Consider questions like, Is the student more engaged and confident? Are their efforts resulting in positive changes? Without motivation, resistance to the plan may occur.

Proper planning is essential; without it, actions can be futile, and without action, planning is pointless. An effective way to implement the Knoster Model is to conclude meetings with a check-in, where team members share their feelings about progress and identify any missing components. This reflective process fosters open communication and increases the chances of success.

Using a Google Form for this check-in can help gather input on the process and team dynamics. Team leaders should review the responses before the next meeting to address any identified gaps effectively.

https://bit.ly/ihughes_consulting

Yes! The Knoster Model can make a difference in your practice.

The success of any initiative in assistive technology hinges on the mastery of change management. By leveraging the Knoster Model Framework, teams can skillfully navigate the complexities of transitions with confidence. Prioritizing collaboration, communication, and strategic planning equips them to effectively address the diverse needs of students and achieve impactful outcomes. As educational environments undergo rapid transformation, embracing these principles will be vital for fostering a dynamic culture of innovation and support that empowers every learner to excel.

A Middle School Classroom's Comprehensive Approach to Gaining Competence in Self-Advocacy Skills

Summary:

This article will discuss a classroom team's approach to addressing self-advocacy competency for augmentative and alternative communication (AAC) users with complex communication needs. Discussion will include the definitions of self advocacy and self determination and corresponding skills AAC users need to reach competency in this skill area followed by components of a comprehensive curriculum looking to teach content, develop skills, and provide training to paraeducators.

Students with complex communication needs (CCN), face significant challenges in expressing their thoughts, desires, and needs, often relying on augmentative and alternative communication (AAC) tools to facilitate interaction. We typically look at four main areas of communication to consider the way an AAC user currently uses their system to communicate and to identify next skills to target; these areas are operational, linguistic, social, and strategic. As a practicing school based speech-language pathologist with a caseload of students who require AAC as a primary means to communicate, these areas are critical considerations in my therapeutic intervention planning and often drive how I am setting my goals; however, there were still observable barriers to participation, engagement with peers, building relationships, and engaging in larger environments. In addition, progress and generalization of skills were falling short due to ineffective training and coaching of communication partners. As I worked with my multidisciplinary teams to address these challenges, it became evident that self advocacy was an area we wanted to hone in on. In our research we found curriculums, like IEP participation, to be too narrow focused or are limited; however we know students with CCN require a comprehensive approach that combines explicit teaching with in the moment coaching. Additionally, our AAC users require communication partners who can interpret intentions and messages as they learn effective and efficient communication strategies. With high turnover and limited time for training, our paraeducators were undersupported in this area. As a team we were familiar with the National Joint Committee's Communication Bill of Rights; we had posters up in the classroom, used it when training new staff members, and referenced it in meetings with parents and school districts. We started to consider this not just as a reference tool but as a teaching foundation, to support giving our students and staff the knowledge around their rights as we supported self advocacy skill development. Using what we knew about working with AAC users and students with CCN, we identified that an effective intervention would involve changes to both the individual's skills and the environment (Walker 2011, Light, 2015). We chose to look at the Communication Bill of Rights combined with environmental observations to identify access and participation barriers to lay the content foundation for teaching. Selection of necessary skills such as effectively communicating preference, rejection or protest, opinions or feelings, desires, and needs, we created units to comprehensively develop self-advocacy skills, to support our students with CCN. Our goal was to build competency in order to navigate their educational and social environments

---

AMANDA SCHERIFF HOBSON, M.S., CCC-SLP is a school based speech-language pathologist and department head at a collaborative school in Massachusetts for students ages 3-22. She directly supports students in acquiring and using AAC with a focus in alternative access.

more effectively, foster independence and enhance their quality of life. This article will further define self advocacy as an area of communication competence for AAC users and outline how our middle school classroom is developing a comprehensive curriculum to teach knowledge, build skills, and train communication partners concurrently.

SELF ADVOCACY AS A COMPETENCY AREA

When we consider communication competencies, we are stating that a person should have a set of skills or strategies to use to engage in various communication opportunities efficiently and effectively; ideally we are striving for independence achieved through development of mini milestones or acquisition of stepping stone skills Self-advocacy can, and should be, considered an area of communication competency used to consider and set goals to move towards a person's ability to communicate efficiently and effectively in a variety of communication settings with a variety of communication partners. Self advocacy can be defined as a set of skills and subskills used to engage in the complex process of speaking on your own behalf to share needs, beliefs, opinions, interests, and desires (Singer & Morgenson, 2021). For students with complex communication needs (CCN), self-advocacy is essential as it empowers them to navigate their environments, communicate effectively, and assert their rights and preferences. When considering a definition for self-advocacy, we want to think about self-determination as a driving force. Self-determination refers to an individual's ability to make choices and take control over their actions and decisions such as setting goals, solving problems, and pursuing opportunities that reflect their desires and needs. Without self determination, we can't advocate for what we want. Therefore, we want our students to develop comprehension of "self" before, or while simultaneously, teaching skills on how to act on desires, motivators and preferences.

Using the above to lay the foundation, there are two broad areas to target: knowledge of self and individual needs and skills needed to self advocate that move towards self advocacy. While the ultimate goal is to develop competency in these two areas, the following knowledge and skills areas can be considered markers towards achieving independence. For knowledge of self and individual needs, we are looking to build awareness of:

- Individual communication strategies
- Disability awareness and disclosure
- Accommodations to access education
- Low and high stakes choices
- Role of communication partners/ allies
- Personal preferences and motivators
- Public and private information

To support competency in self-advocacy, we need to build skills such as:

- Comprehension of language; (content vocabulary as well as words to use)
- Effective protesting
- Expressing preferences, choices, and needs
- IEP participation
- Active participation in decision making
- Conversation strategies; (different strategies for familiar and unfamiliar partners)
- Problem solving

With our content and skills identified, we need to look at the opportunities needed to build, facilitate, and practice while assuring that the environments assure meaningful, and authentic opportunities. We need to consider if the environments our students are using these skills in are ready to respond. Will peers know what to do when a student says "Give me time to make my message"? Will a general education teacher be prepared to provide an accommodation requested at the start of class? Will a communication partner be ready to accept a protest even if it goes against the classroom agenda? Asking these tough questions as we as we develop our lessons and activities will ensure that teaching and coaching of communication partners is of equal consideration. Taking into consideration the individual level as well as the immediate and larger contexts contributes to a comprehensive approach to teaching and building skills in an effective manner.

OUR CLASSROOM CURRICULUM

In a busy middle school classroom, time is tricky. Balancing therapies, inclusion classes, individual work time, and social opportunities is a challenge. Throw in a 6-day waterfall schedule and it's next to impossible. As a team we started by identifying the "must haves" and unanimously, self advocacy made the list. We dedicated a once per week, 50 minute block to this topic to tackle the explicit teaching as a group; students and paraprofessionals attendance required. Integrating both the classroom teacher and speech pathologist's perspectives, units of study were, and continue to be, created by a) identifying the knowledge to teach (i.e., content) 2) identifying how to expressively use the gained knowledge (i.e., skills), 3) identifying communication partner skills to respond to student skills (i.e., partner training and coaching), and 4) tools needs to engage in the learning process (i.e., permanent products). With a structured approach, we can create a comprehensive plan to teach and skill build in a holistic manner. Units are additionally driven by an environmental need. New team members or teaching staff drove the unit for choice making and protesting. Challenges with building peer connections set in motion a unit targeting respect and acceptance. Repetition of units has and will con-

BACK TO CONTENTS

tinue to occur to further build knowledge and skills.

VOCABULARY

As referenced above, the Communication Bill of Rights serves as a foundation for knowledge. To begin, a communication bill of rights dictionary was created to support consistent reference to the vocabulary we were using for students and paraeducators. We took the lengthy, complex right and paired it with a symbol. We identified tier 1, or high frequency words / core words, to use when descriptively teaching the right. See the video here to see our communication bill of rights dictionary below.

Example of communication bill of rights dictionary
YouTube Video - https://www.youtube.com/watch?v=_tm8SkYOcIU

Explicit vocabulary instruction routines (Geis & Erickson, 2021) provide structured and consistent introduction and teaching for new vocabulary. Through use of tier 1 words (high frequency/ core words) to define tier 2 and tier 3 words we engage in a process called descriptive teaching. For example, a right is something we *all + get* and it tells us what we *can +do*. We can break down "the right to be addressed directly and not be spoken for or talked about as if not there" by using tier 1 words (e.g., talk to me) to descriptively teach this right. To more deeply understand content vocabulary, we engage students in activities to develop comprehension, such as:

- *Examples and non-examples:* Look at pictures representing the word ACCESSIBLE and determine if the picture matches the definition of accessible (e.g., picture of a ramp going up stairs or an automated door button compared to stairs to enter the building and tight aisles of the library with books on the top shelf).
- *Generating Situations:* when considering times when LOW-TECH tools are used, students consider parts of their schedule where they might need to use a LOW-TECH or ALTERNATIVE communication tool (e.g., swimming pool,

lying on the mat in PT, in the sun)
- *Word relationships:* Provide students with fill in the blank of a sentences with an appropriate word from a set (e.g., My classmates _____ me when they answer my questions, I must be _____ in my community, You can sit next to me to protect my physical _____; targeting words acknowledge, include, and boundary in a unit about teaching respect)
- *Sentence generation:* use AAC systems or a closed set of choices to complete a sentence starter (e.g., My IEP tells someone about…; People can respect me by…)

In addition to explicit vocabulary routines, customized social narratives (Sam & AFIRM Team, 2015) provide examples of new vocabulary (words and phrases) in a narrative format to help hear and learn information (e.g., Let's go to an IEP meeting; My Accessible School). Customizations include using real pictures of places and people, targeted pre-stored phrases that may be added into devices, contexts that are relevant to the student or staff, and use of skills that are accessible to the student. See the video below of a customized social story teaching the phrase "ask me first".

Example of ask me first
YouTube Video - https://www.youtube.com/watch?v=OsebiCkTybQ

LEARNING ACTIVITIES

There are endless activities that can target skill development in a structured setting. To move from knowledge to action, we want to create structured opportunities to practice real skills that can easily be used in a larger setting. The intent of this section is to provide some examples that have worked in our classroom because they have been engaging, have yielded skill development, and have clearly facilitated movement from content knowledge to skill use. We want to focus on skill building in age appropriate, authentic, and applicable opportuni-

ties; ultimately, we want to be intentional. Activities should engage and challenge students to use what they know to prepare for real world scenarios. They should be able to practice with support from those who planned the activities as well as those who will be supporting them in the naturally occurring environment (i.e., communication partners).

When we consider bridging the gap of activity specific vocabulary and use in natural environments, we look for opportunities to have vocabulary learning exist within functional, hands on activities with AAC user input. We involve students in locating vocabulary and planning for device programming (a perfect time for meaningful choice making!) to merge content knowledge into expression of knowledge. For example:

- Go on a scavenger hunt within communication systems and communication environments to check off what words we can use and what words we should add
- Take phrases to support quick self advocacy and have students decide where to program into devices. This can be open-ended or modified by providing choices of where to program
- Use same aged peers to get vocabulary that is age appropriate to include into relevant content (e.g., opinion words, leisure choices, conversation starters or interjections, etc.). Have students decide which words or phrases to program

With vocabulary provided, we want to plan for opportunities to use it. Communication planning tools are essential to this process to plan for opportunities that arise in fast paced, naturally occurring environments. Examples include:

- Create "When I do… It means…" dictionaries for unconventional communication strategies can help others effectively interpret the message while building awareness of self.
- Guided communication passports to be created and shared with all those in the immediate and larger environments. Rather than being written by an SLP or teacher, using sentence prompts or starters or other guides to co-create a written document to be shared that highlights communication strategies and important to's (things that are important to the communicator).
- Co-constructed narratives to summarize learning or share as a presentation
- Providing realistic scenarios to collaboratively plan and co-create a script before acting it out for the group (Burkhart & Musselwhite, 2001)

To build meaningful participation in a variety of decision making tasks, talking mats (Hayden et.al, 2023) have become a frequently used tool. Talking mats are a low-tech and digital tool used to guide a conversation. Using three categories (like it, don't like it, whatever/ I don't care) students can sort pre-
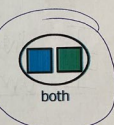

A guided communication form to inform preferences for customized adapted video games created by peers.

A co-constructed narrative to wrap up a unit on acceptance.
Example of sorting mat for personal high and low tech communication tools.

BACK TO CONTENTS

sented information related to a topic. You can see, in the picture example, completed talking mats that can be referenced in conversations. It creates the opportunity to pre-plan, rather than producing answers in the moment, so that students have had the opportunity to meaningful and successfully participate. This has been a helpful tool for participating in decision making processes for field trips, allied arts/ elective classes sign ups, device programming, and sharing school preferences at an IEP meeting.
Example of a talking mat for the topic "what I think about my school schedule".

PARTNER TRAINING AND COACHING:

Thinking back to the self-advocacy definition and reason for needing to teach these skills, we can recall that we need extrinsic factors to be considered as we teach students the skills to self-advocate. We know that for complex communicators, there is a substantial need for communication partners to be interpreting communication which leaves students vulnerable. We look at our partners as communication allies, or the people who are there to support communication problem solving. We emphasize that communication partners should not act as the voice but instead, the microphone. We coach our teachers to make sure that they have the skills to ensure student's rights are being validated and followed through on by giving them practice in a structured setting to:

- Utilize a least to most prompting hierarchy to be responsive while leaving space for independence
- Understand presentation and access methods
- Getting comfortable with wait time
- Respond to both students and those who might (accidentally) violate student rights
- Provide meaningful choices/ choice diversity across the day (Brown, et.al., 1993)

- Diversify response strategies (verbal referencing, act on, acknowledge, relate to context, prompt symbolically)

In our groups, staff participate alongside the students. Activities include:
- Brainstorming and sharing challenges to support self advocacy during the week
- Engaging in role plays
- Co-constructing scripts with students
- Asking for observation times from the teacher or SLP during challenging moments in the day
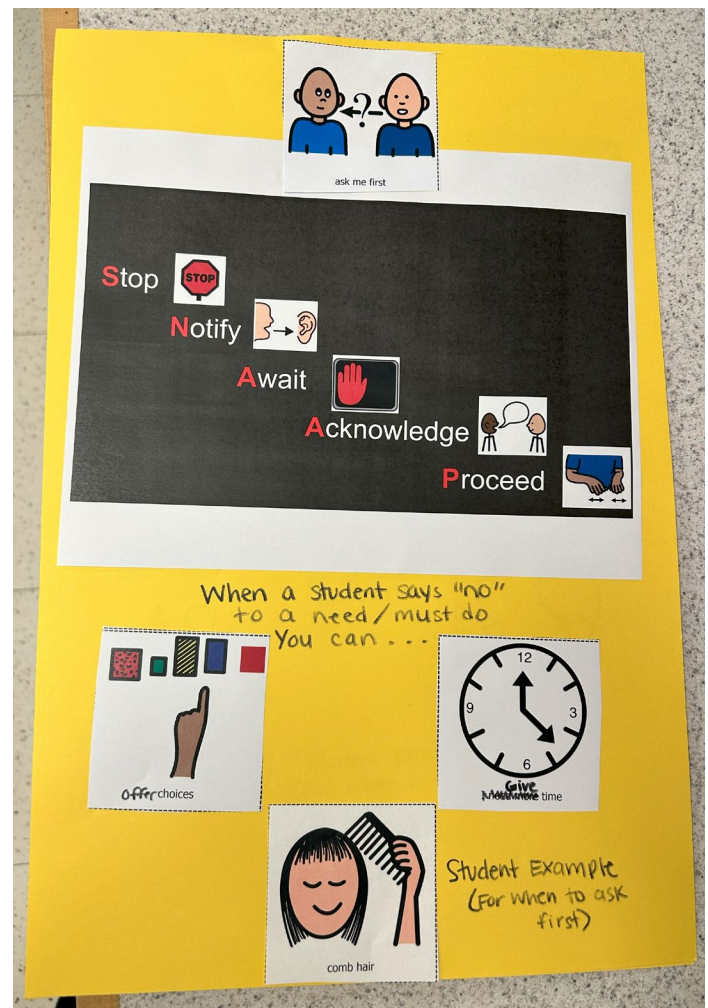

Posters creating for the environment to remind people to ask students first before engaging in routine activities.

One of the most effective ways we found to empower communication partners to engage in the structured activities and try to use skills in the larger environment has been through our self advocacy shout outs. Each week we start our group by pulling notes from a bucket that share a self advocacy victory, for students and staff. It fosters a culture of encouragement, shar-

ing big and small moments of the week, and lets us focus on positive changes and actions as opposed to supporting struggles. With emphasis on encouragement, staff are more open to receiving feedback, asking questions, and seeking advice when we do use in the moment coaching. It has easily become my favorite time of the week to see how proud someone is of the work they are doing.

CONCLUSION:

While the above outlines what we are doing to address the need for a comprehensive approach to self advocacy competence, we still experience barriers and find ourselves thinking about where to go from here. We may have found the ticket to empowering our classroom staff to try to use skills in the natural environment but we haven't yet unlocked that for all communication partners in our students' broader communication circles. We continue to develop a flexible curriculum that allows us to move with the challenges that present themselves so that we place value on providing meaningful and impactful learning opportunities. For our future goals, we look to seek out opportunities to work towards peer to peer interactions, strengthen the message of presumed potential, and create more meaningful opportunities for our students to practice their self advocacy skills.

How can **Closing The Gap** help me improve student outcomes using assistive technology?

We're here to help. Closing The Gap has been a trusted resource since 1984. We've been at the forefront of the assistive technology field, publishing the first magazine dedicated to the topic of assistive technology and continue to lead the field with state-of-the-art professional development tools, online training opportunities and our annual, international conference.

As technology is ever-changing, it's imperative that assessment team members are knowledgeable and stay abreast of available products and their updates. Having an understanding of the FULL scope of available products, best practices and implementation strategies is key to the assessment process.

ASSISTIVE TECHNOLOGY RESOURCES

ASSISTIVE TECHNOLOGY WORKSHOPS

This conference is **AMAZING**!! So incredibly helpful and informative! Thank you, thank you!
Discover Over 1,400 Products for Children and Adults with Disabilities

The Resource Directory is a culmination of an extensive, year-round search for the latest software, hardware and other assistive technology products that are on the market today, as well as their producers. It is a tool to assist members, discover, research and compare.

RESOURCE DIRECTORY

Supporting Educators, Practitioners, Parents and Specialists

Convenient and on-demand, our Membership platform offers professional development training, resources and tools for individuals, school districts, rehabilitation centers, non profit organizations and universities who are using assistive technologies to support children and adults with disabilities.

MEMBERSHIP & TRAINING
Get Hands-On and Develop Your AT Skills

Held annually, each Fall in Minnesota, the Closing The Gap conference is recognized as the best educational assistive technology conference in the country.
Discover the latest technologies and best practices that are making a difference in the lives of children and adults with disabilities.

ANNUAL CONFERENCE

A Coaching Mindset
for Better Assistive Technology Implementation

Summary:

This article emphasizes the critical role of assistive technology (AT) in supporting students with disabilities by promoting access, independence, and engagement. It highlights persistent barriers, such as limited training and misconceptions about AT, and proposes adopting a coaching mindset for educators. Coaching fosters collaboration, trust, and capacity-building, enabling educators to integrate AT effectively. By combining coaching with expert guidance, AT professionals can address challenges, enhance teacher confidence, and ensure sustainable AT implementation.

Assistive Technology (AT) has long been recognized as one of the most effective supports and interventions for students with disabilities. Its origins trace back to the mid-20th century, and research consistently reaffirms the effectiveness of AT devices and services in promoting access, independence, and engagement for individuals with disabilities.

The High Quality Instruction within Inclusive Learning Environments (HQIILE) project is a long-standing partnership with the Kansas Department of Education and Infinitec. We are a provider through the Kansas Technical Assistance System Network (TASN), in this capacity, we work to promote inclusion through Co-Teaching, Assistive Technology, and Universal Design for Learning projects. Our experience is that **a coaching mindset** is a valuable approach to build capacity and improve AT implementation and outcomes.

AT encompasses a broad range of tools and devices designed to empower individuals with disabilities to perform functions that might otherwise be challenging or impossible. In educational settings, AT spans from simple tools like pencil grips and magnifiers to sophisticated software that supports communication, reading, writing, and learning

Despite its proven benefits, significant barriers to the successful implementation of AT persist. These include inadequate training for educators, limited access to appropriate devices,

---

JANET PETERS, Project Director of High Quality Instruction within Inclusive Learning Environments Janet Peters is the Kansas Infinitec Project Director. In that role, she leads the High Quality Instruction within Inclusive Learning Environments project, which is a statewide inclusion initiative funded by the Kansas Department of Education with AT, UDL, and Co-Teaching strands. Janet holds a Master's degree in Curriculum and Instruction with a specialty in Learning Technologies. She has decades of experience and is passionate about using technology and systems change to improve inclusion and learning outcomes for students with disabilities. In her free time, she loves to travel, be outside, and spend time with friends and family.

LISA LAJOIE-SMITH, UDL Coach for High Quality Instruction within Inclusive Learning Environments Lisa Lajoie-Smith is a special education teacher and instructional coach with 34+ years of experience in education. She holds a Master's degree in Education with a focus on Curriculum and Instruction and is trained in Cognitive Coaching, including participation in Jim Knight's coaching programs. Passionate and excited about fostering growth, Lisa thrives on facilitating the coaching cycle, helping educators enhance their practice, and ultimately improving student outcomes. Outside of her professional life, Lisa enjoys exploring a variety of interests and hobbies that keep her inspired and energized.

and systemic issues like funding and policy gaps. Moreover, AT abandonment—when individuals stop using assistive devices despite their potential to help—remains a persistent issue, often stemming from factors such as poor device fit, lack of training, or insufficient integration into daily routines (Bouck, 2016, Bouck & Long, 2021).

Addressing these barriers is critical to ensuring that students with disabilities fully benefit from the transformative potential of assistive technology. This article explores how to adopt a coaching mindset to improve AT implementation and collaboration with educators. Using coaching strategies not only empowers educators but also improves efficiency for AT professionals. By equipping teachers with the skills and confidence regarding AT, AT professionals can reduce the need for repetitive consultations and focus their expertise on addressing more complex challenges. Over time, this approach fosters sustainability as educators become more adept at integrating AT into their practices, creating a culture of shared responsibility and continuous improvement.

BARRIERS TO IMPLEMENTATION

Educators may resist adopting AT due to misconceptions about its effectiveness or a reluctance to change established teaching methods. For example, many erroneously believe that AT use lowers a child's motivation because it does the work for them. However, the research is overwhelmingly convincing that AT use can increase a student's motivation to complete assignments and stay engaged in the learning tasks (Floyd, Galyon, & Floyd-Norris, 2020). Another prevalent misconception, particularly among general education teachers, is that AT implementation is solely the responsibility of AT specialists. In reality, the Individuals with Disabilities Education Act (IDEA) establishes that AT implementation is a shared responsibility among all educators and related service providers involved in the child's education. Regular classroom teachers, special education teachers, and related services professionals often play critical roles in delivering AT devices and services as part of the student's learning plan.

> To address misconceptions and promote a deeper understanding of AT, the U.S. Department of Education's publication, Myths and Facts Surrounding Assistive Technology Devices and Services, is an excellent resource to share with educators and administrators. This guide helps dispel common myths about AT and clarifies the legal requirements outlined in IDEA.

Even with strong teacher willingness, the lack of sufficient training and confidence can significantly hinder the successful implementation of AT (Park, Bagwell, Bryant, & Bryant, B. R.,

2021). Many educators feel unprepared to integrate AT tools into their teaching practices, particularly in general education settings. This gap in readiness often arises from limited access to professional development, insufficient preservice training programs, and inadequate ongoing support. Without the necessary knowledge and skills, teachers may struggle to implement AT effectively, resulting in underutilization or, in some cases, complete abandonment of these valuable tools.

DEVELOPING "A COACHING MINDSET"

Addressing barriers to AT implementation requires high quality professional development that not only equips educators with the necessary skills but also addresses misconceptions and attitudinal barriers they may hold. A deliberate focus on fostering a coaching mindset is a critical yet often overlooked component of effective AT service delivery. Integrating coaching into professional development ensures educators receive ongoing, collaborative support to confidently implement AT and maximize its impact on student learning.

Coaching Requires Skills and a Mindset

A coach is a thought partner who supports staff in reaching their own goals while building relationships based on trust. Coaches support staff with reflective and inquiry-oriented feedback within a coaching cycle of support. Coaching is non-evaluative and non-judgmental. Coaches are not there to "fix or solve" a problem but rather to meet the teachers where they are in their learning and thought processes and assist them with goal setting (Aguilar, 2013). In turn, they are more able to meet the needs of their students. Coaches work alongside staff to discuss and analyze data, discuss individual student strengths and needs, observe, collect data, and provide resources.

Coaching can be invaluable for integrating AT into classroom settings, and it also assists with training and modeling strategies that are best practices in order to support staff and students with access to AT from low-tech to high-tech. However, AT professionals have long been considered experts rather

BACK TO CONTENTS

than coaches due to traditional perceptions of their role, the structure of service delivery, and their specialized knowledge.

Historically, the AT service model has been more consultation-focused, with AT professionals being brought in to assess a situation and then recommend solutions. This transactional approach can unintentionally limit collaboration and create a hierarchy where the AT professional is seen as the sole problem-solver and solely responsible for all aspects of AT implementation, from device selection to classroom integration. This perception can lead to a lack of shared responsibility and minimal teacher involvement in AT implementation.

AT specialists can shift toward developing a coaching mindset by trying to jointly solve problems, recognizing a teacher's valuable knowledge about the curriculum and educational tasks, and emphasizing that AT is a shared responsibility.

Using intentional language shifts can help position AT professionals as collaborative partners, encouraging educators to take a more active role in the implementation process. For example, using open-ended sentence starters allows for ease in the conversation. These strategies can address attitudinal and knowledge barriers to AT implementation by building relationships, addressing skills, or correcting misconceptions.

If you want to build trust, listen to concerns and validate educator experiences, start by saying:
- Tell me more, And what else?
- What might this look like in an ideal setting?
- What are your biggest concerns about incorporating this technology in your classroom?
- What is your hope for _____?
- Given the time we have allotted today, what is the most important thing you and I should be talking about?

If a teacher is skeptical or hostile about AT in their classroom, you could say:
- Can I share an example of how another teacher used this tool to support a similar student?
- What is going well and why?
- What can you identify as the strengths and the barriers of the student?
- What if nothing changes? So what? What are the implications for you and your student?
- What are some other ways we can look at the use of this technology support?

If a teacher is not confident about their skills to support AT, you could say:
- You know a lot about this student. What do you see that shows whether the strategy is successful or not?
- Let's brainstorm how this tool works in an actual lesson plan.
- Would you like to try using this tool yourself before intro-

ducing it to your student?
- What are some uncertainties or unknowns that you can identify?
- How can we approach this as a learning experience rather than a solution we need to perfect right away?

As mentioned, our collaborative work with districts through the HQIILE project has provided us with valuable insights, demonstrating that a coaching mindset is an effective approach for building capacity and enhancing AT implementation and outcomes. The following case studies highlight the practical application of coaching strategies and their impact in real-world educational settings.

CASE STUDY: ENHANCING ACCESS TO GENERAL EDUCATION CURRICULUM THROUGH COLLABORATIVE PROBLEM-SOLVING AND COACHING

BACKGROUND

A special education teacher in one of our participating districts sought assistance from the AT facilitator to support a collaborative conference with a general education teacher. The primary objective was to address how to ensure a student in an inclusive reading class could effectively access the general education curriculum. The student had specific learning needs, and the team aimed to enhance her engagement and inclusion alongside her peers.

INITIAL MEETING AND PLANNING

The AT facilitator approached the collaborative conference with a structured coaching strategy. She began by proposing a short agenda to guide the conversation:
1. Review the classroom expectations and the student's current strengths.
2. Identify the tools and technologies the student was using to access the curriculum, alongside any potential barriers.
3. Together, brainstorm resources and supports to improve access and engagement for the student.

Using coaching techniques, the AC facilitator encouraged open dialogue between the special education and general education teachers to foster a shared understanding of the student's needs and classroom goals. Rather than providing specific suggestions, the AT facilitator asked questions probe the educators to think more deeply about the student. The teachers decided to create a chart with the discussed topics. They filled the chart with potential solutions to ensure comprehensive support for the student's inclusion in the reading class alongside their general education peers. The AT facilita-

tor provided additional resource throughout the collaborative process.

IMPLEMENTATION AND DATA COLLECTION

Based on the collaborative discussion, the team decided to trial two new supports for the student over the next three weeks. These included strategies for increasing engagement during small group reading sessions using her assistive device.

The AT facilitator was critical in coaching the teachers throughout the process. She provided targeted training to help the teachers integrate the device confidently and coached them on observing and adapting to the student's responses during class. She also remained available to troubleshoot and answer questions during the trial period. The teachers collected data on the student's engagement levels during this time and scheduled a follow-up meeting after three weeks to review progress.

RESULTS AND REFLECTION

The team reviewed the data at the follow-up meeting and observed significant progress. The student's engagement during small group reading sessions had increased by 23%, rising from a baseline of 25% to 48%. The team attributed this improvement not only to the use of the device but also to the coaching support provided by the AT facilitator. The coaching process helped the teachers refine their use of the device and adopt effective strategies to better engage the student.

The success reinforced the value of the coaching model in building teacher capacity and enhancing student outcomes. The team also made time for reflection, a key aspect of coaching. This case highlights how coaching not only improved student outcomes but also contributed to long-term sustainability. By building the teachers' confidence and capacity, the AT facilitator reduced the need for ongoing external support and empowered the team to implement and refine strategies independently. This approach enhances efficiency for AT professionals, allowing them to allocate their time and expertise more strategically.

SUSTAINING SUCCESS

The AT facilitator continued to coach the team on structuring their meetings, analyzing data, and brainstorming strategies for other students. As the team grew more confident and skilled, the facilitator gradually transitioned from an active coaching role to an on-call support role, empowering the team to sustain their progress independently.

The team's success in using this coaching-driven, collaborative model highlighted the power of problem-solving and capacity-building to foster a culture of inclusion. By working together and leveraging coaching strategies, they created a meaningful and lasting impact on the educational experience of their students.

CASE STUDY: LISTENING TO WHAT ISN'T SAID – COACHING THROUGH THE GAPS

BACKGROUND

For the past several years, our HQIILE project has emphasized and trained on coaching skills to our Kansas Infinitec Cadre members. The Cadre are professionals and leaders across the state who promote high-quality instruction in inclusive learning environments and build local capacity. An AT facilitator who is part of our Cadre, recently reached out for support after a coaching conversation with a special education teacher.

The teacher had been discussing her work with students who regularly used AT, expressing confidence in the progress being made. She mentioned that everything was going well and that she didn't feel she needed any further support related to AT. However, the AT facilitator had observed something different in the teacher's practice that didn't align with the teacher's self-assessment. The facilitator asked for advice on moving forward, sensing that the conversation wasn't addressing some underlying challenges.

COACHING APPROACH: LISTENING TO WHAT'S NOT SAID

When the AT facilitator shared the situation with us, our first question was, "When you were having the conversation, were you able to listen to what she didn't say?" In coaching, it's easy to focus on the explicit words being spoken, but a skilled coach must be attuned to the spaces between the words—the subtle cues and emotions that are often revealed through what is left unspoken. The teacher's words suggested confidence, but the facilitator's observations hinted that there might be areas of concern that weren't being addressed. This gap between what the teacher said and what the facilitator observed indicated a potential need for further support, but it was not being openly discussed.

RESULTS AND REFLECTION

In this case, we encouraged the AT facilitator to engage in reflective listening. Rather than simply accepting the teacher's statements at face value, the AT facilitator needed to dig deeper, using the conversation to uncover what was really happening in the classroom. In coaching, it is just as important to hear what is unsaid as it is to focus on overt statements. An AT facilitator can pay attention to nonverbal cues, such as tone, body language, and pauses, revealing a deeper layer of meaning that the words alone may not convey.

Additionally, we advised our Cadre member to use data to support her educators with deeper reflection opportunities, ultimately leading to a clearer understanding of areas where additional support could be beneficial. While the teacher felt confident in her use of AT, by listening to what was not said and using a coaching approach, the teacher may recognize

BACK TO CONTENTS

the student wasn't fully benefiting from the tools in place. While it may seem like a slow process, taking a coaching approach will ultimately enable the teacher to identify effective strategies to support students struggling with AT integration.

AT EXPERTISE

AT professionals must carefully balance their roles as coaches, collaborators, and experts by assessing the needs of the educators and the context. This nuanced discernment is supported by research in educational and professional development models. According to Aguilar (2013), effective coaching requires collaboration and empowerment to develop the skills and confidence necessary for independent implementation. In contrast, when educators face complex technical issues or are new to AT, it might be most important to provide AT expertise by offering specific guidance, technical knowledge, or immediate solutions (Park et al., 2021). At any given time, an AT professional may serve as a coach, collaborator, or expert, adapting their approach to the situation's specific needs. This dynamic role requires flexibility to solve immediate challenges while also building long-term capacity where educators can integrate and support AT.

AT Professional Role Chart			
Role / Characteristics	Consultant	Collaborator	Coach
Assumption	You are not doing as well as you could be and I'm here to help	There are concerns and together we can address them	You are highly skilled and valuable and could be even better
Conversation focus on:	Policies, procedures, behaviors, strategies.	Generating information, problem solving and **action** planning.	Decision making processes, perceptions, values, mental models
Conversations are characterized by:	Recommendations, Rationale, advice, suggestions, and demonstrations.	Mutual brainstorming, clarifying, advocating, deciding, identifying steps to be taken.	Listening, pausing, probing, questioning, paraphrasing, and withholding advice, judgements or interpretations.
You might hear:	"Here are serveral ways to approach the integration of the use of his AT during reading."	"How van we develop a plan for his AT use during reading?"	"What might be some ways you can incorporate his AT use during reading?"
The goal is:	To inform regarding the law, student needs, policies and procedures, or specifics strategies. To provide technical assistance.	To work together to solve instructioal problems, to apply and test shared ideas, approaches and solutions.	To transform the teacher's thoughts and perceptions about AT, to develop decision making, self-monitoring, and reflection skills.
The source of accountability is:	The specialist.	The teacher and specailist together	The teacher.
The support role in relation to the teacher.	Expert.	Colleague.	Mediator of thinking.

An AT professional must consider several key indicators when determining the best approach. What is the educator's foundational AT knowledge? If the goal is capacity building, a teacher who is unsure how to use a new AT device but is motivated to experiment and committed to support the student might be ready for a coaching conversation. Coaching is ideal for complex and open-ended situations because exploration and experimentation are needed.

However, when an educator lacks foundational knowledge about AT, the situation may initially require the AT professional to provide expert guidance. This expertise can help establish a clear path forward, including recommendations for training or resources to build the educator's long-term skills. Similarly, when an immediate or critical need arises—such as including a visually impaired student in a classroom who requires a functioning screen reader—the situation demands expert action. In these time-sensitive scenarios, the AT professional's specialized knowledge is essential to ensure rapid and effective solutions that minimize disruptions to the student's learning experience. AT professionals balance the dual roles of expert and capacity-builder by addressing urgent needs while fostering skill development.

Should I coach or consult? Reflection Questions for AT Professionals.
1. What does this educator already know about AT?
2. Does the situation require immediate action or specialized expertise?
3. Will coaching in this context help the educator grow their skills and confidence?
4. How can I ensure the educator feels supported while also fostering independence?

LEADERSHIP DRIVING AT COACHING SUCCESS

AT professionals developing a coaching mindset is significantly influenced by the support of AT school leaders. Administrators are critical in creating a culture where AT coaching and AT capacity building are expected, ensuring system-wide alignment and sustainability. School leaders impact the coaching process by setting clear expectations, providing resources, and promoting collaboration.

For example, one of the districts partnering with the HQIILE project demonstrates the transformative power of adopting a coaching mindset across all staff levels. This district's strategies have included opportunities for micro-professional development tailored to the unique feedback and identified needs of educators. Staff engage in weekly connections to celebrate successes, share effective practices, and collaboratively address challenges in meeting both student and staff needs. The team analyzes data monthly to identify trends and refine their strate-

gies to ensure continuous improvement. Furthermore, the district actively collaborates with other teams statewide, fostering a network of like-minded educators to exchange successes, address barriers, and build a supportive, inclusive educational environment for staff and students alike.

Leadership is key in fostering sustainability by creating systems and processes that integrate AT coaching into the school culture. When administrators provide resources and dedicated time for collaboration, they streamline the implementation process and ensure the continued success of AT initiatives long after initial training. This systemic alignment reduces dependency on individual AT professionals, enhancing both efficiency and long-term impact.

YOUR NEXT STEPS

As you begin your coaching journey, consider how this approach can make your work more efficient and sustainable. Building educator capacity will reduce the need for repeated interventions and create a lasting foundation for AT integration across classrooms. Start small, focus on shared goals, and watch as the coaching culture transforms not just student outcomes but your role as an AT professional.

IDEAS TO GET STARTED

- Develop a school AT plan that outlines how coaching will be integrated into professional development and includes measurable goals for building teacher capacity. Share this vision during staff meetings or professional learning sessions.
- Allocate dedicated time for coaching conversations, with administrative support, to ensure teachers and AT professionals can collaborate effectively. Providing necessary resources and structured time for these discussions reinforces the importance of coaching.
- Use PLCs! Professional Learning Communities (PLC) are great opportunities to coach on AT implementation.
- Make AT a shared responsibility. When addressing AT-related challenges, invite teacher input, framing the conversation as a collaborative effort rather than a directive.
- Many teachers are passionate about student success and want to implement AT as effectively as possible in their classrooms. Highlight and celebrate their successes. Encourage teachers proficient in AT to serve as peer coaches for their colleagues.
- Make AT trainings part of the overall professional development and technology training system to build general AT awareness and skills.
- Invest in tailored professional development for AT professionals that incorporates coaching practices and strategies.
- Gather data about the AT service delivery process to

determine the impact of more coaching. Metrics ideas include observations of students using AT, teachers' confidence about AT with pre/post surveys, or stakeholder interviews to measure satisfaction.

AT can transform the educational experience for students with disabilities, providing access, independence, and engagement that might otherwise be out of reach. However, its success hinges not only on the availability of tools but also on the capacity of educators to integrate AT effectively into their classrooms. By addressing persistent barriers—such as inadequate training, misconceptions, and lack of confidence—and adopting a coaching mindset, AT professionals can help educators build the skills, knowledge, and confidence necessary for sustainable AT implementation.

A coaching mindset fosters collaboration, trust, and shared responsibility. At the same time, AT professionals must remain flexible, toggling between roles as coach, collaborator, and expert, depending on the situation. When administrators champion coaching by providing resources, professional development, and time for reflective practice, they create the foundation for a system-wide transformation in AT service delivery.

The journey toward a coaching mindset is not a one-time shift but a continuous process that requires intentionality, reflection, and support. By investing in these efforts, schools can ensure that AT is not just a tool but a catalyst for student success. For those ready to begin this journey, the strategies and examples in this article provide a practical starting point for fostering coaching and maximizing the potential of AT for every student.

Integrating AAC into a Center-Based Preschool Classroom:
Collaboration is Possible!

Summary:

In this article we will share our journey as an SLP and early childhood special education teacher in a center-based classroom with autistic preschoolers where we successfully embedded AAC best practices. We will take you through our previous teaching methods, our shift to neurodiversity affirming practices, and successful implementation of AAC within our classroom. We will discuss our lesson planning and the collaboratively designed curriculum.

LEAH CARPENTER, MS, CCC-SLP. Leah has been working as a speech-language pathologist since 2017. She holds an educational and health license for the state of Minnesota and her ASHA CCCs. Most of her career has been spent in schools; specifically, early childhood special education. She is now a clinical instructor at Minnesota State University - Mankato. Leah is passionate about making communication more accessible to non speaking individuals and creating an environment to facilitate neurodiversity-affirming practices.

SARA CARRIGAN, BA, M.Ed. Sara Carrigan has been an Early Childhood Special Education teacher since 2004, dedicating most of her career to supporting autistic children aged 2-5 in center-based preschool classrooms within public schools. Since July, Sara has expanded her impact by working with children and families and is currently working as an Early Interventionist. She is deeply passionate about empowering families to advocate for their child's success in every setting, fostering meaningful growth and connections along the way.

INTRODUCTION:

Any SLP will tell you that establishing buy-in with adults is one of the most significant barriers to successful implementation and use of AAC. How will the child ever learn their AAC if no one is willing to teach them? How do we get more adults on board that AAC should be used more often than 2x/week for 20 minutes? It is not an easy feat, but Sara Carrigan (special education teacher) and Leah Carpenter (speech-language pathologist) accomplished such a high level of collaboration that AAC was eventually embedded within curriculum planning for an early childhood special education (ECSE) classroom. But let's start at the beginning, where most of us start - traditional instruction and service provision during specific "work station" times.

Our ECSE journey began together in 2020. We had two centerbased classes of autistic 4-year olds, 4 days a week. Our classroom ran as many did, a traditional early childhood special education classroom. We had a schedule that included play, work time, circle time, snack, and gross motor time. Students were supported through visuals for communication, most often through low tech AAC such as activity boards, teacher created visuals or customized snack mats. Work stations were structured times for teacher, speech-language pathologist, occupational therapist and paraprofessionals to target identified goals and objectives and teach "preschool academics." Play was often one of those stations. Each child had a schedule of color coded tables to rotate through 4 different stations. We

used first-then and token boards to "motivate" kids to complete activities and earn their preferred snack item toy/activity. We used timers to indicate when that station was over and time to move on to the next activity. At the beginning of the year we often started out with play based stations to get kids used to being in an area and transitioning when there was that auditory cue to change. The intent was that as kids learned the routine of stations we would transition to the "more academic" tasks to get their stamina built up for longer and more structured work time in kindergarten. Does this sound familiar?

AAC COLLABORATION - LEAH'S TAKE AND RECOMMENDATIONS:

Before Sara and I met, the ECSE teams I worked with tended to assume that young children can only do so much with visuals and AAC. It seemed people believed the simpler, the better. But we know that typical children need exposure to a lot of different words in order to learn language. In fact, if we withhold language or only model "ready, set…" until they can say GO, they usually fall behind in their language development. So why doesn't the same principle apply to non speaking children who just need language to be in a different modality?

If we only provide PECS or simple low tech pictures, we are not promoting the use of a robust system or autonomous communication, which is what language truly is. This is how I explained the importance of a robust system to Sara - and she got it. While we had some bumps along the way, we were supportive of each other and respected each other's expertise.

While I was working with Sara and we were slowly changing our approach, I was on other teams in other buildings who also had complex communicators. It was tricky navigating differing team dynamics and staff buy-in. Admittedly, I fumbled quite a few times with collaborative efforts. But those experiences taught me a lot about how to navigate conflict and successfully gain staff buy-in so we can all work towards building a communication system for the child.

First and foremost, we have to start where the staff are. If they have never even seen a high tech device, it is an unrealistic expectation that they will be modeling on it consistently throughout the school day immediately. Perhaps a more realistic expectation would be to get the device out of the backpack, make sure it is available throughout their day at school, and charge it when it needs to be charged. One team I was on needed to start here - take the device out of the backpack and have it out for the school day for the first month of school. I put up "don't forget my voice!" posters on the student's lockers with a picture of the app and brief technical instructions. Prior to hanging these posters up, I gathered staff feedback on them. I left it open ended - "do you think something like this would be helpful? Do you think I need to add or change anything?" This seemed to increase staff buy-in because they had input and an opportunity to connect with me.

I have found that establishing relationships with staff members is key to the success of AAC implementation. AAC, no matter the program or device, is a learning curve. We need to establish a relationship with staff so they feel comfortable with us teaching them a brand new skill set. One way to do this is being a holistic team member. Think of ways you can ease their workload while you are in the classroom - can you help by washing tables? Taking students to the bathroom? Helping a child regulate so staff can take a breath? All of these little things add up to you showing that you care. We also need to recognize that there can be so much going on in the classroom that AAC might not be the priority every minute of everyday. By taking on a few tasks here and there, you could be freeing up time and cognitive energy for the staff to continue learning new skills with AAC.

Like anything new we come across or introduce, there may be initial hesitation. And that is to be expected! Lean into the discomfort and be willing to have big picture, vulnerable conversations once you have a well-established relationship. The staff need to be on the same page with how they envision children gaining skills and the overall priorities of the classroom. Communication is so important to other aspects of development that it can be embedded within most activities. This is where joint planning and problem solving is going to increase AAC use. It's important that we reflect and re-evaluate how things are going and if our approach is supporting the child and the classroom dynamic. Doing this with another professional to get their perspective is imperative to the student's holistic success. We absolutely can and should be supporting other areas of development because it is about the child as a whole, not just our goals and objectives.

Lastly, being open to problem-solving and setting aside time to co-plan helps create a sense of a team. This shows you are in it with all of the classroom staff and want to not only be supportive, but a part of helping the child be successful in the classroom. Sara and I have been told we are good at "getting curious" about children - we don't just see the behavior, we try to look past it to underlying reasons which then lead to proactive solutions. Sometimes, the solution is modeling on the AAC device or programming in regulation strategies so the child has access to those all of the time. For one child, we found that teaching her programmed phrases in her AAC while she was regulated led to her using those strategies when she was becoming dysregulated, then coming out of that dysregulation faster. This then supported not just her communication development, but also her social/emotional development, meeting both mine and Sara's goals.

When we take a team-based approach with AAC, meet staff where they are, and view the child as a whole, that is where we can see the most change and progress for both staff and students.

AAC COLLABORATION - SARA'S TAKE:

As a teacher, I have always relied on my fellow educators, speech, occupational therapy, and paraprofessionals as equal team members in supporting the kids in our classroom. We all bring a different skill set and expertise to the table. Everyone has something to contribute. I trusted Leah as a professional, when she suggested higher tech AAC as communication support, and was on board to give it a chance. New is hard but when I saw how AAC opened up our kids' world, I knew I was excited for the possibilities and ready to learn a new skill. Leah showed me she was "all-in" by problem-solving with me, taking on extra tasks, and supporting my goals within her sessions. She and I had vulnerable conversations about our visions for the classroom and how we would get there. It helped us align our values and center our priorities. I wish every special education teacher would give AAC a chance to experience the magic like I have.

NEURODIVERSITY-AFFIRMING JOURNEY AND CURRICULUM CREATION:

During that 2020 school year, we had a student join the class who made us question our entire approach and was our true catalyst for change. At the beginning of the year, we began by implementing a rotational "work station" time. We remember dreading the beginning of the year when we felt like the entire workstation time was spent on the transition itself. Once we finally got kids regulated enough to engage in something… ding! It was time to transition again. One of our students showed intense dysregulation through self-injurious behavior, biting and scratching others. This was very evident during our work station times. We realized we were asking too much, having him transition to a new adult and new activity every 8-10 minutes. He felt safe in the wagon, LOVED bubbles and tactile sensory activities. When the timer went off, staff began coming to him and engaging in whatever activity he was interested in. We quickly realized how many concepts and communication opportunities we could embed in blowing bubbles and sensory bins. If we had success following his lead to be able to feel safe to connect and engage with us, why couldn't we take this approach with all of our kids? We came to the realization it isn't the kids' responsibility to comply with our teaching methods, it was our responsibility to create a learning environment to meet each one of them where they are.

Starting in 2021, we invested in neurodiversity affirming professional development, sought out various neurodiversity affirming accounts, and other resources from autistic voices. As we dove deeper into our understanding of neurodiversity affirming practices we learned about strengths based approaches as well as masking and autistic suicide. During our team meetings, we had open conversations about how the neurotypical approaches to therapy and teaching weren't working with our learners. We realized that our well-intended teaching strategies were actually trying to change them to be more like their neurotypical peers… and it was an awful feeling. We decided to move forward as a team with our new neurodiversity-affirming principles where every staff member commits to helping the child holistically and as they were. Everyone understood the value in modeling on the child's AAC as often as they could to teach the child a communication system. As we implemented this new approach, children began to learn. They began to show us what they knew - and turns out, they had a lot to say! As a team, we began to understand the pivotal role communication played in regulation, cognition, and social connection for our students. Not only was this helpful in addressing their immediate communication, it was teaching foundational skills for learning, and most importantly, skills that would inevitably enhance their overall quality of life.

Why did this go so well? At that time, we were fortunate to work with a group of women who knew we could do better for our kids. We were in agreement that the traditional teaching strategies I learned in graduate school and were common in many early childhood special education classrooms just didn't feel right for our kids. We were willing to learn, stumble, and get outside of our comfort zone to find a better way.

As the 2021-2022 school year progressed, we established our classroom philosophy to understand the purpose, values, and goals that drive our students' learning environment. This streamlined our instruction and purpose as well as informed new adults entering the classroom about the expectations. Our philosophy was: Connection, Regulation, and Communication.

First and foremost, we put connection as a foundation for all students. Trust and connection is a critical piece of our job. If a child doesn't feel safe and connected to an adult, they are not in a space for learning. We honored every child's manner, pace, and willingness to connect. We joined in their joy no matter how silly we looked or felt, let go of what was coming next on the schedule, and didn't mind how loud or messy we were. It was a matter of striking a delicate but intentional balance between needed predictability/structure while still joining kids where they are, presuming competence, and holding high expectations. We honored each child's emotional state and sat with them when they were having big feelings. We wanted kids to be able to connect with us while still being their authentic, perfect selves. We prioritized connection and our kids' emotional well being over anything else and it felt really good. Not only did it feel good, we discovered all of the incredible things our kids knew and had fun doing it! They trusted us to let us in

and eventually stretch them to learn and try new things.

Regulation before expectation. We can't expect kids to be ready to communicate, play, and interact with others until their bodies and brains are regulated. Quickly we realized our kids were showing us what they needed. That student we were constantly helping down from the top of a toy shelf or table, he needed to climb. That student who was constantly jumping off of things, he needed to jump and crash! We realized their bodies needed access to sensory input all of the time. We trusted kids to access sensory equipment when they needed it, not only during designated sensory times or earning it after a "non-preferred" task. The result was more regulated, more connected kids. From then on out, we got curious, let the kids show us what they needed and gave it to them. We did circle time on the trampoline, coloring activities under the table, and speech activities on the swing.

A final pillar to our classroom philosophy was communication. All students would have access to a voice even if speaking isn't accessible. We were all in agreement that low tech AAC absolutely has a place in our classroom but at the same time, it was limiting. Communication is not only a right but a key to connecting with others. We needed to honor and acknowledge all forms of communication equally. AAC in our classroom would be accessible without constraints or gatekeeping. Kids were given many models and opportunities to use their devices. They were free to explore their devices and talk about what they were interested in. We presumed competence, acknowledging any and all communication as intentional. We

This is our classroom set-up, with a variety of ways for our students to meet their sensory needs. We switched out equipment as our students showed us they were ready for something different.

shifted our communication from questioning and prompting to modeling natural, declarative language, commenting, narrating and even giving brief moments of silence to allow kids opportunities for spontaneous language. We learned to model language on devices and we even got to model mistakes as we were learning too. Above all we understood and honored refusals are self-advocacy. Every student, no matter how young, has the right to advocate for themselves and be heard.

Now that the baseline was established for the classroom, it was time to address the details of implementation. We wanted to highlight AAC and create a curriculum that was not only accessible for the students, but supported staff and families in learning these programs in a functional and intentional way.

❖ Descriptive words like big/little

At Home Focus:
❖ Enjoying the changing seasons. Taking a walk with your child and talking about the changing and fall leaves is a great way to practice our core words, "look" and "see."

Planning Grid: This is an example of our planning grid demonstrating how we embed opportunities to practice our core words of Look/See in all of our activities. These activities were included in our newsletter to parents.

BACK TO CONTENTS
This is a visual we had available for students when we went on our class nature walk to reinforce our core words of Look/See.
This is a visual support we had for students to follow along during one of our movement activities at circle time during our Look/See unit.

YouTube Video: This is a video of Sara and a student on a nature walk. You will notice this student asks for a "blue" leaf, and instead of correcting him, Sara presumes competence and actively searches for a blue leaf. When they didn't find one, he labeled the leaf the correct color.
https://www.youtube.com/shorts/WrEtCFh9bHA

YouTube Video: This is a video of a paraprofessional and a student engaged in a child-selected sensory activity. The paraprofessional models on his device without expectation that he responds.
https://www.youtube.com/watch?v=z5rSL0PX5SY

Not only was this new for our students, we wanted staff and parents to feel confident navigating to be able to model throughout classroom activities and with their child at home. It made the most sense to start with core words. After abandoning work stations (never looking back) and embracing play based, child led learning activities, we started with each two-week unit focusing on one to two core words. We went through each activity of the day and brainstormed ways we could incorporate that unit's core words in as many activities as possible. This planning happened at team meetings and lived in shared docs online so everyone was able to contribute even if they weren't on-site full time. Not only were our activities rich in the chosen core words, we would find areas of the classroom where we could have the symbol in print, in books, on motor equipment, in the sensory table or on the way to the bus. A silver lining of COVID was intentionally planning an activity in each of our units for families to make AAC accessible at home. Some units it was a video of a song we were doing at circle time, other units it was practicing "go" with a visual on the door to talk about where they were

going each time they left the house. Keeping it simple and allowing for repetition not only gave our kids opportunities to practice but also built confidence and competence in staff and parents to be able to get to know their child's communication program and provide models.

Having a core word focus really seemed to be going well. Staff were feeling more confident modeling and we were seeing more communication from students as well. That first year, averaging 2 words per unit, we covered 4- 6 words per month, for a total of 30+ words for the entire school year! What we were finding the next school year was we had students coming in day one with their own devices and had already had familiarity with many of the core words we had focused on as well as staff who were much more confident and efficient in modeling on their devices. As our knowledge about their programs and about our kids as communicators grew, we learned what voices felt right for kids to be motivated to communicate. While we

YouTube Video: This is a video example of a book reading that was sent home to families to watch and practice modeling on the AAC. https://www.youtube.com/watch?v=3M57Eqv9F0E

AAC IN ACTION: THINGS OUR STUDENTS HAD TO SAY
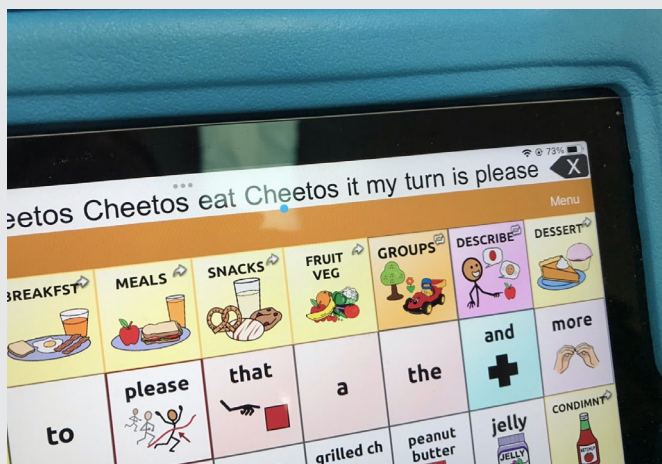

This is a student who is hoping for more Cheetos at snack time.
This student is expressing his opinion on Oreos.

This student is requesting to swing.
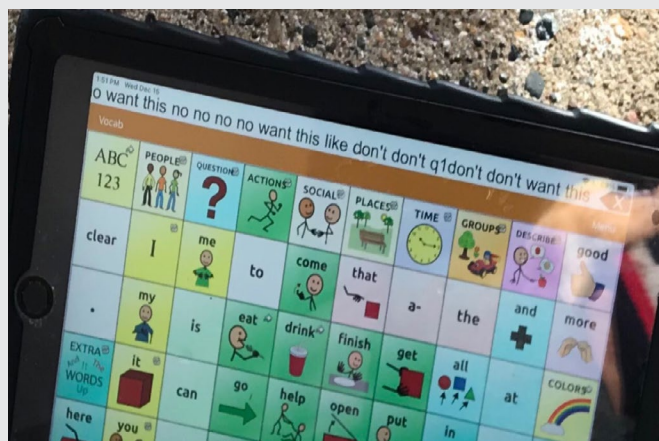

This is from a student letting us know he didn't want to be outside any longer.

BACK TO CONTENTS

still used a core word focus, we were able to start expanding into kids' interest areas during play, emotions, and diving into those more custom, specific pages to give our kids an opportunity to talk about what they wanted to say. What we were also finding out is our kids knew a lot of things! We continued to model and our students continued to gain more language and make great progress.

CONCLUSION:

We went our separate ways in 2024; Leah now works at Minnesota State University - Mankato as a clinical instructor and Sara works as an Early Interventionist in a Birth-to-Three program. While it was a hard decision to part ways, we both needed something a little different… but we still remain friends and professional collaborators. This experience taught us to ground our practice in what is best for kids and families. It taught us to be vulnerable and that progress isn't always linear. Collaboration to implement AAC and best practice is no easy feat. But it's worth it. ■

Closing The Gap 2025

FREE
EXHIBIT PASS

Registration Opens April 1

Gain hands-on experience with cutting-edge assistive technology products.

📅 EXHIBITION DATES: OCT 21-23   📍 MINNEAPOLIS, MINNESOTA

AI ÷ Learners

Accessible games for students with all abilities to learn early math, literacy, and social skills.

Build Capacity With State-of-the-Art Training, Tools and Resources

Closing The Gap offers a dynamic, online platform of on-demand professional development, resources and tools for individuals, school districts, rehabilitation centers, non profit organizations and universities who are using assistive technologies to support children and adults with disabilities.

Our goal is to help our members build capacity, grow their assistive technology skills and enhance their instruction using today's best practices & implementation strategies. We've helped thousands of teachers, specialists, practitioners, parents and end users, to expand and enhance their knowledge and skills while learning how to change lives with assistive technology. We hope you'll join us too!

Disability: vision
Braillo 300 Braille embosser is a reliable and dependable embosser for true Braille production. At 300 CPS using continuous Braille paper, it offers exceptional Braille quality and consistency. Its combination of speed, durability, reliability are the reasons why it is used by most of the largest Braille production facilities.

Braillo 450 S2
American Thermoform Corporation
Price: $35000
Device: , braille output, printer
Disability: vision
The Braillo 450 S2 is an ideal embosser for those that need increased Braille output over the 300 S2, but not the speed and scalability of the 600 S2. It shares the same chassis as the 300 S2, but internal components are upgraded to ensure superior dot quality and consistency at these higher embossing speeds. Using continuous/fanfold Braille paper and embossing at 450 CPS (1,350 pages per hour), it will be a trusted, high speed asset to your business

Braillo 600 S2
American Thermoform Corporation
Price: $45000
Device: , braille output, large print, printer, speech output
Disability: vision
The Braillo 600 S2 Braille embosser is the faster, more robust counterpart to theBraillo 450 S2.Embossing at 600 CPS (1,800 pages per hour), it is the fastest continuous/fanfold embosser available, and it offers remarkable dot quality and dependability. Its combination of speed, reliability and quietness are the reasons why its predecessor, the Braillo 600, is used across the world by most of the largest Braille production facilities. Unique to the 600 S2 is that it is built upon a chassis that can be upgraded to aBraillo 600 SRas your Braille production needs expand.

Braillo 600 SR
American Thermoform Corporation
Price: $79500
Device: , braille output, large print, printer, speech output
Disability: vision
The Braillo 600 SR braille embossermeant for large volume Braille production. This Braille embosser is unique, as it uses paper rolls instead of continuous tractor feed paper. Using paper rolls helps to save money on paper expenses and also eliminates the need for a burster and its operator.

Braillo 650 SF
American Thermoform Corporation
Price: $128000
Device: , braille output, printer, speech output
Disability: vision
The Braillo 650 SF is the worlds only fully automated Braille book production system. Send a file and pick up a finished, folded, covered and stapled book. The Braillo 650 SF makes on-demand Braille publishing possible.

Braillo 650 SW
American Thermoform Corporation
Price: $88000
Device: , braille output, printer, speech output

Disability: vision
Braille 650 SW Braille Embosser is an advanced Braille embosser that employs a paper cutter for two or four page-per-sheet format, and a stacking unit engineered to handle large format production. This machine is ideal for creating both magazines and textbooks.

BrainPort Vision Pro
Wicab, Inc.
Price: $10000

Staying engaged and connected in the classroom has never been this satisfying.

Control Bionics Trilogy System - NeuroNode Duo iOS
Control Bionics Inc.
Price: $0 - $13500
Device: switch, voice recognition, dedicated communicator, environmental control, speech output
Disability: cognitive, hearing, learning, physical, speech, vision
CONTROL BIONICS TRILOGY SYSTEM. The NeuroNode Duo is a speech generating device with powerful access methods that make the user more effective in communicating. Combining the flexible NeuroNode sensor, and an Apple iPad, this device lets you operate your speech generating software using iOS. With EMG (electromyography) and Spatial control options, the NeuroNode Duo gives the user communication possibilities they've never had before. The wireless sensor moves with the user, allowing flexible placement for users of all abilities and range of motion- even the most minimal movement can trigger the sensor, giving the user control and independence

CooperCar II
RJ Cooper and Associates
Price: $999 - $1399
Device: Disability: cognitive, physical
The original CooperCar, 1991-1999, was placed 848 times around the world. Some are even still in use! The CooperCar II is a resurrection of this successful toy/tool/vehicle for severely physically (and possibly cognitively) challenged young children (up to 50 lbs). It can be controlled by 1-4 switches, or an optional joystick. It turns electrically on its large 2 wheels (no steering wheel). An optional Wireless Remote Override is available. The firmware on the controller is similar to switch parameters on a computer: Time (so that a short activation of a switch/joystick movement can result in longer movements of the vehicle), Acceleration (for those that startle easily), and Speed.The CooperCar II is a viable alternative for youngsters to a VERY expensive power wheelchair! Or, for those

severely cognitively impaired, the world's greatest cause/effect device.

Cordless Switch Interface
RJ Cooper and Associates
Price: $99
Device: switch interface
Disability: physical
Provides two switch inputs for plugging switches into a computer. Once plugged in, the switch(es) become standard mouse clicks. With installation of the accompanying SwitchHopper software you can configure each button to be any mouse-button event or keystroke that you would like.

Cosmos Connect
Control Bionics Inc.
Price: $0 - $550
Device: switch, environmental control
Disability: physical
Play video games, activate switch toys, dine independently, check text messages, and more, all using a single NeuroNode and the Cosmos Connect.The Cosmos Connect is a small portable control device that can be used with a Windows display device. When paired with the NeuroNode sensor, the Cosmos Connect leverages our exclusive application to intuitively interact with a variety of personal control devices giving the user more independence with a single movement.The Cosmos Connect is a small, portable device that turns a single NeuroNode sensor into multiple outputs. The device allows up to 8 wired outputs and one Bluetooth output.

Crick USB Switch Box
Crick Software, Inc.
Price: $159
Device: switch interface
Disability: physical
Plugs into your computer and connects your switches. It will work instantly with Clicker and DocsPlus, with no setup required. For other switch accessible software, we have included USB Keys software, a small application that converts switch presses from the USB switch box into key presses or mouse clicks.

Cushion Grip Switch
Enabling Devices
Price: $57.95 - $59.95
Device: switch
Disability: cognitive, hearing, learning, physical, speech, vision
A fantastic sensitive switch that fits most hands. Just slip it over your hand and you can use a palmer grasp or roll it on a tray or tabletop to activate any device or toy. Now comes in two sizes - Medium and Small.

DaVinci Pro HD/OCR
Enhanced Vision
Price: $4405
Device: optical character recognition, large print

Disability: vision
DaVinci Pro is a high-performance desktop video magnifier, featuring a 3-in-1 camera (see near, intermediate, and far), Full HD and selective text-to-speech OCR. Experience the joy of reading with high definition color and contrast, crystal clear images, and vibrant colors. DaVinci Pro will read any printed text aloud with the push of a button

Dipsy
Adaptivation, Inc.
Price: $39
Device: switch
Disability: cognitive, learning, physical
This tilt-sensitive switch can be attached to the head, arm, finger or any appropriate object and can be used for posture training. The Dipsy is activated by a 30-degree tilt which makes it less prone to false activation. Includes a headband and two finger mounts. Price Reduced.

Dot Box Switch
Adaptive Tech Solutions
Price: $35.64
Device: switch
Disability: physical
Our Dot Box Switch has a 1" raised circular activation surface that requires moderate pressure (average fingertip pressure). Has a generous 6' cord with standard 1/8" (3.5mm) jack and rubber feet on the bottom. A nice general switch that can also be used to encourage finger isolation.

Drink-Partner Insulated Tumbler
Mealtime Partners, Inc.
Price: $74.95
Device: Disability: cognitive, physical
The Drink-Partner Drinking System can accommodate an Insulated Tumbler in the cup holder, as an alternate drink container to the bottle that is provided with the Drink-Partner Drinking System. The Insulated Tumbler is an assistive drinking aid that provides hands free drinking for individuals with disabilities. The Drink-Partner Insulated Tumbler will fit in any of the Mealtime Partners Front Mounted Drinking Systems Cup Holders as well as the Drink-Partner Cup Holder. The Insulated Tumbler holds 16-ounces of hot or cold liquid. It keeps liquids hot or cold for several hours. The tumbler has a screw-on stainless steel lid that has flex tubing integrated into it. The flex tube contains the drinking tube from which the user drinks. Once positioned, the flex tube will hold the drinking tube in position, until it is adjusted.

The SMART Brailler® is an early learning tool designed to promote an interactive educational experience between students, teachers and parents by displaying, vocalizing, and brailling what a student types.

Personal Pager
Adaptivation, Inc.
Price: $39 - $79
Device: , environmental control
Disability: physical
The Personal Pager provides wireless call button capability at home, school or outdoors. Both transmitter and chime

receiver are battery operated. Works with any adaptive switch.

Photo Electric Switch
Adaptive Switch Laboratories, Inc.
Price: $660
Device: switch
Disability: physical
The ASL 209 projects a cone shaped, invisible beam of light to an adjustable maximum distance of 21 inches. Switch activation occurs when any object passes through or is detected in the target area.

Pillow Switch
AbleNet, Inc.
Price: $140
Device: switch
Disability: cognitive, physical
A smooth and soft foam surface makes this switch suitable for head or cheek activation. Easily fastens to a pillow or wheelchair cushion with safety pin and Velcro.

Pneumatic Switch Kit
Adaptivation, Inc.
Price: $59
Device: switch
Disability: cognitive, physical
Use this switch to activate with only a puff of air. It can be used with all kinds of squeeze toys,bottles and balls. It allows you to create your own object-based switch.

PowerLink 4 Control Unit
AbleNet, Inc.
Price: $330
Device: switch, environmental control
Disability: cognitive, learning, physical, speech
The PowerLink 4 allows switch users to control up to 2 electrical appliances with single switches. Features 6 unique modes of control that allows you to define exactly how, and for how long, appliances will be turned on.

Privacy microphone
Talk Technologies
Price: $85 - $329
Device: voice recognition, speech output
Disability: cognitive, hearing, learning, physical, speech, vision
Talk Technologies specialized handsets eliminate background noise and make the sound of your voice inaudible to those around you while simultaneously providing a crystal-clear voice signal- allowing you to talk, listen and document privately without interference. Compatible with IOS and Android smartphones, tablets, computers or any microphone enabled device.

Pro-Bot
Terrapin
Price: $159.95
Device: , dedicated communicator
Disability: learning, physical

Pro-Bot offers an enticing, engaging and hands-on experience with Logo technology and robotic controls. Program Pro-Bot's route with the on-board arrow and number keys, then press go and watch Pro-Bot zip along following your instructions. Insert a pen and watch Pro-Bot draw as it moves. Sound, light, and touch sensors are built in, providing additional coding options.

Pro-Bot
Terrapin
Price: $159.95
Device: Disability:
Pro-Bot provides an engaging, hands-on experience as a standalone unit or as an introduction to programming using Terrapin Logo, a language specifically designed for children. Pro-Bot commands are entered via a set of arrow and number keys mounted on the back. Pro-Bot will follow the sequence of commands that were entered step by step. Pro-Bot can hold a felt-tip pen in the built-in mechanism in the center, allowing it to draw as it moves.

ProSlate 10D
Forbes
Device: keyguard, speech output
Disability: speech
The new ProSlate 10D is rugged, lightweight, and compact, offering iOS-based software to run almost any AAC app. Inclusive accessories like SoundPOD™, keyguards, and FlexABLE® handle ensure accessibility. Its sleek, dust-resistant design, four color options, and industry-best warranty make it a top choice for AAC users seeking durability and functionality.

ProSlate 13 Enable Eyes
Forbes
Device: mouse emulator, speech output
Disability: speech
The ProSlate™ 13 with Enable Eyes® offers advanced eye tracking for AAC users, accessing iOS apps like communication, social media, and learning tools. At just 3.82 pounds, it supports single tap, double tap, drag, scroll, and zoom using only your eyes. Includes FlexABLE® Handle, Stand, and SoundPOD™ wearable speaker.

ProSlate 13D
Forbes
Device: keyguard, speech output
Disability: speech
The ProSlate 13D features a nearly 13-inch screen and weighs just 3.6 pounds, perfect for high-density AAC apps using iOS software. Designed for all users, it includes SoundPOD™, keyguards, and a FlexABLE® handle for accessibility. A rugged case in two colors ensures durability and protection, combining function and style.

ProSlate 8D
Forbes

Device: Disability: speech
The ProSlate 8D offers the perfect balance of size, portability, and accessibility. With an 8-inch screen, lightweight design, iOS compatibility, and inclusive accessories like SoundPOD™, keyguards, and FlexABLE© handle, it ensures ease of use for all. A rugged, colorful case and industry-leading warranty provide protection and peace of mind.

ProxPAD
LoganTech
Price: $1395
Device: , dedicated communicator, speech output
Disability: cognitive, learning, physical, speech, vision
The ProxPAD is a large single location communication and learning aid that uses a RFID sound tag card. It is an excellent choice for persons with physical, visual or cognitive impairments who require tangible objects or other sight cue to initiate communication.

ProxPAD - AAC Device
Westminster Technologies
Price: $1395 - $2649
Device: , speech output
Disability: cognitive, learning, speech
The ProxPAD is a communication learning aid for people with physical, visual, or cognitive impairments. The ProxPAD uses tangible objects or images to initiate communication. It uses RFID (radio frequency identification) technology allowing each sound tag to have a different pre-recorded message. The ProxPAD offers two different activation modes. Touch mode requires the sound tag to make contact with the blue surface of the ProxPAD. Proximity mode allows the user to hover or swipe the sound card above the surface. This makes the ProxPAD perfect for a person who has limited mobility or needs it mounted under a table or wheelchair tray.

ProxTalker
LoganTech
Price: $3149
Device: , speech output
Disability: cognitive, learning, speech
The Logan ProxTalker is an augmentative communication device that offers the first moveable picture communication with a voice output. Encoded picture sound tags produce voice output when placed on any of the five device buttons and pressed. Tags can be customized with any image and sound.

ProxTalker - Portable AAC Device
Westminster Technologies
Price: $3149
Device: , speech output
Disability: cognitive, learning, speech

The ProxTalker is a robust, water resistant, easy-to-use AAC device which uses RFID (radio frequency identification) technology to enable independent verbal picture communication for non-verbal people of all ages. Place any photo, symbol, or object on a sound tag card and have a voice! To trigger voice output, place your sound tag card on any one of the 5 buttons and push. Light Touch option is available for the buttons on the ProxTalker at no additional cost.

Puff Switch - G-Switch Series
GlassOuse Assistive Device
Price: $129
Device: switch
Disability: cognitive, learning, physical
Puff Switch is designed for GlassOuse V1.2, yet you can connect it to any kind of adapted device offering a mono 3.5mm jack plug in for external switch controls. Other than regular sip and puff systems, Puff Switch uses an electronic microphone, which allows you to do clicking actions via simple puffs.

Put-Em-Arounds
Enabling Devices
Price: $129.95
Device: , dedicated communicator, speech output, speech trainer
Disability: cognitive, hearing, learning, physical, speech
These talking wall switches allow nonverbal children to initiate communication throughout their day. 101 Animations
RJ Cooper and Associates
Special Skill: cognitive redevelopment, early childhood, adapted keyboard/switch access
Disability: cognitive, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows, Mac
Each activation of the switch causes one of 101 large, loud animations to be played. All Windows and Mac OS's supported.

2 + 2
RJ Cooper and Associates
Price: $59
Special Skill: early childhood
Disability: learning, physical, vision
Skill Level: elementary, secondary
Operating System: Windows, Mac
This is a talking math facts program. You can edit the facts list and use addition, subtraction, multiplication and division with numbers up to 999, even decimals. An easy-to-follow scan system is built in for single switch operation, if desired. 2+2 has drill mode, test mode and help function.

AAC Evaluation Genie
Tip Top Apps
Price: $12.99
Special Skill: communication, scanning, single switch, multi switch, diagnostic
Disability: cognitive, physical, speech
Skill Level: infant/toddler, preschool, elementary, secondary, adult
Operating System: iOS (Apple)
AAC Evaluation Genie is an informal diagnostic tool that is intended to assist speech-language pathologists and others with identifying skill areas that relate specifically to the language representation methods commonly found on augmentative communication systems. There are 14 subtests that can be administered with screening options available for each subtest. English and Spanish language options are available. Direct touch, single and two switch scanning access methods options are available.

ABC Maestro
E-Glas d.o.o.
Price: $69.95 - $129.95
Special Skill: language development
Skill Level: preschool, elementary
Operating System: Windows
ABC Maestro is unique educational rehabilitation software for learning how to write, type, and read. It is primarily intended for students with special educational needs. ABC Maestro offers children faster learning through play. It has 14 fun activites divided into 3 categories - letters, words and numbers.

AbleLink JobQuest
AbleLink Smart Living Technologies
Price: $2500
Special Skill: basic living skills, cognitive redevelopment, vocational, , diagnostic, instructional management
Disability: cognitive
Skill Level: secondary, adult
Operating System: Other
AbleLink JobQuest is a web-based service that gives people with cognitive disabilities a voice in their own career path. Employing AbleLink's ATLAS survey engine and Data Reports system, JobQuest presents multiple job categories and gathers data in real time regarding the preferences of the individual. Students and adults with intellectual and developmental disabilities often have difficulty understanding the nature of various types of work. Pictures and words are limited in conveying tasks, the work environment, tools that might be used, or other elements that could affect job preference.

AbleLink Smart Living Service
AbleLink Smart Living Technologies
Price: $150
Special Skill: basic living skills, cognitive redevelopment, vocational, , authoring system, instructional management
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Windows, iOS (Apple), Android
The Smart Living Service provides access to the Endeavor and Visual Impact apps, as well as the Smart Living desktop. Monthly subscribers receive ongoing training and support from AbleLink staff. Through initial assessment, consultation, setup, customization, and long-term implementation support, AbleLink will be there to help people achieve their goals.

AbleLink Smart Travel Service
AbleLink Smart Living Technologies
Price: $150
Special Skill: basic living skills, cognitive redevelopment, vocational, , authoring system, instructional management
Disability: cognitive, learning
Skill Level: secondary, adult
Operating System: iOS (Apple), Android
The Smart Travel Service provides access to the AbleLink WayFinder app for cognitively accessible travel in the community. Monthly subscribers also receive ongoing training and support from AbleLink staff. Through initial assessment, consultation, setup, customization, and long-term implementation support, AbleLink will be there to help people achieve their travel goals.

AbleLink VantagePoint
AbleLink Smart Living Technologies
Price: $2500
Special Skill: basic living skills, , diagnostic, IEP/IPP
Disability: cognitive, learning
Skill Level: secondary, adult
Operating System: Windows, iOS (Apple), Android
VantagePoint software includes four satisfaction surveys addressing key service areas: My Views About...My Home, My Work, Accessing My Community, and My Day Program. The VantagePoint service includes web-based surveys, data reporting, and unlimited usage.

Access Algebra
Attainment Company, Inc.
Price: $129 - $399
Skill Level: secondary
Access Algebra is a research-based math curriculum for high school students who have moderate-to-severe developmental disabilities, including those with an intellectual disability or autism. The curriculum gives students access to contenttheir high school peers are learning, but with the adaptations and support theymay need to succeed. The curriculum accommodates students who have uniqueneeds, including those who are nonverbal and those whose math skills are at an emergent numeracy level.

Access Language Arts software
Attainment Company, Inc.
Price: $99
Special Skill: cognitive redevelopment, communication, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output
Disability: cognitive, learning, physical
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac, iOS (Apple), Android, Chrome
Adapted stories:Neighbors, Sadako and a Thousand Paper Cranes, The Diary of Anne Frank, and We Beat the Streets. Five-step sequence: Preview, vocabulary instruction, read the adapted story, comprehension questions, sequencing activity. Research has shown to be highly effective in teaching language arts skills aligned to standards.

Access Language Arts: WRITE Software
Attainment Company, Inc.
Price: $99 - $990
Special Skill: language development
Disability: learning, physical
Skill Level: secondary
Operating System: Windows, Mac, iOS (Apple), Android, Chrome
A researched and standards-based approach for secondary students practicing reading and writing skills. Prompts students to write grade-aligned opinion paragraphs for nonfiction and fiction and improves reading comprehension and vocabulary development.

Accessible Literacy Learning (ALL) Reading Program
Tobii Dynavox
Special Skill: communication, early childhood, language development, scanning, single switch, multi switch
Disability: cognitive, learning, physical, speech
Skill Level: elementary, secondary
Operating System: Windows
The ALL™ Reading Program is an evidence-based approach designed to teach basic reading skills to nonverbal students who require augmentative and alternative communication (AAC). Students can learn using the access method that works best for them: touch, eye gaze or scanning. It's available on many platforms and devices including Windows and iOS, and ourI-SeriesandI-110devices.

Accessibyte Arcade
Accessibyte
Price: $150
Special Skill: basic living skills, cognitive redevelopment, early childhood, language development, vocational, adapted keyboard/switch access, large print, speech output
Disability: cognitive, hearing, learning, physical, vision
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other
Accessibyte Arcade is a collection of visual and audible games for students with disabilities. Students can have fun from home or school just by logging in All accessibility included in the browser on any device. Part of Accessibyte Online All Access (includes Typio, Quick Cards, Accessibyte Arcade, ProPack and Braillio).

Advanced Comprehension Therapy
Tactus Therapy Solutions
Price: $24.99
Special Skill: cognitive redevelopment, communication
Disability: cognitive, learning, speech
Skill Level: elementary, secondary, adult
Operating System: iOS (Apple), Android
Challenge your understanding with listening and reading exercises for sentences - perfect for mild or moderate aphasia.

Advanced Language Therapy 4-in-1
Tactus Therapy Solutions
Price: $74.98
Special Skill: cognitive redevelopment, communication, language development
Disability: cognitive, learning, speech
Skill Level: elementary, secondary, adult
Operating System: iOS (Apple), Android
Take aphasia therapy to the sentence level and beyond with 4 apps that strengthen listening, talking, reading, and writing. Free trial available.

Advanced Naming Therapy
Tactus Therapy Solutions
Price: $24.99

Special Skill: cognitive redevelopment, communication, language development
Disability: cognitive, learning, speech
Skill Level: elementary, secondary, adult
Operating System: iOS (Apple), Android
Express yourself better with challenging word-finding exercises for aphasia and cognitive-communication problems. Free trial available.

Advanced Reading Therapy
Tactus Therapy Solutions
Price: $24.99
Special Skill: cognitive redevelopment, communication, language development
Disability: cognitive, learning, speech
Skill Level: elementary, secondary, adult
Operating System: iOS (Apple), Android
Enjoy reading again with paragraph-level passages to suit all abilities and built-in tools to help you understand text better.

Advanced Writing Therapy
Tactus Therapy Solutions
Price: $24.99
Special Skill: basic living skills, cognitive redevelopment, communication, language development
Disability: cognitive, learning, speech
Skill Level: elementary, secondary, adult
Operating System: iOS (Apple), Android
Strengthen digital communication skills with functional typing, spelling, and composition exercises for adults. Free trial available.

Affect Recognition Tool
Nurogames GmbH
Price: $0 - $12
Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, eye-hand coordination, language development, vocational, scanning, telecommunications, voice recognition, diagnostic
Disability: cognitive, learning, physical, speech
Skill Level: elementary, secondary, adult
Operating System: Windows
The Affect Recognition Software serves as a basis of the recognition of the learners' affect states. Its goal is to gather behavioural cues of the learner from the Platform Agents (PAs) - devices and apply innovative machine learning techniques in order to interpret them into comprehensive affective cues that tell the story of the learner's uptake of the learning objective(s).

AI-Learners
AI-Learners
Special Skill: basic living skills, cognitive redevelopment, communication, early childhood, eye-hand coordination, language development, adapted keyboard/switch access, large print, scanning, single switch, multi switch, speech output, IEP/IPP
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows, Mac, iOS (Apple), Android, Chrome
AI-Learners is an edtech website that makes learning math accessible and engaging for students with disabilities through personalized computer games and analytics. The games are compatible with assistive devices such as Screen Readers, Eye-Gaze, and Switches. Our games teach all core math skills from preK to 2nd grade.

Alexicom AAC
Alexicom Tech
Price: $.99
Special Skill: communication, language development, adapted keyboard/switch access, scanning, single switch, multi switch, speech output

Animated Step-by-Steps®
Animated Step-by-Steps®
Price: $5 - $6
Special Skill: basic living skills, communication, early childhood, language development, single switch, speech output, instructional management
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows, Mac, iOS (Apple), Android
Animated Step-by-Steps® are animated PowerPoints designed to address literacy, language, AAC and a host of academic goals. Each page includes a series of animations . Read the text up to the star ... click ... and see an animation of what you just read.There are three and sometimes four versions of each resource (Regular, PCS, SymbolStix, VI) sold through TpT. VI versions are also sold through TeachSimple.com Spanish versions have recently been added to the Library of resources. Symbol-Supported versions support a 'literacy-first' agenda, i.e., the symbols only appear after the page has been read and all the page animations have been triggered. Symbols are then conveniently available to perform Aided Language Stimulation while the step is being completed. These Powerpoint-based lessons can be displayed on the 'big screen' (interactive whiteboard, large screen TV using Apple TV) or the 'small screen' (computer monitor, iPad/Android tablet or iPhone) using the free Microsoft PowerPoint app specific to each).

Anxiety Management Program
The Conover Company

AT-node for Access
Koester Performance Research
AT-node for Access is a public, searchable collection of research on the use of computer access interfaces by people with disabilities. AT-node serves as an evidence-based tool for AT service providers and end users to facilitate informed selection of text entry interfaces. The data can be explored from multiple standpoints to create benchmarks for text entry based on the type of interface, individual diagnosis, and body site being considered for interface activation. The information can inform interface selection, goal setting, and optimizing training for selected interfaces. Researchers and students can use AT-node to identify relevant publications and data on computer access, saving significant time and effort. It provides an efficient way of learning what has already been done and what gaps remain in the field.

ATLAS Travel Readiness Assessments
AbleLink Smart Living Technologies
Price: $2500
Special Skill: basic living skills, cognitive redevelopment, vocational, , diagnostic, instructional management

Dino-DOT
Academic Software, Inc.
Price: $20
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Connect the dots and colorful animated dinosaurs appear before your eyes. Number concepts, counting, sequencing skills and special perception are involved in play. Games can be selected using patterns of three, six, nine or 12 dots. Mode of play, difficulty level, auditory feedback and scan speed can be controlled manually.

Dino-FIND
Academic Software, Inc.
Price: $20
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Dino-Find is a game of concentration stimulating memory and pattern recognition and providing scanning practice. Dinosaurs are selected randomly. One to six matching pairs can be displayed. Switch users make selections using row/column or linear scanning. Mode of play, difficulty level, auditory feedback and scan rate can be controlled manually.

Dino-GAMES
Academic Software, Inc.
Price: $60
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Disability: cognitive, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
All 4 early-childhood educational games: DinoDOT (spatial-perception, counting and sequencing skills); DinoFIND and DinoLIKE (memory and pattern-recognition); and DinoMAZE (cause and effect and directionality learning). Adjust difficulty level and other settings for each game independently. DinoGAMES work with keyboard, mouse, or external single-switch

and provide early scanning practice opportunities.

Dino-LIKE
Academic Software, Inc.
Price: $20
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Single switch users select dinosaurs identical to a target dinosaur. The discrimination level can be set manually, choosing a match and two distracters, a match and one distracter, or the match alone. Color, shape and orientation of dinosaurs are used to enhance pattern matching skills. Can be controlled manually.

Dino-MAZE
Academic Software, Inc.
Price: $20
Special Skill: cognitive redevelopment, early childhood, eye-hand coordination, adapted keyboard/switch access, scanning, single switch
Disability: cognitive, learning, physical
Skill Level: infant/toddler, preschool, elementary
Operating System: Windows
Colorful, motivating exercises where dinosaur characters move through mazes to reach goals with reinforcement through music and animation. Single switch users choose between cause and effect activities or games involving decisions about which directions the animated characters should go to get from start to finish. Can be controlled manually.

DocsPlus
Crick Software, Inc.
Price: $660 - $5940
Special Skill: basic living skills, communication, language development, vocational, adapted keyboard/switch access, optical character recognition, scanning, single switch, multi switch, speech output, authoring system
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: secondary
Operating System: Windows, Mac
DocsPlus enables high school students of all abilities to write independently by providing speech feedback, word prediction and the unique Wordbars.Key features: Speech feedback - each time a sentence is completed, it is automatically read aloud in a clear, human-sounding voice. Word prediction - DocsPlus' intelligent word predictor suggests words based on the context of the student's writing, enabling them to give their full attention to what they want to write and encouraging them to use more adventurous vocabulary. Word Banks and writing frames - bring

curriculum writing tasks within the reach of all learners by giving instant point-and-click access to specific vocabulary for their current writing task. WorkSpace - a built-in planning tool to help students prepare for writing. Students can manipulate and link words, pictures and sounds on their WorkSpace. DocReader - this will read aloud any PDF or Word document, providing equal access to worksheets, exam papers and more. Exam access - DocsPlus can also be used by many learners who require additional access arrangements for tests and exams.

Emotions Color Wheel and Social Programs
Virtual Reality Aids, Inc
Special Skill: basic living skills, cognitive redevelopment, communication, language development, , instructional management
Disability: cognitive, learning, speech
Skill Level: preschool, elementary, secondary, adult
Operating System: Windows, Mac, iOS (Apple), Android, Chrome
Emotions Color Wheel is an example of our online social programs. Emotions Color Wheel visually groups hundreds of emotions with feelings, showing faces on the wheel for each emotion. It discusses concepts for feelings such as how people often have a home emotion that colors how they understand situations. Printable activities and versions of the wheel are used in classrooms for discussions and generalizing for each child. Other material to support social learning include a Social Skills Toolbox for improving communication skills, Social Emotional Skills classroom activities and worksheets, and free printable Picture Cards for non-verbal communication. Programs are free at do2learn.com, which never displays ads or tracks users. Developed under NIH funding, site programs have been tested and used in schools for over 25 years.

Equatio®
Texthelp
Price: $100
Special Skill: cognitive redevelopment, vocational, speech output, voice recognition, instructional management
Disability: cognitive, learning, speech, vision
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac, iOS (Apple), Android, Chrome
Made to help mathematics and STEM teachers and students at all levels, Equatio lets everyone create mathematical equations, formulas, Desmos graphs, and more on their computer, Chromebook and phone. Not only that, but it works where you do - in G Suite Apps, Microsoft Word, Learning Management Systems, and more. Input's easy. Type, handwrite, or dictate any expression, with no tricky coding or math languages to master. There's a huge library of ready-made expressions to save you time, from simple formulas to complex functions. And when you're done, just add the math to your document with a click.

Escuchar y Repetir
LocuTour Multimedia

Streamer™ is a private, secure communication platform that's easy to use and accessible to everyone. It eliminates common barriers by providing: Unlimited Access: No per-user fees or usage limits. .

SUMMERBELL READING METHOD

Summerbell Reading Method, LLC.
Price: $9.99
Special Skill: basic living skills, communication, language development, , instructional management
Disability: cognitive, learning
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac, iOS (Apple), Android, Chrome

The Summerbell Reading Method App is intended for use by anyone with Visual Dyslexia, from Elementary school through Adulthood. The app transcribes anything on the Internet to the "positional reading arc", and is available for download on Apple and Google/Android stores. Currently the school based model utilizes a Chrome Extension. When text is presented in the arc format, vs linear, individuals with Visual Dyslexia report an ability to immediately read and decode. A recent quasi-experimental study by Johns Hopkins University - Center for Research and Reform in Education "An Evaluation of the Summerbell Reading Program in Pennsylvania", reveal gains in multiple areas of Reading, including a statistically significant increase in Oral Reading Fluency.

Super Core

TD Browse
Tobii Dynavox
Disability: physical, speech
TD Browse is a custom-built app for browsing the web with just your eyes in a familiar way, even without previous eye tracking experience. It is designed for people who cannot use their hands to browse the internet due to conditions such as MND, cerebral palsy, Rett syndrome, spinal cord injury or traumatic brain injury. Scroll, surf and click in an intuitive way and switch naturally between these functions. Hit large and small targets with precision using color links. Move left, right, up and down. Quickly recall preferred websites from your browsing history. TD Browse is exclusively for TD I-Series (TD I-13 and TD I-16) devices.

TD Control
Tobii Dynavox
Special Skill: , speech output
Disability: physical, speech
Skill Level: adult
Operating System: Windows
TD Control is an intuitive way of interacting with and controlling your computer via

eye tracking. It's designed for people with conditions such as cerebral palsy, ALS/MND and spinal cord injury who cannot use their hands but want full, independent use of their computer. Navigate and control the Windows environment in a natural way. Use the software and websites of your choice. Stay connected via email and social media. Play your favourite games. Read best sellers. Watch the latest shows. Unleash your creativity. TD Control lets you start as an eye gaze novice and progress easily to control your computer completely using just your eyes. Included with all TD I-13 and TD I-16 devices and PCEye 5 eye trackers. Currently unavailable to purchase as a standalone app.

TD Phone
Tobii Dynavox
Disability: physical, speech
Operating System: Windows
Text and call using just your eyes on a TD I-Series (TD I-13 and TD I-16) device. TD Phone is an app designed for those who cannot use their voice and have limited to no mobility in their hands, due to conditions such as ALS/MND, multiple sclerosis, muscular dystrophy and cerebral palsy. Text or call anyone, anywhere without the need for Wi-Fi, thanks to a Bluetooth connection between your TD I-Series and your Android or iPhone. Search or scroll through your imported contacts in a simple, familiar way. Never miss incoming calls or texts with an easy-to-select popup. Compose messages efficiently with word and phrase prediction. Speak out loud during a call through your TD I-Series using a synthetic voice. It's also possible to use a custom, synthetic clone of your natural voice, with a choice from among leading voice banking providers. TD Phone is exclusively for TD I-Series (TD I-13 and TD I-16) devices.

Tunefork app
Tunefork
Special Skill: communication, language development, scanning, telecommunications, diagnostic
Disability: hearing
Skill Level: preschool, elementary, secondary, adult
Operating System: iOS (Apple), Android
Tunefork is audio personalization software that delivers the optimal hearing experience, improving quality of life for people with hearing loss and elders. Hearing is an individual experience. Each of us has unique hearing "Earprint". This is why no one sound system is perfect for everyone. When you listen to unbalanced audio, you will always miss something. In some cases, you may even cause damage to your hearing. The Tunefork app allows you to take a hearing test when and where is most convenient to you. You could take the test in your living room, without going anywhere, and discover your unique "Earprint". The test is simple yet accurate, following the same protocols as a clinical hearing test that would usually only be done in special booths in hearing centers. After taking the test, the result - your "Earprint" - is converted by a sophisticated algorithm into an audio filter adjusted to meet your hearing needs. About the test: Should take 6-7 minutes- Tests both ears to fully determine your earprint- Clinically tested in laboratory conditions and regular home environments. The technology behind the app was developed by the Tunefork team with the support of Gal Hearing Systems. We guarantee that this is the most accurate self-test out there. We are working hard to improve the test and the adjustment algorithm to bring new optimal and exciting hearing experience to everyone everywhere.

Turn-Talking
RJ Cooper and Associates
Price: $1.99 - $59
Special Skill: communication, language development
Disability: cognitive, physical, speech
Skill Level: preschool, elementary, secondary
Operating System: Windows, Mac, iOS (Apple)

LocuTour Multimedia
Price: $1.99
Special Skill: communication, early childhood, language development
Disability: cognitive, speech
Skill Level: preschool, elementary
Operating System: iOS (Apple)

Wild, Woolly, Wonderful Critters has six stimuli for each of 120 animal pictures. Practice the word, parentese, descriptive phrase, descriptive statement, functional statement and the initial sound of the target word. Explore language while learning about critters.

WinSCAN CS
Academic Software, Inc.
Price: $150
Special Skill: , adapted keyboard/switch access, scanning, single switch
Disability: physical
Skill Level: elementary, secondary, adult
Operating System: Windows
An enhanced version of WinSCAN, an advanced, multi-function, single-switch USB interface for PC users at home, school, or work. WinSCAN CS provides independent control access to educational, productivity, multimedia, and recreational software for Windows 8, 10, or 11. Navigate the desktop, run applications and games, surf the Internet with WinSCAN!

Word Practice
LocuTour Multimedia
Price: $4.99
Special Skill: early childhood, language development
Disability: learning, speech
Skill Level: preschool, elementary
Operating System: iOS (Apple)
A beginning level app for early language learners. Colorful drawings or photos are presented in three categories: Common Verbs, Contrast Words like over/under and Animals. Listen and learn the vocabulary word, or imitate the speech model. The app provides a model for step-by-step transition to full sentences.

WordComplete (Innovation Management Group, Inc.)
Innovation Management Group, Inc.
Price: $99.95 - $3500
Special Skill: language development, vocational, adapted keyboard/switch access
Disability: learning, physical
Skill Level: elementary, secondary, adult
Operating System: Windows
WordComplete adaptively predicts the word you are entering and gives you choices from it's dictionary. Dictionary comes with a basic list, then adds new words as you type them. You can import or create multiple dictionaries to suit your needs. Sorts alphabetical and often used. Windows 2000 thru Windows 10

WordComplete (RJ Cooper and Associates)
RJ Cooper and Associates
Price: $59
Special Skill: communication
Disability: learning, physical, speech
Skill Level: elementary, secondary, adult
Operating System: Windows

Utility that provides candidates for completing words within any software. Choices can be spoken for preview and are presented inline with the insertion point. Customizable word list. Great for slow typists, emerging literacy, LD and Down Syndrome.

WordQ for Chrome
Quillsoft Ltd.
Price: $119
Special Skill: basic living skills, communication, language development, speech output, voice recognition
Disability: cognitive, hearing, learning, speech
Skill Level: elementary, secondary, adult
Operating System: Chrome
The WordQ experience in the Chrome OS/Browser. This easy-to-install and simple-to-use web app lets you read, write, and manipulate documents and PDFs, all in a controlled area linked to your Google account. Featuring state-of-the-art word prediction, text-to-speech capability, simple speech recognition and lots more. Please contact sales@quillsoft.ca for further information.

WordQ Standard/Pro for Desktops
Quillsoft Ltd.
Price: $119 - $149
Special Skill: communication, language development, vocational, speech output, voice recognition
Disability: learning, physical, speech
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac
WordQ Standard/Pro is a writing skill improvement and compensation tool that works on top of any Windows or MacOS application where you write, both online and offline. Both post-secondary students and professionals can benefit from it, including English Language Learners (ELL), Second Language Learners, and anyone with barriers to literacy.

Workplace Readiness
The Conover Company
Price: $5 - $25
Special Skill: basic living skills, cognitive redevelopment, communication, vocational, adapted keyboard/switch access, large print, single switch, speech output, IEP/IPP
Disability: cognitive, hearing, learning, physical, speech, vision
Skill Level: elementary, secondary, adult
Operating System: Windows, Mac, iOS (Apple), Android, Chrome, Other
Workplace Readiness helps users to acquire the critical soft skills they need to achieve success. With soft skills such as a positive attitude, communication, critical thinking, teamwork and interpersonal skills, this system is a must for building success skills for school, workplace and life in general.Please visit https://www.conovercompany.com/conover-online/workplace-readiness/ for more information.A new version of Workplace Readiness for lower functioning individuals was recently added for intellectually developmentally disabled (IDD).

Writing Therapy
Tactus Therapy Solutions
Price: $24.99
Special Skill: cognitive redevelopment, communication, language development
Disability: cognitive, learning, speech
Skill Level: preschool, elementary, secondary, adult
Operating System: iOS (Apple), Android
Build independence as you improve your spelling skills with engaging exercises to help you relearn to write single words. Free trial available.

OTHER AT

10 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $754.99
Disability: physical
The Advantage Tri-Fold Folding Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

2-Point Padded Hip Belt
Bodypoint Inc.
Price: $60 - $129
Disability: physical
Highest quality materials and advanced design details make Bodypoint belts the top choice of therapists and wheelchair users around the world. Our padded hip belt with two points of attachment is built for maximum functionality, durability, and all-day user comfort. Three pull styles and five buckle styles accommodate individual needs. Machine wash and dry.

4 Switch Proximity Tray Array
Adaptive Switch Laboratories, Inc.
Price: $4480 - $5316
Disability: physical
The ASL 106 offers four proximity sensors that allow the driver to operate a power wheelchair. These sensors can be positioned inside a tray or at any available switch site. It was designed for those who have problems maintaining a switch that requires pressure or contact.

4-Point Padded Hip Belt
Bodypoint Inc.
Price: $82 - $167
Disability: physical
Four points of attachment on this belt ensure the pelvis stays in an aligned, stable position, secure against the wheelchair seat and back supports. Primary straps position the belt while secondary straps anchor it into position. Bodypoint's high quality materials and design details ensure maximum functionality, durability, and all-day comfort. Three pull styles and five buckle styles accommodate individual needs. Machine wash and dry.

5 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $324.99
Disability: physical
The Advantage Tri-Fold Folding Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2

pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

5 Little Men in a Flying Saucer with BSL Signs Kindle
Co-Sign Communications (inc DeafBooks. co.uk)
Price: $3.24
Disability: cognitive, hearing, learning, speech
Available from amazon.com Thirty-five pages in fixed page landscape format to keep the relevant text with the signs. Part of a series to promote essential early learning skills. Well-loved counting Nursery Rhyme with signs to enjoy with your child. Double-tap the sign graphics for pop-up text describing the movements.

6 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $249.95
Disability: physical
The Advantage Tri-Fold Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

6610 CHEST SUPPORT
Danmar Products, Inc.
Price: $150
Disability: cognitive, physical
A core of moldable material surrounded in soft foam provides a comfortable chest support that can form to follow body contours. There are strap attachments on the Yokes for wheelchairs, travel chairs and strollers, and the lap belt has pivot mounts for optimal adjustability.

6611 CLEAR CHEST SUPPORT
Danmar Products, Inc.
Price: $130
Disability: cognitive, physical
Flexible yet durable, this easy-to-use design has no bulky hardware and is hardly noticeable! It offers positioning for individuals who benefit from having their upper body stabilized and hips held at a proper angle. It can be used with most standard, high back or custom wheelchairs and strollers.

6615 SPLIT CLEAR CHEST SUPPORT
Danmar Products, Inc.
Price: $130
Disability: cognitive, physical
This flexible yet durable anterior support provides a firm fit, and is designed to be easy on and off. It can be adjusted for seasonal clothing changes and growth. Made of heavy duty 1/8" thick clear PVC vinyl, it

will last much longer than harnesses made of fabric.

6620 MODULAR CHEST SUPPORT
Danmar Products, Inc.
Price: $195
Disability: cognitive, physical
We have surrounded a core of moldable material with soft foam to create a chest support that is comfortable and can be formed to follow body contours. The yoke arms and lap belt pivot, allowing for tailored adjustments for ultimate comfort.

6626 TRUNK SUPPORT SYSTEM
Danmar Products, Inc.
Price: $150
Disability: cognitive, physical
Designed for use in a wheelchair or custom seating system, this system provides firm support by using an inner core of molded nylon, with a vinyl-coated soft form cover for comfort and ease of cleaning, and can be permanently mounted to the back of a chair.

6760 UTENSIL HANDLES
Danmar Products, Inc.
Price: $23
Disability: cognitive, learning, physical
Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. Specially contoured sections fit into the hand and have a slide-buckle strap that can be easily adjusted for fit. Available in Blue, Orange or Red and sizes Small or Large.

6762 THERAPY HANDLES
Danmar Products, Inc.
Price: $26
Disability: cognitive, learning, physical
Versatile and comfortable, these handles will hold eating utensils, personal hygiene items, activity brushes and crayons. They come with a 1" foam extension to position the thumb and help with grip. Utensils can be placed in the end of the handle or in the thumb extension.

6763 HANDY HELPERS
Danmar Products, Inc.
Price: $9.94
Disability: cognitive, learning, physical
This simple, snap-on device allows a person to self-feed. It's easy to use, soft and comfortable, and comes with a spoon as shown. The vinyl-coated foam is easy to clean with warm soapy water.

6764 KNOB HOLDER
Danmar Products, Inc.
Price: $13
Disability: cognitive, learning, physical
This attachment fits into the end of the Utensil or Therapy Handle, and is used to

positioning a writing instrument. Using this holder makes a pen or pencil's angle adjustable, which makes writing easier. and, no matter what position the hand is in, the user can see what is being drawn or written.

6766 TOY HOLDER
Danmar Products, Inc.
Price: $17
Disability: cognitive, learning, physical
This simple, snap on device allows an individual to interact with a small toy placed in his/her hands. Velcro bands are used to hold a toy in place, while webbing attaches around the palm or wrist. It can be adjusted to fit any size. Sold as a pair.

6767-A COMBO UTENSIL HANDLE and KNOB HOLDER
Danmar Products, Inc.
Price: $39
Disability: cognitive, learning, physical
This all-in-one tool combines the Utensil Handle (#6760) and the Knob Holder (#6764) with Anchor Strap.

6767-B COMBO THERAPY HANDLE AND KNOB HOLDER
Danmar Products, Inc.
Price: $42
Disability: cognitive, learning, physical
This all-in-one tool combines the Therapy Handle (#6762) and the Knob Holder (#6764) and Anchor Strap.

6770 MIBOWL HOLDER
Danmar Products, Inc.
Price: $45
Disability: cognitive, learning, physical
This new design makes self-feeding easier than ever! Suction cups hold our foam bowl holder in place, preventing movement around the table. Use with our Handy Helpers (6763) for even more eating independence. The bowl is included and our vinyl-coated foam is easily cleaned with warm soapy water.

6771 MIPLATE HOLDER
Danmar Products, Inc.
Price: $45
Disability: cognitive, learning, physical
This new design uses suction cups to hold the plate in place, preventing movement around the table, making self-feeding easier than ever! Use with our Handy Helpers (6763) for even more eating independence. Our vinyl-coated foam is easily cleaned with warm soapy water.

6775 MITABLE TOPPER
Danmar Products, Inc.
Price: $55
Disability: cognitive, learning, physical
This soft foam table topper makes hard surfaces safer than ever, protecting heads and hands from making contact while also protecting table surfaces during art activi-

ties. The foam is vinyl-coated and easy to clean with warm soapy water.

6780 MITABLE TOPPER KIT
Danmar Products, Inc.
Price: $99
Disability: cognitive, learning, physical
Comes complete with Table Topper Pad, Bowl or Plate Holder, and Handy Helper with spoon. The suction cups on the Bowl or Plate Holder sticks right to the Table Topper Pad and will not move. All components are vinyl-coated and easy to clean with warm soapy water.

6785 MIMITTS
Danmar Products, Inc.
Price: $105
Disability: cognitive, physical
Our all-foam mitts are specially designed to help absorb and deflect the impact when an individual strikes out. They can be applied and secured quickly with Velcro straps, protecting both the wearer from injuring themselves as well as possibly injuring person(s) nearby; clean with warm soapy water.

6809 HENSINGER WITH HIGH BACK
Danmar Products, Inc.
Price: $130
Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, this soft but supportive foam collar braces the head by supporting the occiput and jawline, and is 1" taller in the back. Helping to maintain mid-line head positioning results in improved breathing, swallowing and simplified feeding and aids with social interaction and awareness.

6810 HENSINGER HEAD SUPPORT
Danmar Products, Inc.
Price: $125
Disability: cognitive, learning, physical, speech, vision
Revolutionary in the world of cervical collars, the soft yet supportive foam is designed to brace the head by the jawline. It can be used with a chest support or mounted to a permanent seating system.

6815 HENSINGER HEAD SUPPORT WITH MOUNT BAR
Danmar Products, Inc.
Price: $152
Disability: cognitive, learning, physical, speech, vision
Social interactions and learning skills may be achieved more easily if the head is comfortably positioned while using feeder seats. The preformed bar has a Hensinger Head Support (6810 or 6809) attached. Specify size of feeder seat and Hensinger when ordering.

6826 ANTERIOR HEAD SUPPORT
Danmar Products, Inc.
Price: $126
Disability: cognitive, learning, physical, speech, vision
Help to combat chin drop with this head support which provides firm yet gentle lifting of the chin, and lateral support of the head. There is a padded roll around the rear strap for a comfortable finish.

6828 SIDE-OPENING HEAD SUPPORT
Danmar Products, Inc.
Price: $145
Disability: cognitive, physical, speech, vision
Secure, soft and very supportive, this head support opens on the side for easy on/off. It provides firm yet gently lifting of the chin, as well as lateral and occipital support of the head. The vinyl coating is easily cleaned with warm soapy water.

6833 SWIRL COLLAR
Danmar Products, Inc.
Price: $69
Disability: cognitive, learning, physical, speech, vision
This swirl of soft foam wraps around the neck and has an adjustable Velcro closure in the rear, which makes fitting a breeze and encourages easy movement from side-to-side. Used for minor to moderate support, the Swirl can be used with any seating system and by individuals who are ambulatory.

6855 SOFT DEFLECTOR
Danmar Products, Inc.
Price: $100
Disability: learning, physical, vision
This small, lightweight and discreet toileting aid can attach to any toilet seat; snap on the front or clamp to the rim. The vinyl-coated foam is easy to clean with warm soapy water, and fits onto our Toilet Seat Cover with Reducer Ring (#6850).

6856 PERSONAL DEFLECTOR
Danmar Products, Inc.
Price: $108
Disability: physical
For standard deflectors that are too bulky and make toileting difficult, our personal deflector with a flexible preformed waistband, holds our soft deflector in place. Can be adjusted up and down, as well as side-to-side, and is easily cleaned with warm soapy water.

6858 PRIVACY APRON
Danmar Products, Inc.
Price: $120
Disability: cognitive, learning, physical
Made to fit both open front and round styles of standard toilet seats (and our #6850 Toilet Seat Cover with Reducer

Ring), this toileting aid can be mounted using a bracket or clamped onto the rim. Our germ resistant, vinyl-coated foam is easy to clean with warm soapy water.

6860 CHANGING STATION KIT
Danmar Products, Inc.
Price: $164.95
Disability: cognitive, hearing, learning, physical
Our germ resistant, vinyl-covered foam is soft and easy to clean using warm soapy water. Soft and cushiony, the pad and forehead/chin rest add comfort while the J-Clips hold everything in place. Contains Changing Pad, Chin/Forehead Rest and J-Clips.

7 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $433.99
Disability: physical
The Advantage Tri-Fold Portable Wheelchair Ramp from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8 Foot TriFold Portable Wheelchair Ramp
Express Ramps
Price: $549.99
Disability: physical
The Advantage Tri-Fold Folding Wheelchair Ramps from EZ-Access offers the length required for wheelchairs and scooters to access mini and full-size vans, go up a number of steps, or raised landings. Advantage Tri-Fold Ramps split into 2 pieces, have anti-slip coatings, and feature bottom transition plates that make loading a breeze.

8720 DELTA SWIM SYSTEM
Danmar Products, Inc.
Price: $120
Disability: cognitive, hearing, learning, physical
This component system is designed to aid in progressive swimming development, perfect for ambulatory individuals with postural balance and arm control. As swimming skills improve, pads can be removed to help achieve independence.

8721 PAD PLUS
Danmar Products, Inc.
Price: $45
Disability: cognitive, hearing, learning, physical
Offered to modify the Delta Swim System (#8720) and the Tri-Swim (#8728), the Pad Plus may be attached to the front section

to add buoyancy and raise the body position in the water.

8723 SECTIONAL RAFT
Danmar Products, Inc.
Price: $240
Disability: cognitive, hearing, learning, physical
For individuals who are insecure in the water or non-ambulatory, the Sectional Raft supports and cradles the body, while allowing water to flow around the body, enabling interaction with the environment and helping to reduce anxiety.

8724 SWIM RINGS
Danmar Products, Inc.
Price: $87
Disability: cognitive, hearing, learning, physical
Create your own personal flotation device with these versatile rings! Sets may be snapped together for neck, chest, torso, or body support, and the individual rings can be added or removed to adjust for comfort, and to increase or decrease flotation.

8725 HEAD FLOAT
Danmar Products, Inc.
Price: $105
Disability: cognitive, hearing, learning, physical
Independence for everyone- there is no need to support the head manually, and hands are free! Superb cushioning allows the head to rest without pressure on the spinal column, which encourages neutral positioning.

8727 DOLPHIN FLOAT SYSTEM
Danmar Products, Inc.
Price: $172
Disability: cognitive, hearing, learning, physical
Designed for physically involved individuals who have head/neck control, but may need to compensate for uneven weight. Using the side pads helps minimize a user's tendency toward lateral rotation, and the front chest pad provides additional lift and is removeable.

8729 STABILIZER BAR
Danmar Products, Inc.
Price: $120
Disability: cognitive, hearing, learning, physical
Helps maintain balance and equilibrium during walking/gaiting pool exercises. It is also great for resting on or extending out in front for kicking drills, as well as workouts for individuals with mild arthritis. The amount of flotation can be adjusted by adding or removing rings.

8730 COMFORT MAT
Danmar Products, Inc.
Price: $160
Disability: cognitive, learning, physical

143

Designed for use in the many situations where foam padding would be welcome. Place at the pool's edge to ease entry/exit. In the locker room, they insulate against the cold tile floors, and provide changing comfort. They make a great flotation raft too.

8735 HEAD FLOAT and STABILIZER BAR
Danmar Products, Inc.
Price: $200
Disability: cognitive, hearing, learning, physical
This combination helps keep the face out of the water, and works well not only for swimmers with Athiod CP but also for those who roll sideways and backwards. Now they can stretch and turn their heads when interacting with others without tipping or rolling.

9708 SOFT COMFY CAP
Danmar Products, Inc.
Price: $96
Disability: cognitive, hearing, learning, physical, speech, vision
Our lightest, coolest helmet yet! This stylish, head-hugging design made of compression-molded foam offers a uniquely comfortable fit, weighing only 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm, soapy water.

9709 Hard Top Comfy Cap
Danmar Products, Inc.
Price: $131
Disability: cognitive, hearing, learning, physical, speech, vision
Our lightest, coolest Hard Shell Helmet yet! This 11.5 ounce helmet is made of a compression-molded inner foam liner attached to a hard plastic exterior. The stylish design is extremely well-ventilated and retains limited body heat. It's easy to clean, using warm soapy water.

9817 HALO HELMET
Danmar Products, Inc.
Price: $174
Disability: cognitive, hearing, learning, physical, speech, vision
Ideal for individuals who do not need full head coverage. A band of 5-8" soft, vinyl-coated foam surrounds the head at the forehead level, and extends down to cover the temporal and occipital areas. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9820 SOFT SHELL HELMET
Danmar Products, Inc.
Price: $123
Disability: cognitive, hearing, learning, physical, speech, vision
This lightweight helmet is constructed out of 1/2" thick shock-absorbing foam and is fully ventilated without compromising head coverage. It's vinyl-coated with our

Fabricoat which does not allow for bacteria growth, and is easy to clean with warm soapy water. Average weight is 8 ounces.

9821 HARD SHELL HELMET
Danmar Products, Inc.
Price: $160
Disability: cognitive, hearing, learning, physical, speech, vision
This headgear is both comfortable and effective in reducing the risk of injury. A strong polyethylene shell covers a shock-absorbing foam liner which is vinyl-coated and easy to clean with warm soapy water. It allows for ventilation without compromising head coverage. Average weight is 17 ounces.

9822 HARD SHELL HELMET WITH FACE GUARD
Danmar Products, Inc.
Price: $260
Disability: cognitive, hearing, learning, physical, speech, vision
This protective helmet features a shock-absorbent foam liner which is riveted to a strong polyethylene outer shell. A clear polycarbonate face guard is attached to the outer hard shell. There is an eye opening for an unobstructed view and a mouth opening for maximum ventilation. Weight averages 25 ounces.

9823 CHIN GUARD
Danmar Products, Inc.
Price: $50
Disability: cognitive, hearing, learning, physical, speech, vision
This 1/2" thick foam guard fits comfortably over the chin area and can be worn with every helmet except for the 9822 Hard Shell Helmet with Face Guard. It is soft yet shock-absorbent and easily cleaned with warm soapy water. Weight averages 1.5 ounces.

9824 HARD SHELL HELMET WITH FACE BAR
Danmar Products, Inc.
Price: $208
Disability: cognitive, hearing, learning, physical, speech, vision
A clear 2" wide polycarbonate bar is securely attached to our 9821 Hard Shell Helmet so that it can't move, to reduce the risk of injury to the facial area. The shock absorbent foam liner is vinyl-coated and the entire helmet is easy to clean with warm soapy water. Weight averages 21 ounces.

9825 DELUXE HARD SHELL HELMET
Danmar Products, Inc.
Price: $171
Disability: cognitive, hearing, learning, physical, speech, vision
This sporty version of our 9821 Hard Shell Helmet adds a decorative visor and rubber chin cup, adding style and flair.

Our shock-absorbent foam is riveted to a strong, polyethylene outer hard shell, allowing ventilation without compromising head coverage. Easily cleaned with warm soapy water. Weight averages 18 ounces.

9829 FULL COVERAGE HELMET
Danmar Products, Inc.
Price: $152
Disability: cognitive, hearing, learning, physical, speech, vision
This lightweight helmet is constructed out of 5-8" vinyl-coated foam and covers more of the temporal and cheek areas, as well as the area around the ears and nape of the neck. It's easy to clean with warm soapy water. Average weight is 10 ounces.

9830 CLEAR HELMET
Danmar Products, Inc.
Price: $220
Disability: cognitive, hearing, learning, physical, speech, vision
This clear polycarbonate helmet is well-ventilated and edged with soft foam. We include 8 moveable pads that can be used to adjust the sizing and elevate specific areas of the helmet away from wound sites. It is easily cleaned with warm soapy water.

9836 NEWBORN CAP
Danmar Products, Inc.
Price: $83
Disability: cognitive, hearing, learning, physical, speech, vision
This ultra-lightweight helmet is made from soft, 3/8" shock-absorbent foam and is fully ventilated. It's coated in vinyl so it's easy to clean with warm soapy water. A soft chinstrap holds the cap in place, and the ribbon on the front allows for moderate growth.

9910 SOFT COMFY CAP WITH DESIGN
Danmar Products, Inc.
Price: $142
Disability: cognitive, hearing, learning, physical, speech, vision
Our lightest, coolest helmet yet! This stylish head-hugging design of compression-molded foam offers a uniquely comfortable fit, and weighs just 3 ounces. It provides maximum ventilation and retains limited body heat, and is easy to clean with warm soapy water. Choose from Butterfly or Camouflage design.

Adapted Classics
Attainment Company, Inc.
Price: $129
Disability: cognitive, learning, physical, speech

Adapted Classics is an English language arts curriculum that covers grade-level content through four literary classics- The Strange Case of Dr. Jekyll and Mr. Hyde, Treasure Island, The Story of My Life, and The Hobbit. Each classic introduces a unique genre of literature: mystery, adventure, biography, and fantasy. Each title in the series includes an adapted student version of the classic presented in four distinct levels-A, 1, 2, and 3- to differentiate instruction.

Adapted Game Bundle for ALL Abilities and More
Fine Motor Boot Camp
Price: $5 - $20
Disability: cognitive, learning, physical, speech

Look no further for simple ways to increase communication, access and participation for your students. Here you will learn ways to teach, adapt, and modify everyday games/ activities to better meet your students' needs. We LOVE games! Why...because they are age appropriate, educational (math, matching, etc.), routine based, repetitive, social, rich in core vocabulary and most importantly...FUN! Here is a large bundle of 17 adapted games with related visual supports for those individuals with varying abilities. Instruction sheets include suggested adapted material ideas, core vocabulary targets, and access methods (direct select, eye gaze, 1-switch scanning, 2-switch scanning and active response mode). We also have video links on the "how to play" for each access method too! https://vimeo.com/user47909135

(at acsw.com) or Adaptworld, Inc. at (adaptworld.com) and search all seven ADLS databases for information about assistive devices for specific functional needs.

Adjustable 9.7/10.5 iPad Cradle
Adaptive Tech Solutions
Price: $79.34
Disability: learning, speech, vision

The Adjustable iPad Cradle gives you the ability to mount your iPad to our mounting systems or any other mounting system that accepts a 1/4-20 male thread. It's durable, easy-to-use, and compatible with a variety of different iPad cases that are within the size dimensions shown below. This includes the iPad 9.7, 10.2, and 10.5 line of products. It is compatible with our iPad Mini and the 9.5 series of Rugged Rubber iPad Cases.

Adjustable Touch Screen Mouth Stylus
Enabling Devices
Price: $219.95
Disability: cognitive, hearing, learning, physical, speech, vision

Its telescoping stainless steel shaft easily adjusts from 8.5-inch to 15-inch. The plastic bite plate with rubber sleeves allows the user to firmly yet comfortably hold the stylus. Comes with an extra pair of protective thermoplastic rubber sleeves for the bite plate.

Adjustable Touch Screen Stylus
Enabling Devices
Price: $94.95
Disability: cognitive, hearing, learning, physical, speech, vision

Choose your length. The adjustable stylus with Velcro straps will fit any hand and any positioning. Just adjust the length of the stylus and use on touch screen surfaces including smart phones, iPads and Android tablets Replaceable tips available separately.

Adult Wheely Cape
Abram's Nation
Price: $249.29
Disability: physical

The Abram's Nation Wheely Cape is uniquely designed to address the issues special needs customers have with ordinary rain and winter coats. Ideal for motorized scooter and wheelchair users. OUR DESIGN: Curved Front Profile has less material over the wheels and more coverage in the front and back. Split Wing Back protects wearer from the elements and provides easier access to chair handles, backpacks and medical equipment. Front Pocket with optional access port to accommodate personal or medical items. Removable Hood on adult sizes for ease of use and customization. Always water-resistant and breathable! MATERIALS: Outer shell: mid-weight nylon Taslan, Inner shell: Polartec(r) Fleece Layer (in black)

Aeromesh® Calf Panel
Bodypoint Inc.
Price: $96 - $108
Disability: physical

Bodypoint® Calf Panels keep feet safely and comfortably on wheelchair foot plates. Wide strap distributes pressure across a broad calf region, especially useful for those in tilt or reclined position. Smooth, porous Aeromesh® fabric provides air circulation and comfort while a stiffener layer maintains panel shape, eliminating folding and buckling.

Aeromesh® Calf Strap
Bodypoint Inc.
Price: $73 - $85
Disability: physical

Bodypoint® Calf Straps keep feet safely and comfortably on wheelchair foot plates. A two-layer design blends comfort and function, and keeps feet from falling without bruising skin. Smooth, porous Aeromesh® fabric against the legs provides air circulation and comfort while a stiffener layer maintains its shape, eliminating folding and buckling.

Aeromesh® Rapid-Dry Bath Belts
Bodypoint Inc.
Price: $89 - $107

Disability: physical

Bodypoint Bath Belts can be worn across the chest, abdomen, hips or legs to stabilize position while bathing or in the pool. Unique Aeromesh® fabric allows water, soap, dirt and air to pass through freely while protecting skin and promoting hygiene. Three length-adjustable styles are compatible with most major shower chair brands.

Aeromesh® Shower Chair Calf Support
Bodypoint Inc.
Price: $70
Disability: physical

A calf strap designed specifically for shower chairs! Silky, porous Aeromesh® material is soft on skin while allowing soapy water, dirt and air to pass through. Attaches to all major models using sewn-in clips; no hardware required. The 4" height supports legs but does not interfere with chair operation.

Aira
Aira
Price: $89 - $199
Disability: vision

Aira develops assistive technology that connects the blind with certified agents via smart glasses and a dashboard that allows agents to see what the blind person sees real time. Agents help users accomplish a range of tasks from navigating streets, recognizing faces, and traveling the world. Prices are per month.

ALCOT: Autism and Low Incidence Classroom Observation Tool
Attainment Company, Inc.
Price: $99 - $249
Disability: cognitive, learning, physical, speech

ALCOT addresses six essential classroom traits with measurable outcomes. It's an easy-to-use, one page tool for teacher and administrator collaboration. TheAssessment Plus iPad App complements the printed versions with digitizing capability.

All-round Joystick (Light)
mo-Vis
Price: $1347
Disability: physical

The compact version of a standard electronics wheelchair joystick module. Developed for all-round use, it is suitable for the major part of power wheelchair users. In case of the Light version, those users might have lost some muscular force or mobility.

All-Turn-It Spinner
AbleNet, Inc.
Price: $145
Disability: cognitive, learning, physical, speech

The switch activated All-Turn-It Spinner, with a built-in external switch jack, enables random selections for choosing groups or playing games of chance like Bingo. Also a fun alternative to rolling dice. Requires two C batteries (not included) WARNING: CHOKING HAZARD-Small parts. Not for children under 3 years.

Alphabet Spelling Letter Board | AAC
Say it with Symbols AAC
Price: $9.94
Disability: cognitive, hearing, learning, physical, speech
An Amazon best seller! This alphabet letter board provides a much needed, easy to use communication option for patients who cannot speak due to stroke, intubation, neurological disorders or language barriers. Ideal for use by patients, nurses, therapists, health care staff and caregivers who care for people who are not able to express themselves verbally temporarily or longer term. Our alphabetical letter board offers large letters and numbers so patients can easily point to letters to spell out their needs and answer yes/no questions. Sheet size is 8.5" x 11", printed on heavy card stock and laminated for increased durability and re-use by the same patient. Back side is blank and can be used for writing messages with the dry-erase marker included. Sold in sets of 2 laminated boards with a marker on SayitwithSymbols.com and www.amazon.com/sayitwithsymbols.

Amigo 8"
Enhanced Vision
Price: $1400
Disability: vision
Amigo 8" makes undetectable text visible again by enhancing the contrast of similar colors and providing sharper, clearer, and more defined images. Offering two high-definition cameras for desktop and distance magnification and viewing. Read price tags, menus, labels, street signs, and more, anywhere!

AngelSense
AngelSense
Price: $44.99 - $64.98
Disability: cognitive, learning
AngelSense is an AI-powered assistive technology providing maximum safety and enhanced independence for individuals with autism, special needs, and dementia. AngelSense includes a wearable GPS device or watch with an assistive speakerphone, a user-friendly app for multiple caregivers (parents, family members, teachers, therapists, law enforcement) and personal user support by special needs parents. AngelSense empowers individuals and families who struggle to cope with

safety concerns associated with: Wandering and/or Elopement School and Public Transportation. Autonomous Activity or Extended Independence. Mistreatment and/or Bullying and provides features and tools for effective remote support. AngelSense services include knowledgeable customer support by parents of special needs individuals, who are also expert users; delivering professional support with caring and understanding. In addition, AngelSense has a dedicated team to provide support to agencies, organizations and schools making processing, compliance requests and billing smooth and easy.

Animal Number Quiz download
Co-Sign Communications (inc DeafBooks.co.uk)
Price: $1.99
Disability: cognitive, hearing, learning, speech
British Sign Language (BSL) resource for individuals or small groups. Count the animals and click on the number to find out if correct or return you to the right place. Great on interactive whiteboard. Sign and word graphics.

Ankle Huggers®
Bodypoint Inc.
Price: $138 - $146
Disability: physical
The original, patented solution for wheelchair users to stabilize the lower legs without immobilizing the feet. They reduce joint stress by holding at the ankle, and improve safety, comfort and tolerance for sitting. Current design features variable zones of flex and a low-profile buckle plus easy hook-and-loop adjustments to get the right fit every time. Includes Footman Loop Kit for mounting to footplates and detachable Pull Loops to make buckle release easier.

APP Multisensorial Standing
ORMESA srl
Disability: cognitive, hearing, learning, physical, speech, vision
The APP Multisensorial Standing is a vertical stander for children with special needs designed by Ormesa to make therapy more enjoyable and engaging, thanks to an extraordinary multi-sensory experience. How? Through the propagation of vibrations, induced by an audio source via the frame and the restraint components. The use of this aid facilitates the dynamic and interactive participation of the child during rehabilitation aimed at: Reinforcing the standing position. Improving interaction with the environment Stimulating cognitive ocular-manual abilities

ASL - SIGN and SPELL - INTERACTIVE ALPHABET, SIGN AND PICTURE WALL FRIEZE
Co-Sign Communications (inc DeafBooks.co.uk)
Price: $5
Disability: hearing, learning, speech
ASL - SIGN and SPELL - ALPHABET - SIGN AND PICTURE WALL FRIEZE. This is a fabulous resource for children learning American Sign Language (ASL) to support communication and language development. Colorful and eye-catching pages also makes a lovely Wall Frieze with the 26 letters of the alphabet, one letter per sheet, plain and simple - upper and lower case, with picture, sign with written description and the fingerspelled letter. A great activity for individual or small group work on a whiteboard - USE ON SCREEN or PRINT AS A BOOK or wall-frieze. On screen you can take turns to choose a letter in the Fingerspelling Chart and click on the letter to go to the full page for each letter, then click in that page to return to the Fingerspelling Chart. Ideal for deaf children and children with additional speech and language needs and their families learning ASL together. Designed to promote essential early learning for young children and help to foster an inclusive environment.

ASL Family and Relationships Signs: American Sign Language (ASL) (LET'S SIGN ASL)

The ASL 104 ATOM Electronic Head Array system has combined electronics within the head array for ease of access to the switch ports. With a touch of a switch, the Atom Electronic Head Array can be used as a wireless switch interface for computer access or AAC devices.

AUSLAN QUESTION SIGNS with descriptions (Australian Sign Language)
Co-Sign Communications (inc DeafBooks. co.uk)
Price: $3.50
Disability: cognitive, hearing, learning, speech
Signs for Question - part of a series of bite-sized topics of Australian Sign Language (Auslan) vocabulary to promote essential early learning for young children, their families and carers. Auslan is a language in its own right and Auslan's sign vocabulary is also used in Sign Supported English (SSE) where signs are used with spoken language to support communication and language development such as Key Word Signs in the field of Special Educational Needs (SEN) and Baby Signing. Contains Handshape Key and Left and Right-Handed Fingerspelling Alphabets. Signs for: Answer, Reply/Response, Ask/Request, How, How are you? How many?, How much?/Price/Cost, How old?/Age, Question, What? What time? When? Where? Which?/Either, Who? (x2)/Someone, Why?/Because, Why? This resource contains sign vocabulary in flashcard format rather than phrases or examples of BSL Question forms. The signs included enable the construction of questions in both Sign Supported English (SSE) and Auslan. Auslan grammar and structures are best learned through face-to-face contact with Deaf sign language users.

Baby Einstein Take Along Tunes
Adaptive Tech Solutions
Price: $43.68
Disability: physical
Our Baby Einstein Take Along Tunes Musical switch adapted toy engages users with colorful lights that dance across the screen to the beat of each song. This fun toy has 7 high quality classical melodies by Mozart, Vivaldi, Chopin, and Rossini that are played each time the switch is pressed and released. The fun, crisp sounds and dancing lights promote visual attention, teach cause and effect learning and serve as a great stimulus for individuals with vi-

sual impairments such as CVI. Has volume control and a handle for easy carrying.

Baby Shark Let's Go Hunt! Game
Adaptive Tech Solutions
Price: $41.01
Disability: physical
Let's go hunting with the Baby Shark and the whole family! Baby Shark will even tell you who to hunt for. Baby shark will sing the famous Baby Shark song to tell you which card you need to find. Try to find the adorable members of the Baby Shark family-Mommy Shark, Daddy Shark, Grandma Shark, Grandpa Shark, and, of course, Baby Shark. To win, be the first player to collect three sets of four matching cards. No reading required. Recommended for two to four players, ages three and up. Accepts a standard 3.5mm switch.

Ball Chairs
Therapy Shoppe® Incorporated
Price: $30.99
Disability: cognitive, learning, physical
Balls Chairs are balls with tiny feet that make a great classroom seat; they help kids (and adults) get their wiggles out by encouraging subtle bouncing/rocking movements without getting up from their seats! These seats naturally help facilitate paying attention, sitting up straighter, and strengthening back muscles. Nice for classrooms and the office as the little feet are designed to keep ball chairs from rolling away when they aren't in use. *Please note the manufacturer and colors have changed for some sizes of our Chair Balls (as Fitball Ball Chairs are no longer being made).

Big Beamer Transmitter
AbleNet, Inc.
Price: $145
Disability: cognitive, learning, physical
Big Beamer Wireless Transmitter brings reliable, immediate switch access without the hassle of cords. Multiple Big Beamers can be used in the same room at the same time, from as far away as 30-feet, without interference.

Big Button
Attainment Company, Inc.
Price: $59
Disability: cognitive, learning, physical, speech
Easy-touch activation is a bonus on this single message output device. Press to play single message or change settings to have three messages available. Access these messages with a tap once, tap twice, and tap three times. Big sound. 5 3/4-inches across, includes two AAA batteries.

Big Button with Steps and Levels
Attainment Company, Inc.

Price: $99
Disability: cognitive, learning, physical, speech
This easy-touch voice output device offers two modes: Steps and Levels. Steps mode=up to three activities each with up to 10 recorded steps. Levels mode=up to ten individual messages. Device will stay on level (message) until you change the level. Big Sound. 5 3/4-inches across and two AAA batteries included.

BIG Candy Corn Switch
AbleNet, Inc.
Price: $255
Disability: cognitive, learning, physical, speech
The BIG Candy Corn accessibility switch uses highly-sensitive proximity sensor technology for activation. Any time the user is near or touching the activation surface, the BIG Candy Corn accessibility switch will activate. Individuals with fine motor impairments or low vision prefer the BIG Candy Corn over the LITTLE Candy Corn accessibility switch because it has an activation surface nearly two times the size. When activated, an auditory beep and light appear. You may turn off the auditory beep and light if the user does not need these prompts. Includes ableCARE on-demand support. Built ableSTRONG to endure drops and other environmental conditions. Made from ableSAFE materials and tested by third-party safety labs

Big Grips cases and stands for iPad
Big Grips
Price: $14.95 - $39.95
Disability: learning, physical, speech, vision

The areas included in the curriculum are: Life Skills, Academic Skills, Vocational Skills, Special Education, and Early Learning/Parenting. The materials provided include: duplicatable books, lesson plans, pre/post assessment, teacher's guides, certificates of achievement, and alignments. Visit our webpage: www.PhillipRoy.com

Bodypoint Mobility Bag
Bodypoint Inc.
Price: $69
Disability: physical
The Bodypoint® Mobility bag keeps necessities secure and out of sight, yet fully accessible. Attach and remove effortlessly from the front or side of the wheelchair using the removable plastic seat clip or hook-and-loop style tabs. Thoughtful details include reverse zippers that help you identify compartments by touch, and a bright orange interior that makes it easy to locate your items.

Bongo Drums Lights and Sounds
Adaptive Tech Solutions
Price: $59.78
Disability: physical
These awesome Bongo Drums feature vibrant lights and fun music. They have been switch adapted to accept a standard 1/8" (3.5mm) switch. But they also can be played with by able-bodied peers by pressing the buttons. Press and release your switch to start a song, press and release the switch again to change to another song. Automatically goes off after a few minutes without any interaction from the user. Great for visual and auditory stimulation but also teaches more advanced cause-effect and encourages movement. May not be suitable for individuals who are prone to seizure activity. Has 2 volumes.

Boppin Beaver
Adaptive Tech Solutions
Price: $42.54
Disability: physical
Boppin' Beaver Linkimal has bright lights and 25+ songs, sounds and phrases teach shapes, counting and colors while stimulating visual and auditory senses. Press and release your switch (or push the beaver's head) to start the action. Press it again to move forward to the next activity. Measuring just 6" tall x 4" wide, this toy is a great portable take along!

Braillabels
American Thermoform Corporation
Price: $39.99 - $349.99
Disability: vision
Our single sheet, adhesive backed labeling material designed for use with Perkins Braillers and other embossing devices. Braille is embossed onto these labels and can then be cut to size and will adhere to any smooth surface (plastic, metal, wood, etc.).

Caregiver Cue Cards | AT
Say it with Symbols AAC
Price: $35
Disability: cognitive, hearing, learning, physical, speech
Caregiver Cards provide essential visual cues that improve communication, promote independence and reduce anxiety for adults with dementia, memory and cognitive challenges who live at home or in care settings. This handy, compact set of double sided cards includes simple black and white illustrations that prompt individuals with dementia and cognitive challenges to understand and participate more independently in self-care and social activities. This deck of 76 picture cards is ring-bound so it opens easily to the desired color-coded section. Cards are laminated so they can be wiped clean. Blank cards are provided so you can add other specific center or activity cues. Available from SayitwithSymbols.com.

CB100 - Compound Bow Mount
Be Adaptive Equipment, Inc.
Price: $609
Disability: physical
Model CB100 is designed for individuals with limited hand and arm movement and strength. This piece of equipment works on most all models of compound bows and can be used with right hand or left hand bows. It allows the limited mobility user to pivot the bow left and right and up and down while the mount holds the entire weight of the bow. The CB100 mount requires the use of a Draw-Loc or similar product (which is not included) to hold the bow at full draw for the user.

Chest Belt
Bodypoint Inc.
Price: $71 - $101
Disability: physical
A comfortable, low-profile trunk support option for users with limited hand function or those who prefer chest support without a buckle. Flexible molded end-tab is easy to grab, and high-grade hook-and-loop material holds securely but is smooth to the touch. Optional slip-on pads sold separately.

DeCoste Writing Protocol

Texthelp
Price: $25 - $529
Disability: cognitive, learning

In this age of accountability and assessment, your district needs a process to evaluate writing issues for students with disabilities. Unfortunately, many districts don't have a systematic way to do this. The DeCoste Writing Protocol is a formative assessment tool that helps educators identify factors affecting an individual student's ability to produce writing. The Writing Protocol compares a child's individual performance across handwriting and keyboarding tasks. It examines spelling performance and writing skills so educators make more informed decisions about instructional strategies and the appropriate use of technology to meet classroom demands. The DeCoste Writing Protocol evolved from Dr DeCoste's original book, Assistive Technology Assessment: Developing a Written Productivity Profile, first published in 2004. Much has changed over the last decade-fueled by advances in technology and insights from new research.

Described and Captioned Media Program

Described and Captioned Media Program
Disability: hearing, learning, vision

DCMP's is a federally funded project administered through the National Association of the Deaf. Our mission is to promote equal access to communication and learning through described and captioned educational media. Mealtime Partners, Inc.
Price: $109.95
Disability: cognitive, hearing, learning, physical

The Drink-Partner Drinking System is an assistive drinking aid that provides hands free drinking for those in a manual

151

wheelchair, or a powered wheelchair that has a tubular frame or handles. For those who use a powered wheelchair with a slide-track mounting system see part 6050, the Drink-Partner for Slide-Track It will accommodate the mounting needs for that variety of wheelchairs. The Drink-Partner consists of a 25-ounce water bottle, and a cup holder. The bottle has integrated into its cap, a vibration resistant 24-inch long flex tube that holds the (36-inch long) drink tube that carries the liquid. The cup holder has a universal clamp that can be attached to tubes (or rails) with a diameter from 7/8 inch to 1-1/2 inches. The Drink-Partner is most commonly clamped to the handle of the wheelchair and the flexible tube holder allows the tip of the drinking tube to be positioned very close to the user's mouth. Other locations on a wheelchair frame are also functional. The Drink-Partner is sold with a drink tube already installed in the bottle and an extra drink tube is provided.

Dual Button Box
RJ Cooper and Associates
Price: $79
Disability: physical
Two 2-inch buttons in one box, that can be connected to any device that accepts such buttons. Devices include, but are not limited to: switch interfaces, switch-adapted digital camera, switch-adapted MP3 player/drive, switch-adapted toys, etc.

Dynamic Footrests
Seating Dynamics
Disability: physical
Dynamic Footrests provide up to four types of movement: a telescoping downward movement, knee extension, plantar/dorsi flexion, and footplate rotation. Forces are absorbed, protecting both the client and equipment from harm, and reducing overall tone and posturing. This movement can also increase sitting tolerance, decrease agitation, and increase alertness.

Dynamic Headrest
Seating Dynamics
Disability: physical
The Dynamic Head Support Hardware allows neck extension, diffusing and absorbing force to protect the client, protect the hardware, and reduce overall extensor tone. The Dynamic Head Support can be used on its own or in combination with the Dynamic Rocker Back and Dynamic Footrests. The hardware locks out, as needed.

Dynamic Rocker Back
Seating Dynamics
Disability: physical
The Dynamic Rocker Back provides movement to absorb forces and assist the client back to upright. This movement can protect the client from injury and equipment

from breakage, reduce extension, maintain postural alignment, reduce agitation, increase alertness, provide sensory input, facilitate functional activities, and increase trunk and head control.

e3+
NuEyes Technologies
Price: $2995
Disability: vision
NuEyes e3+, a cutting-edge wearable magnifier integrated with NuEyes visual AI software, designed to assist individuals with low vision. Here's a breakdown of its key features: Versatile Assistance: The e3+ is engineered to aid in various daily activities, from watching TV, reading books, cooking in the kitchen, and attending live sports events. Ergonomic Design: Its design focuses on comfort for extended periods, ensuring all-day wearability without causing discomfort. Modular and Adjustable: The device features a new modular design, allowing users to adjust the (IPD) pupil distance to suit their individual eye needs. Additionally, the portable battery attachment provides flexibility for a more personalized and portable experience. Distance Viewing: Equipped with a forward-facing Ultra HD Camera, the e3+ enables users to see distant objects clearly, facilitating the recognition of faces and enhancing overall visual clarity. TV Viewing: The HD camera provides excellent clarity for watching television, enhancing the viewing experience from the comfort of one's favorite spot. Reading Assistance: Unlike stationary magnifiers, e3+ offers the convenience of a wearable magnifier, allowing users to read comfortably.

Measures approximately 5 x 11 x 12 inches.

Guided Hands™
ImaginAble Solutions
Price: $629
Disability: cognitive, learning, physical, speech, vision
ImaginAble Solutions creates assistive technology to improve the quality of life for people with disabilities. The company's international award-winning product is Guided Hands™, an assistive device that enables individuals with limited hand mobility to write, paint, draw and access technology. The technology helps people of all ages with Cerebral Palsy, ALS, and spinal cord injuries among others affecting hand and arm function. Guided Hands™ is used during rehabilitation, recreation and in school. The device improves their quality of life by promoting independence, communication, self-expression, shoulder control, range of motion and the development of sensory motor skills. Guided Hands™ is purely mechanical and uses a sliding system to promote controlled and

guided hand movements as the individual holds a 3D printed hand piece tailored to their level of hand impairment (accommodating low and high tone). The hand piece is connected to a flexible arm that holds various writing utensils, including markers, paintbrushes, pens, and a stylus, thereby alleviating the challenges faced by individuals with spasticity and muscle weakness. Guided Hands™ promotes the individual to use the gross motor skills in their shoulder rather than using the poor fine motor skills in their hand.

Hand Warmer
mo-Vis
Price: $978
Disability: physical
Keeps the area around the electric wheelchair's input device warm, which improves the flexibility of cold hands and fingers.

Price: $229
Disability: learning, physical
Hands-On Math manipulatives helps students grasp abstract concepts. Kids learn when their hands are purposefully engaged, while math manipulatives help students grasp abstract concepts. Incorporates both big ideas to teach a wide range of standards-based math lessons to students with intellectual disability and/or autism, regardless of age.

Hands-On Math 2
Attainment Company, Inc.
Price: $299
Disability: learning, physical
A great continuation from Hands-On Math that includes 12 interchangeable number lines and sets of color-coded number pieces. There is an instructor's guide that has 120 lessons with consistent 22-page format for Big Idea concepts, vocabulary, practice pages, story problems, quizzes, and challenge exercises along with an image library and PDFs for printing additional materials are included on a USB flash drive.

Hands-On Math for Early Numeracy Skills
Attainment Company, Inc.
Price: $299
Disability: cognitive, learning, physical, speech
Hands-On Math (HOM) for Early Numeracy Skillsis primarily for preschool students with an intellectual disability or autism. It is based on two premises: (a) students with a disability learn well when their hands are purposefully engaged, and (b) math manipulatives help students understand abstract concepts. The HOM for Early Numeracy Skills Curriculum is an introduction to concepts included within school math standards. It is a skills-based program focused on early numeracy concepts.

Harkla Compression Sensory Swing
Harkla
Price: $99.98 - $119.99
Disability: physical
Hug-like calming effect Sensory input through compression and swinging $25worth of hardware included free for an easy setup Holds up to 200 lbs - safe for your child.A RELAXING PLACE FOR YOUR CHILD TO HANG. Looking for the perfect

place for your child with sensory needs to feel relaxed and have fun? Harkla'sindoor therapyswing is a great addition to the bedroom or sensory room. The swing is designed to meet sensory needs: Compression from the swing gives a hug-like effect to your child. Swinging, vestibular input means the swing helps your child explore space around them and get their bearings. Support your child by giving them a compression swing where they can self-regulate and return to calm.

Harkla Compression Sheet
Harkla
Price: $29.99 - $39.99
Disability: cognitive, learning, physical
MATERIALS: 80% Nylon | 20% Lycra MEASUREMENTS: Twin: 38 inches x 60 inches Full: 54 inches x 60 inches Queen: 60 inches x 60 inches WHAT'S INCLUDED: Harkla Compression Sheet, Handy Bag (to bring with you wherever you go!) DESIGN: Color: Navy, Open Top and Bottom, Soft, comfortable, and made with sensory needs in mind Machine washable Improve bedtime with compression Easy to set up and designed to last THE PERFECT ADDITION TO YOUR CHILD'S BEDROOM Bedtime IMPROVED! Have you struggled to help your child relax and get restful sleep? Start your journey to better sleep (and mood!) with a compression sheet. The compression sheet offers deep touch pressure (like a hug!) which helps regulate the nervous system. This releases melatonin helping relax your child. The melatonin turns into serotonin leading to deeper, more restful sleep.

Harkla Hug
Harkla
Price: $69.98
Disability: cognitive, learning, physical
The Harkla Hug combines a sensory input tool with the fun of a toy! Inflate the pea pod chair and watch your child explore. Now made with flock vinyl, this durable peapod sensory chair is a perfect addition to a sensory room. The inflatable peapod for autism applies much-needed pressure to sensitive areas of the body helping your child feel grounded and in control. This cozy canoe is perfect for autism. It stirs a sense of adventure while the compression provides a calming comfort where your child can feel secure. Use this sensory processing disorder tool to add comfort and joy in your child's life. The Harkla Hug provides Deep Touch Pressure (DTP) in the form of firm tactile sensory input or proprioceptive input to the whole body. When administered to the whole body, Deep Touch Pressure therapy (DTP) has a calming, organizing effect on children and adults alike.

Harkla Pod Sensory Swing
Harkla
Price: $59.99
Disability: physical

If you are looking for sensory or therapy swings to help your child relax and get their bearings in, then you've come to the right spot. Our autistic swings are made of high-quality but comfortable canvas that your child will want to spend hours in. Our Pod Sensory Swings are used by occupational therapists for autism spectrum disorder and sensory processing disorder. The Pod Sensory Swing provides a hug-like effect for little ones by providing Deep Touch Pressure (DTP). The Pod Sensory Swing also provides vestibular input. From infancy through adulthood, vestibular information contributes to the development of muscle tone, balance, eye movements, and more. Using slow, linear movements with Pod Sensory Swing (back and forth, side to side) gives much needed vestibular input and creates a feeling of calm in your child. However, many families purchase them simply because they are a fun place for your child to hang out in! Since our indoor therapy swing safely hangs from your ceiling, your child can receive the calming sense of wellbeing that swinging brings right in your home.

Harkla Sensory Body Sock
Harkla
Price: $29.99
Disability: cognitive, learning, speech
MATERIALS:80% Nylon | 20% Spandex Plastic Snaps: Located at head opening MEASUREMENTS: Small: 27 inches wide x 40 inches long Medium: 27 inches wide x 48 inches long Large: 28 inches wide x 56 inches long X-Large: 30 inches wide x 64 inches long WHAT'S INCLUDED: Harkla Body Sock Handy Bag (to bring with you wherever you go!) Product Activity Guide STRETCH. PLAY. DEVELOP. UNWIND. Do you wish your child had an easier time relaxing? The Harkla body sock is designed with autism and sensory issues in mind. Your child will love to play, stretch, or relax in our sensory sock! HELP YOUR CHILD DEVELOP SPATIAL AWARENESS Not only do sensory socks for kids help to soothe and calm, but a body sock can also encourage your child to explore their movements by pressing and stretching the material. Start developing right away with the activity guide created by occupational therapists provided in each therapy socks package. STAND UP TO THE TOUGHEST OF PLAYTIMES Designed with double-stitched seams and strong snaps instead of velcro.

Harkla Weighted Blanket for Kids and Adults
Harkla
Price: $79.98 - $129.99
Disability: physical

The perfect weighted blanket for a good night's sleep. Are you or your child struggling to relax or fall asleep? If so, then maybe it's time to invest in a weighted blanket. Our sensory weighted blankets are designed with your family in mind. Whether you are buying one for trouble sleeping or sensory processing disorder, you'll be happy you finally made the investment in a weighted blanket. And with a weighted blanket, you have a healthy way to relax and reduce anxiety by simply laying down with your blanket instead of taking pharmaceuticals and supplements. It's a completely natural sleep aid. Our goal at Harkla is to help you and your child live a happier, healthier life. We both know getting a good night's sleep is one of the highest priorities for reaching that goal. Join the thousands of people who have benefited from a Harkla weighted blanket, today!

Harkla Weighted Compression Vest
Harkla
Price: $59.99
Disability: learning, physical
MATERIALS:Soft Neoprene, Mesh, Velcro MEASUREMENTS: Small: 21-26 inches wide x 13-14 inches long Medium: 24-30 inches wide x 15-16 inches long Large: 28-34 inches wide x 18-19 inches long WHAT'S INCLUDED: Harkla Weighted Compression Vest 2lbs of weight: (4) 14lb weights and (2) 12lb weights Are you looking for a tool to help your child feel secure, calm, and focused? Harkla's weighted compression vest for kids with sensory issues, autism, and ADHD combines the sensory input tool with a wearable by applying pressure tosensitive areasof the body. Simply place the vest over your child's clothing, and watch your little one return to feeling grounded and in control. A perfect addition to the classroom, pack the weighted compression vest with your child's school supplies for on-the-go sensory integration therapy. It works well on travel, too! Improve both their and your car rides with a vest providing deep pressure sensory input. The weighted compression vest for kids is made out of soft neoprene and is built to last. Unlike other brands, Harkla has built-in ventilation using mesh to make sure your child stays cool while receiving the sensory integration therapy benefits.

Harkla Weighted Lap Animal
Harkla
Price: $44.99
Disability: cognitive, learning, physical
Your child's new sensory buddy The perfect toy for helping your child stay calm in class Make car rides and trips out more peaceful Weighs 5 lbs - for autism,sensoryprocessing disorder, and ADHD SUPPORTING YOUR CHILD'S NEEDS WITH A FUN STUFFED ANIMAL Does your child have a hard time staying calm at school or in the car? Are you always looking for toys that will effectively support your child's needs? The 5 lb weighted lap animal is the perfect companion for your sensory seeker! The science supporting weighted objects like our sensory weighted stuffed animal is called deep touch pressure (the same benefit as a weighted blanket.). Deep touch pressure helps to decrease nervous system activity which encourages a feeling of calm and relaxation. The weight takes advantage of the calming effects of deep pressure therapy. Theextremely soft fabric of thepoundpuppystuffed animalgives a great soft sensory surface for them to explore while relaxing. If your child could use extra help in sitting calmly, then they will benefit from a weighted stuffed animal. Add the weighted dog to your sensory toolbox and give your child the sense of calm they deserve (and the sense of calm you deserve as well!).

Harkla Weighted Lap Pad
Harkla
Price: $44.99
Disability: physical
Much like a weighted blanket, the weighted lap pad is a sensory tool that offers Deep Touch Pressure (DTP) to a person's legs as it rests on the lap when in a seated position. The weighted lap pad is often used in classrooms to provide some sensory input and help students stay seated. The weighted lap pad can also be used anywhere when adults or children need to stay sitting for an extended period. It's wonderful for activities like: Car rides Plane rides Mealtimes While doing homework Sitting in the grocery cartOur minky dot design makes this a perfect sensory blanket, as the soft minky fabric, combined with the dots and added weight makes a sensory input trifecta! This sensory combo gives your child an easy way to fulfill their fidget needs while calming them with the weight. Our goal at Harkla is to help your child live a happier, healthier life, and we both know getting them to relax and focus in class is one of the highest priorities.

Headpod Dynamic Head Support
PACIFIC REHAB
Price: $495
Disability: cognitive, physical
A dynamic head support device which can be applied to almost anything with a headrest while the child is upright,.. wheelchair, walker, stroller, stander,bike or activity chair. The child is able to move in full rotation, as well as chin tuck and extension, but not head drop. As the child acquires strength, the upper band is relaxed and they are able to move within their plane of strength. It is a completely different philosophy from head restraints and collars, which tends to atrophy musculature further due to lack of movement. The Headpod can only be used when the child is upright, to begin within their point of balance. A functional aide during power wheelchair use, Aug Comm and feeding. Any time that fatigue prevents function. It is not to be used for van or bus transport.

Healthcare Jot Reusable Writing Tablet
Say it with Symbols AAC
Price: $25.95
Disability: cognitive, hearing, physical, speech
This original Jot(TM) Healthcare Reusable Writing Tablet from Boogie Board offers patients and students with speech and/or hearing challenges a sustainable way to write messages, ask questions and share feelings. The 8.5" screen is large enough to jot down messages, daily reminders, greetings or questions using the stylus provided or a finger. Push a button on the tablet to erase the message. Saves having scraps of paper around your home! A useful device for individuals with aphasia, stroke, autism spectrum disorders, selective mutism, Parkinson's, ALS, throat cancer, brain injury and intubation. Can be used by caregivers, nurses and therapists at home, hospital bedside, at occupational and speech therapy sessions to improve patient communication. Learn more at https://www.sayitwithsymbols.com/healthcare-jot-writing-tablet/ or as part of our Emergency Communication Kit.

In The Know: Health, Sexuality, and Relationships
Attainment Company, Inc.
Price: $19
Disability: cognitive, learning
In the Know: Health, Sexuality, and Relationshipsis a health and wellness curriculum designed to address sensitive topics like human growth and development, sexuality, pregnancy, mental health, and personal safety in an approachable way that will encourage students to participate in their learning.

InnerVoice AI
iTherapy, LLC
Price: $99.98
Disability: cognitive, learning, speech
InnerVoice can work like a typical communication device: letting your thoughts and feelings be heard and understood by others. Unlike traditional speech-generating apps, though, InnerVoice combines artificial intelligence technology with facial expressions, emotions, tone-of-voice, written words, and videos -- providing a complete multi-sensory learning experience. Visual Language is an exciting new feature that uses Microsoft's Azure artificial intelligence technology to teach language and literacy skills in a unique way. The camera displays what you're looking at. Take a picture and watch InnerVoice's AI system label your picture with text and describe it with speech -- allowing users to see the relationships shared among the environment, speech, language, and text. Visual language makes creating and editing buttons easier than ever: just take a picture and InnerVoice's AI system labels the button and adds a description.

iPad Bluetooth Speaker
RJ Cooper and Associates
Price: $79
Disability: speech
Bluetooth, thin, cordless speaker for iPads/ tablets. Doubles volume. Super-Velcro's to rear of tablet/case. Very light.

Job Skills Stories
Attainment Company, Inc.
Price: $69 - $399
Disability: cognitive, learning, physical, speech
Job Skills Stories emphasizes the five categories in Pre-ETS: Job and Career Exploration, Work-Based Learning, Post-Secondary Training, Workplace Readiness, and Self-Advocacy. One-hundred stories are presented in five Job Skills Stories Student Books. Each book is aligned to a Pre-ETS category. The stories cover key transition skills like identifying one's strengths, decision-making, and self-determination. The Job Skills Reader condenses and simplifies content by using captioned photos to convey each story's big idea. Both the Student Books and Reader cover lesson objectives, so you can teach with the version that best suits each student.

JokeMaster
RJ Cooper and Associates
Price: $79
Disability: cognitive, physical, speech, vision
Switch-adapted joke telling device (120 of them), very silly, highly motivating. Includes jack to plug into PA system. Carry case/speaker option $30.00.

Junior Automatic Nail Clipper by ClipDifferent
ClipDifferent
Price: $149 - $149
Disability: cognitive, hearing, learning, physical, speech, vision
The ClipDifferent Jr. is a revolutionary, first-of-its-kind, automatic fingernail clipper that safely trims children's (ages 5+) fingernails with the simple touch of a button. It's perfect for children and parents who have a hard time trimming their children's fingernails and dislike the messy, time-consuming process. You'll have to see it to believe it - kids actually have fun using it! A great motivator for kids who bite their nails. Also great for kids with sensory challenges (has a nice, soothing sound). Includes stickers to decorate and personalize.

Junior Earmuffs
Therapy Shoppe® Incorporated
Price: $24.99
Disability: cognitive, hearing, physical
Durable Junior Earmuffs designed especially to fit children! Feature an adjustable, padded headband and comfy, liquid-foam ear cushions. These quality sensory earphones reduce environmental noise up to 22 decibels; allowing the wearer to still hear conversations and commands. The perfect sensory diet tool for kids who have auditory defensiveness, autism, sensory processing disorder, central auditory processing disorder, high levels of stress, anxiety diisorders, and/or noise sensitivity (kiddos who are hypersensitive to sound). Excellent for classrooms, travel, school lunchroom, parties and family gatherings, concerts, and more. Use with adult supervision. In black.

KINNEBAR Foot Swing
Mindful Mission, LLC
Price: $234.99
Disability: cognitive, learning, speech
The KINNEBAR Foot Swing is an active seating solution for children and adults who crave movement or sensory feedback. What makes it unique is its ability to provide multiple movement options through a foot swing and sensory band, all while keeping the upper body steady and ready to work.

KM-201 KUPOCARE Wheelchair Tablet Holder (S size Super Knuckle Arm)
KUPOCARE
Disability: physical
The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-202 KUPOCARE Wheelchair Phone Holder (S size Super Knuckle Arm)
KUPOCARE
Disability: physical
The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the phone's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame

tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a phone within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-203 KUPOCARE Wheelchair Camera Mount (S size Super Knuckle Arm)
KUPOCARE
Disability: physical

In this set, the S size (3") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of cameras and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a camera or camcorder within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-204 KUPOCARE Wheelchair AAC Switch Mount (S size Super Knuckle Arm)
KUPOCARE
Disability: physical

This S size (3") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted AAC switches and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no

universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-205 KUPOCARE Wheelchair Tablet Mount (M size Super Knuckle Arm)
KUPOCARE
Disability: physical

The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-206 KUPOCARE Wheelchair Phone Holder (M Size Super Knuckle Arm)
KUPOCARE
Disability: physical

The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Wheelchair Tube Clamp base via ball head through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the phone's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers

and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a phone within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-207 KUPOCARE Wheelchair Camera Mount (M Size Super Knuckle Arm)
KUPOCARE

In this set, the M size (6") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted cameras and lock the position by simply tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a camera or camcorder within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-208 Wheelchair AAC Switch Mount (M Size Super Knuckle Arm)
KUPOCARE
Disability: physical

This L size (9") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted AAC switches to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides

a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-209 KUPOCARE Wheelchair Tablet Holder (L size Super Knuckle Arm)
KUPOCARE
Disability: physical

The tablet holder is ideal for 7 to 11 inch tablets and connects to the Wheelchair Tube Clamp base via ball head through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted tablets to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a tablet within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-210 Wheelchair Phone Holder (L Size Dual Knuckle Arm)
KUPOCARE
Disability: physical

The phone holder is compatible with phones 2.3" to 3.34" (58 - 85 mm) wide and connects to the Wheelchair Tube Clamp base via ball head through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted phones to precise positions that suit their special needs. The extension arm has three

1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a phone within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-211 Wheelchair Camera Mount (L Size Dual Knuckle Arm)
KUPOCARE
Disability: physical
In this set, the L Size (9") Dual Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted cameras to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4"(32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a camera or camcorder within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-212 Wheelchair AAC Switch Mount (L Size Dual Knuckle Arm)
KUPOCARE
Disability: physical
This L size (9") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted AAC switches to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-213 Wheelchair Umbrella Holder (S size Super Knuckle Arm)
KUPOCARE
Disability: physical
The umbrella holder can hold any 13-35 mm diameter tubes and connects to the Wheelchair Tube Clamp base through the S size (3") Super Knuckle Arm. The umbrella holder can hold an umbrella, a flag, a walking stick, a rod shape action camera, a flashlight or any other long cylindrical objects. The ball head on either end of the arm allows users to freely adjust the angle of mounted items and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an umbrella, a flag, a walking stick, a rod shape action camera, a flashlight or any other long cylindrical objects anywhere within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-214 Wheelchair Umbrella Holder (M Size Super Knuckle Arm)
KUPOCARE
Disability: physical
The umbrella holder can hold any 13-35 mm diameter tubes and connects to the Wheelchair Tube Clamp base through the S size (6") Super Knuckle Arm. The umbrella holder can hold an umbrella, a flag, a walking stick, a rod shape action camera, a flashlight or any other long cylindrical objects. The ball head on either end of the arm allows users to freely adjust the angle of mounted items and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts an umbrella, a flag, a walking stick, a rod shape action camera, a flashlight or any other long cylindrical objects anywhere within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-215 KUPOCARE Wheelchair GoPro Holder (S size Super Knuckle Arm)
KUPOCARE
Disability: physical
The GoPro holder can directly attach to the underside of the action camera to replace the factory mounting bracket and connects to the Wheelchair Tube Clamp base through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the GoPro's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loos-

ening the central knob of the arm. This set mounts a GoPro action camera anywhere within a flexible 3" (7.6 cm) radius of a wheelchair tube.

KM-216 Wheelchair GoPro Mount (M Size Super Knuckle Arm)
KUPOCARE
Disability: physical
The GoPro holder can directly attach to the underside of the action camera to replace the factory mounting bracket and connects to the Super Convi Clamp base through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the GoPro's angle and can be locked into position by tightening the central knob. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm), 1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a GoPro action camera anywhere within a flexible 6" (15.2 cm) radius of a wheelchair tube.

KM-217 KUPOCARE Wheelchair GoPro Mount (L size Dual Knuckle Arm)
KUPOCARE
Disability: physical
The GoPro holder can directly attach to the underside of the action camera to replace the factory mounting bracket and connects to the Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted phones to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The Wheelchair Tube Clamp is equipped with a ball head that directly mounts into the Super Knuckle Arm. The Clamp can be tightly mounted onto wheelchair frame tubes and provides a very stable base. Given that there is no universal diameter for wheelchair tubes, three plastic spacers and a rubber strip are included allowing the clamp to fit 3/4" (19 mm), 7/8" (22.2 mm), 1" (25.4 mm),

1-1/8" (28.6 mm), 1-1/4" (32 mm) tubes. It is recommended to leave the tube clamp installed on the wheelchair so that it does not need to be remounted. The Super Knuckle Arm is easily released from the Wheelchair Tube Clamp by loosening the central knob of the arm. This set mounts a GoPro action camera anywhere within a flexible 9" (22.8 cm) radius of a wheelchair tube.

KM-701 KUPOCARE Table Tablet Mount (S size Super Knuckle Arm)
KUPOCARE
Disability: physical
The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the S size (3") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a tablet anywhere within a flexible 3" (7.6 cm) radius.

KM-702 KUPOCARE Table Phone Mount (S size Super Knuckle Arm)
KUPOCARE
Disability: physical
The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted tablets to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a tablet within a flexible 9" (22.8 cm) radius.

KM-703 KUPOCARE Table Camera Mount (S size Super Knuckle Arm)
KUPOCARE
Disability: physical
In this set, the S size (3") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted items and lock the position by simply tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a camera or camcorder anywhere within a flexible 3" (7.6 cm) radius.

KM-704 KUPOCARE Table AAC Switch Mount (S size Super Knuckle Arm)
KUPOCARE
Disability: physical
This S size (3") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The ball heads on either end of the arm allows users to freely adjust the angle of mounted AAC switches and can be locked into position by tightening the central knob. The clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 3" (7.6 cm) radius.

KM-705 KUPOCARE Table Tablet Mount (M size Super Knuckle Arm)
KUPOCARE
Disability: physical, speech
The tablet holder is compatible with 7 to 11 inch tablets and connects to the Super Convi Clamp base through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the tablet's angle and can be locked into position by tightening the central

knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a tablet anywhere within a flexible 6" (15.2 cm) radius.

KM-706 KUPOCARE Table Phone Mount (M size Super Knuckle Arm)
KUPOCARE
Disability: physical
The phone holder is compatible with 2.3-3.3" (58 - 85 mm) wide phones and connects to the Super Convi Clamp base through the M size (6") Super Knuckle Arm. The ball head on either end of the arm allows users to freely adjust the phone's angle and can be locked into position by tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a phone anywhere within a flexible 6" (15.2 cm) radius.

KM-707 KUPOCARE Table Camera Mount (M size Super Knuckle Arm)
KUPOCARE
Disability: physical
In this set, the M size (6") Super Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. The two 1" aluminum ball head joints of the Super Knuckle Arm allows users to freely adjust the angle of mounted items and lock the position by simply tightening the central knob. The Super Knuckle Arm is equipped with a hex stud that can be inserted into the built-in female socket of the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts a camera or camcorder

anywhere within a flexible 6" (15.2 cm) radius.

KM-707 KUPOCARE Table Phone Mount (L size Dual Knuckle Arm)
KUPOCARE
Disability: physical
The phone holder is compatible with phones 2.3" to 3.34" (58 - 85 mm) wide and connects to the Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted phones to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a phone within a flexible 9" (22.8 cm) radius.

KM-708 KUPOCARE Table AAC Switch Mount (M size Super Knuckle Arm)
KUPOCARE
Disability: physical
This M size (6") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The ball heads on either end of the arm allows users to freely adjust the angle of mounted AAC switches and can be locked into position by tightening the central knob. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly Clamp is easily secured and removed efficiently. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 6" (15.2 cm) radius.

KM-709 KUPOCARE Table Tablet Mount (L size Dual Knuckle Arm)
KUPOCARE
Disability: physical, speech
The tablet holder is compatible with 7 to 11 inch tablets and connects to the

Super Convi Clamp base through the L Size (9") Dual Knuckle Arm. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted tablets to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a tablet within a flexible 9" (22.8 cm) radius.

KM-711 KUPOCARE Table Camera Mount (L size Dual Knuckle Arm)
KUPOCARE
Disability: physical
In this set, the L Size (9") Dual Knuckle Arm has a ball head with 1/4"-20 male thread on one end that is compatible with most cameras and camcorders. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted cameras to precise positions that suit their special needs. The extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts a camera or camcorder within a flexible 9" (22.8 cm) radius.

KM-712 KUPOCARE Table AAC Switch Mount (L size Dual Knuckle Arm)
KUPOCARE
Disability: physical
This L size (9") Super Knuckle Arm has a ball head with 1/4"-20 female thread on one end that matches the universal mounting system of AbleNet switches. This arm is constructed by linking two S size arms with a 3" extension. The four ball heads of the arm allow users to adjust the mounted AAC switches to precise positions that suit their special needs. The

extension arm has three 1/4"-20 and two 3/8"-16 female thread holes that allow for mounting devices using an additional Super Knuckle Arm. The other end of the arm has a ball head with a hex stud that connects to the Super Convi Clamp. The Clamp can be securely mounted onto most rails or tubes with external diameters from 0.2 to 2 inches (5-51 mm). The included plastic saddle can be attached to the Super Convi Clamp to securely hold onto tables between 0.2-1.2" (5-30 mm) thick. The user-friendly clamp is easily secured and removed efficiently. This set mounts an AbleNet switch or any equipment with 1/4"-20 male thread within a flexible 9" (22.8 cm) radius.

Laminated Health Care Communication Boards | AAC
Say it with Symbols AAC
Price: $9.99
Disability: cognitive, hearing, learning, physical, speech
These no tech, laminated patient communication boards are essential to enhancing patient-provider communication. This 2-sided communication board includes 68 pictures that help patients communicate their health and hospital care-related needs when they are not able to speak. Studies show that being able to communicate with care providers significantly improves the patient's experience and recovery in the ICU. Each double-sided sheet offers clear color pictures to indicate pain, wants, needs, ailments, comforts, questions, staff, emotions and more. Pain scale, alphabet and number tables are included. Non-verbal patients simply point to pictures to communicate their needs to care staff and family. Ideal for patients, nurses, therapists, emergency care and health care workers, caregivers and parents who care for adults and children who are not able to express their needs verbally. Symbols are 1" square. Sheet size: 8.5" x 11", printed on heavy card stock to be used by individual patients. Laminated for increased durability, wipe to reuse by the same patient. Set includes 1 dry erase marker. Sold in sets of two laminated boards with a marker on SayitwithSymbols.com. Contact us for quantity pricing.

Language and Learning: A Framework for Inclusive Design
Attainment Company, Inc.
Price: $69 - $199
Disability: learning, physical
A seven-stage framework for cognitive and language development. Covers learner considerations, relevant issues, communication strategies, tips for evaluating software, and a skills checklist before moving on to the next stage. Includes references to research and published articles and

provides recommendations for software, apps, and manipulatives materials.

Language Links to Literacy
Attainment Company, Inc.
Price: $695
Disability: learning, physical
LanguageLinks® to Literacy incorporates systematic instruction and ongoing assessments to teach 40 lessons covering concepts like Is/Are, He/She/They, Mine/Yours, How/Why/Where, and Above/Below. Is a blended curriculum, seamlessly integrating print components with software. This blended approach creates an engaging learning process and encompasses both independent and instructor-led instruction.

Large Patient Care Communication Board for Older Adults
Say it with Symbols AAC
Price: $9.99
Disability: cognitive, physical, speech
This ideal large size 11"x17" patient communication board is accessible for older adults who need larger images and larger print. Limitless Stylus
Westminster Technologies
Price: $83 - $85
Disability: physical
The Limitless Stylus is optimized for users with limited hand mobility and is a simple design that wraps around the users wrist with two Velcro straps. The stylus is angled perfectly to fit the contours of the user's hand and has been designed for long term use and optimal comfort. It can be used on any touchscreen device to gain more control and precision with every click! The Limitless Stylus is extremely light weight and durable which makes it easy to use on a daily basis without even thinking about it. After using the Limitless Stylus you will be unable to live without it. Stylus, two straps and extra tips included.

LingoPen
Scanning Pens
Price: $285
Disability: learning
Lingo Pen is used primarily for EL/ESL as it reads in English (as well as other languages) you can translate a word you don't know in the other language while hearing it pronounced in English. It's perfect for anyone working or studying in a language that is not their own to improve language acquisition. Multiple languages and dictionaries. The voice recorder is great for recording instructions or fluency progress checks. The scan to cursor feature allows users to scan from worksheets/textbooks directly to Google/Word Docs for simplified note taking or study guides. Saves money and time by reducing students' reliance on a human reader. Exam lock for exam integrity. Having it listed as "text to speech" in the students IEP or 504 plan is helpful. Does NOT require WiFi. Stand alone does not require another device.

LM100 - Limited Mobility
Be Adaptive Equipment, Inc.
Price: $609
Disability: physical
Be Adaptive Equipment Model LM100 is a limited mobility unit designed for use by people with limited use or paraplegics that cannot hold a gun up. Designed for individuals with limited hand and arm movement and strength. The unique design of the equipment makes the weapon seem almost weightless to the person using it and allows them to have a full range of motion, up, down, and side to side. The simplicity of the LM100 allows it to hold all pistols, crossbows, rifles, and shotguns. The LM100 does not include a power trigger mechanism. If you lack hand movement and need assistance with this, you can purchase our TM100 (power trigger mechanism) and use it with this piece of equipment.

Attainment Company, Inc.
Price: $89
Disability: learning
Math for Life links life skill themes to six fundamental concepts, adding relevance and appeal to math instruction for middle and high school students.

Math Skills Builder
Attainment Company, Inc.
Price: $595
Disability: learning, physical
A researched math problem-solving curriculum with real-world scenarios. A multiyear curriculum for students with mild-to-severe disabilities and ideal for elementary and secondary students. Includes eight units with easy-to-follow lesson plans and uses several forms of media to ensure student success. Reviews early numeracy skills and advances to addition and subtraction.

Maxess Switch Mounts
Inclusive TLC
Price: $32 - $42
Disability: physical

Enables switches to be securely positioned/repositioned in the most efficient way. These double-sided switch mounts give two alternative mounting surfaces (55 and 85 degrees). Used with the Maxess Switch Tray, the mounts offer a variety of positioning options. Velcro fixing pack included for one switch.

Maxess Switch Tray
Inclusive TLC
Price: $59 - $79
Disability: physical
Cushioned for comfort, the Maxess Switch Tray holds switches or switch mounts firmly in place. Ideal for use with a student or in assessment situations, where a range of secure switch positions need to be tried.

Mealtime Partner Dining Device
Mealtime Partners, Inc.
Price: $7995 - $8570
Disability: cognitive, learning, physical
The Mealtime Partner is a product that permits individuals, who otherwise cannot feed themselves, to do so independently, after they are provided with food. Persons with impairments due to spinal cord injury, CP, MS, Parkinson's disease, arthritis, ALS, stroke, MD, birth-defects, etc. can gain/regain mealtime independence using the Partner.

Medication Dispenser
SimplyHome
Price: $219.95 - $299.95
Disability: cognitive, hearing, learning
With SimplyHome's secure medication dispenser, individuals can access prescribed medicine without the concern of overmedicating or missing doses. The automated dispenser alerts the individual to take the allotted medication up to four times daily, with optional caregiver alerts if doses are delayed or missed. These alerts can be sent to the individual whose medication it is, to support independence, as well as to a family member or caregiver if necessary.

Meywalk Miniwalk Gait Trainer
PACIFIC REHAB
Price: $4600
Disability: cognitive, physical
The child or young adult is supported at the trunk and centered at the hips. While they step forward, the spring assembly allows the movement to mimic normal gait, while compressing and assisting with the lift to the next step. Four sizes in growth from infant to 78" in height. A wide variety of optional accessories are available to stabilize the upper trunk and maintain in line stepping.

Mickey Roadster RC Car
Adaptive Tech Solutions
Price: $59.48

Disability: physical
You'll have so much fun with this Mickey Roadster Remote Controlled car. This toy has been adapted for use withone or two 3.5mm switches, sold separately (use 2 switches for full control of the toy), or it can be activated with the built in buttons on the remote. Press and hold one switch to go straight. Press and hold your other switch to turn. A fun way to work on visual tracking! Runs best on smooth surfaces. Both this toy and the Minnie version run on the same frequency, so they cannot be used in the same proximity.

Micro Extremity Control (MEC)
Adaptive Switch Laboratories, Inc.
Price: $3050 - $4430
Disability: physical
The ASL 130 is a fully proportional joystick with the unique feature of having a built in mode change function. The MEC only requires 18 grams of force to deflect the joystick. It is designed for those who have very limited hand or chin movement.

Micro Joystick
mo-Vis
Price: $2912.73
Disability: physical
A very small proportional joystick for electric wheelchairs, designed for people with poormuscular power and/or limited movements.

Midline Joystick Mounting Kits
Bodypoint Inc.
Price: $587 - $615
Disability: physical
The Tri-Lock Midline Mounting System lets you position the joystick or other electronic devices right where you want them - at midline or another preferred location- for a more natural and functional position that can lead to improved posture, core strength and endurance. Position joysticks over lap trays, above or below armrests, or over the shoulder on chin-controlled systems. Easily change settings from independent to caregiver-assisted use, and choose between three different arm styles. Components available separately or as a kit.

Mini Dome
Enabling Devices
Price: $134.95
Disability: cognitive, hearing, learning, physical, speech, vision
Children love Mini Dome's eye-catching colors and vibrations. Simply press anywhere on the dome or its plate and the bright confetti spin, music plays and the dome vibrates. Provides hours of visual, auditory and tactile stimulation. No switch is required.

Mini-Arm
RJ Cooper and Associates
Price: $129
Disability: physical
An 11-inch telescoping, infinitely positionable arm for holding switches. The Super-Clamp attaches to just about anything. Especially useful for our 1-inch Compact Switch used by cheek.

Minnie Roadster RC Car
Adaptive Tech Solutions
Price: $59.48
Disability: physical
You'll have so much fun with this Minnie Roadster Remote Controlled car. This toy has been adapted for use withone or two 3.5mm switches, sold separately (use 2 switches for full control of the toy), or it can be activated with the built in buttons on the remote. Press and hold one switch to go straight. Press and hold your other switch to turn. A fun way to work on visual tracking! Runs best on smooth surfaces. Both this toy and the Mickey version run on the same frequency, so they cannot be used in the same proximity.

Model HQ100 - High Quad Shooting Mount
Be Adaptive Equipment, Inc.
Price: $2048
Disability: physical
Model HQ100 is a high quad unit designed for use by people with no arm or hand use, to operate guns and crossbows. This model can be operated completely with your mouth and chin, standard or choose an option. Go to products at www.beadaptive.com for more information.

Modular Hose
ModularHose.com
Price: $5 - $450
Disability: physical
A mounting system that is fortified with AWESOMENESS! Adjustable and flexible - great for holding switches, small devices, tablets, and more.

Molecule Joystick
Adaptive Switch Laboratories, Inc.
Price: $1000 - $5000
Disability: physical
The ASL 128 Molecule Joystick is the lightest touch joystick offered by ASL. It takes only 8 grams of force to displace from neutral and requires only 3 millimeters of movement to reach full throw. Designed for someone with weakness, this joystick can keep a patient driving proportionately instead of having to move to a digital system.

Monoflex™Bodypoint Inc.
Price: $97 - $121
Disability: physical
Dynamic positioning for wheelchair users who need strong but unobtrusive abdomi-

nal/chest support and free arm movement. High-strength elastic padding provides just the right amount of stretch for comfort while maintaining trunk control. Double-tapered shape and swivel buckles distribute pressure evenly. One-piece with underarm release or two-piece with center release. Can be mounted on almost any wheelchair, including those with low or flexible back systems where a four-point harness is difficult to mount. Machine wash and dry.

Mount'n Mover Mounting System
BlueSky Designs
Price: $525 - $1900
Disability: cognitive, learning, physical, speech, vision
The Mount'n Mover movable mounting systems offer unique features specifically designed to promote independence and access. Mount phones, trays, speech devices, laptops, and cameras on wheelchairs, tables and more. The mount has lock positions that can be set to allow repeatable position of the device, and is available in single arm with 10.5 inch maximum reach, and dual arm with 18 inch maximum reach.

Ms. Rachel Switch Adapted Doll
Adaptive Tech Solutions
Price: $64.98
Disability: physical
Ms. Rachel has been switch adapted to allow two standard 3.5mm switches (sold separately) to be plugged in so kids with disabilities can play. Press her hands, or your external switches, for over 20 songs and phrases! One external switch activates cognitive skill building activities and the other activates communication skill building activities. For ages 3 and up. Surface wash.

Multi Joystick
mo-Vis
Price: $2913
Disability: physical
The Multi Joystick is a joystick module which can be connected directly to the wheelchair electronics to control the wheelchair functions. It is a small proportional joystick, whichrequires significant less power and movement compared to a normal joystick. It can easily be controlled by any body part, including finger, chin, lip... thanks to its flexibility. It is recommended for people with tetraplegia, neuromuscular diseases (ALS, MS...) and limited muscular force. Fullyproportional, withreduced throw (8 mm) and force (ca. 50 gr) Built in a compact and discrete housing, with 2 3.5 mm jacks for switch input Two switches can be linked to the separate interface: (red) on/off power

wheelchair - (yellow) mode of the power wheelchair Fullyadjustableto individual possibilities and needs with well-thought-out electronics (mini USB connection) Compatible with multiple types of wheelchair electronics Has a LED light on the interface which will start to flash green in case of error or orange in case of active tilt.

Multi Swing 2G
mo-Vis
Price: $2756
Disability: physical
A versatile, motorized mounting arm to mount on an electrical wheelchair. With this arm, devices such as a chin joystick can be positioned to drive, and the arm can be moved upwards or sideways by pressing a button whenever needed. \\

Multi Switch
mo-Vis
Price: $893
Disability: physical
With just 1single input, the Multi Switch offers the possibility to operate up to 4 outputs.

Multifunctional Smart Keyboard Key-X
Key2enable Assistive Technology Inc.
Price: $999 - $2100
Disability: learning, physical
The device that redefines the inclusion of people with disabilities. Key-X allows people with any motor impairment to useany computer, smartphone or tablet with just eleven touch-sensitive keys, which can be activated even by the blink of an eye. By itself, Key-X is an innovative resource, which gives autonomy to people withany motor limitationto control any computer. However, offering every function ofkeyboard and mouse with total accessibility is just a detail. With just eleven touch-sensitive keys, which can be triggered even by the blink of an eye, Key-X does much further. In conjunction with the SimpliX software and its accessories, Key-X makes up an amazingplatform of school inclusionand rehabilitation, capable of developing the motor and cognitive skills of students and patients with physical and intellectual disabilities.

Mushroom Joystick
Adaptive Switch Laboratories, Inc.
Price: $2975
Disability: physical
The ASL 135 was designed to fit the contour of a hand, so no gripping or pincer grasp is needed. Deflection of the joystick uses minimal force and the flat plate made from a slick material surrounds the cap and provides a place for the hand and wrist to rest.

My Little Puppy

For people who desire to live independently, being able to obtain help quickly is key to success. With the press of a button, the Personal Emergency Response System (PERS) notifies our trained 24/7 Response Center that assistance is needed. Once notified, the 24/7 Response Center will contact the designated responders (such as caregivers or family members). Each client's responder list is customized so that the client receives the appropriate level of assistance, from a simple check-in with a family member to receiving support from emergency services.

With the PicSeePal combo, you receive a savings of over $40.

Pitching Machine
Adaptive Tech Solutions
Price: $72.430
Disability: physical
This pitching machine is the perfect way for people with limited hand use to play ball with a pet or a friend, or to play lawn or target games. When using a switch, the user will need to hold down their switch for about 11 seconds for the pitch to occur. Continuing to hold their switch after this first pitch will result in additional pitches about every 7 seconds until their switch is released or all the balls are used.A flashing red indicator light shows when the ball pitches, making it easy to prepare for the oncoming ball. Has three different adjustment angles. Includes 6 aero strike balls that are 2 3/4" in diameter.You should not use regulation baseballs or tee balls with this pitching machine - only use the ball type included. The ball shoot can hold up to 9 balls and additional balls can be purchased at most big box stores that sell toys. Ideally, batting friends should use a plastic baseball bat with this pitching machine.

PivotFit™ Shoulder Harness
Bodypoint Inc.
Price: $130 - $155
Disability: physical
Upper body support designed with an anatomically curved shape that provides maximum pressure distribution and more even tension for greater comfort. Low-placed sternum strap reduces risk of strangulation and improves adjustability. The Standard (non-stretch) style is great for spinal curvature or trunk rotation; the Dynamic (stretch) style allows more torso movement. New MD (multi-directional) Pull Straps allow set up on the spot as a front-pull or a rear-pull. Machine wash and dry.

Planning for Success: Accommodations, Learning Strategies, and Assistive Technology that Work for Me!
Marlene McIntosh
Price: $66
Disability: learning
This is a self-advocacy tool that can be used to get an idea of difficulties that

students with learning disabilities may have. Included are checklists that students can use to work with strengths and compensate for difficulties.

PLAYBALL: The Smart Therapy Ball
Westminster Technologies
Price: $1276 - $5628
Disability: cognitive, learning, physical
PLAYBALL is an intelligent rehab and fitness therapy ball used with the PLAYWORK interactive recovery program. This breakthrough smart exercise ball functions as a performance measuring tool and video game controllerfor a complete rehabilitation process that incorporates games and real-time visual feedback. Explore engaging games designed by therapists to enhance complete body and cognitive workouts. PLAYBALL's smart integrated sensors measure and track your performance (e.g., force, motion, and more) to monitor progress and manage recovery programs. The only interactive physical therapy ball that measures both movement and pressure (force applied on the therapy ball).

"PLAYBALL" Smart Therapy Ball
PLAYWORK

ReaderPen
Scanning Pens
Price: $285
Disability: cognitive, learning, speech, vision
ReaderPen is a portable literacy tool helping students develop their independent reading skills while promoting inclusion in their classroom or distance learning. Simply scan words or sentences and hear them read discreetly via earbuds. The goal is to nurture the reading skills of a student until they no longer feel like they need the support. Built in dictionaries expand vocabulary. The voice recorder is great for recording instructions or fluency progress checks. The scan to cursor feature allows users to scan from worksheets/textbooks directly to Google/Word Docs for simplified note taking or study guides. Saves money and time by reducing students' reliance on a human reader. Reader Pen is mainly used as a 1:1 reading accommodation for a student, you can also Exam Lock it out for day to day tests which removes all features except reading. Having it listed as "text to speech" in the students IEP is helpful for exam approval. Does NOT require WiFi. Stand alone does not require another device.

ReaderPen Secure
Scanning Pens
Price: $285
Disability: cognitive, learning, speech, vision
ReaderPen Secure is a portable text to speech device to support people with reading difficulties (like Dyslexia) in the workplace empowering them to be more productive with less stigma. Simply scan print base words or sentences and hear them read discreetly via earbuds. This multi-sensory reading aid will enable you to be a more inclusive employer, without the worry of any data breach. There is NO storage capabilities on this device. Built in dictionaries will show definitions to scanned words instantly. The scan to cursor feature allows users to scan from paperwork directly to computer to digitize materials quickly and easily. Does NOT require WiFi. Stand alone does not require another device.

Real World History
Attainment Company, Inc.
Price: $99
Disability: cognitive, learning
Read World Historyis a tool for learning more about world history while infusing phonics-based instruction. Learning this subject matter is challenging for students who are struggling readers. The stories and extended activities encourage collaboration, divergent thinking, and responsible decision-making while encouraging artistic expression.

SmartKnitKIDS Seamless Sensory Garments
Knit-Rite, Inc.
Price: $7.95 - $19.99
Disability: physical
Bumps, seams, ouchies, burglers, or nuggies. By whatever name they're called, seams and lumps and bumps can be a nuisance. SmartKnitKIDS Seamless Products have taken the woes out of clothes and help to keep the morning routine in check. In 2003, SmartKnitKIDS, a brand of Knit-Rite, Inc., started receiving requests from parents for a completely seamless sock. It seemed that all the seamless socks available had a flat or handlinked seam across the toes. To a sensitive child, this was still a bother; there was still a toe seam. With over 90 years of medical textile expertise, Knit-Rite used parent feedback to create a patented 100% seamless sock with added comfort features for sensitive feet. Children are not the only ones with sensitive feet and toes. Often sensitive kiddos turn into sensitive adults. SmartKnitKIDS expanded their line to include seamless socks for adults, appropriately named SmartKnit Big KIDS Socks. In 2010, SmartKnitKIDS launched patent pending Seamless Undies. The first of its kind, their seamless undies are seam free, elastic free, and gently hug little bottoms! The evolution continued with the launch of the Seamless Compresso-T and Bralette in 2011. The Compresso-T is a form-fitting undershirt that protects skin from annoying clothing seams and provides a soothing 'hug'.

Social Skills at School: Elementary
Attainment Company, Inc.
Price: $199
Disability: cognitive, learning, physical, speech
The updatedSocial Skills at School: Elementary is a perfect social skills program for elementary students with autism, intellectual, or behavioral disabilities. TD Talk
Tobii Dynavox
Disability: physical, speech
TD Talk is a speech generating app for literate adults with communication disabilities such as ALS/MND, multiple sclerosis, muscular dystrophy and cerebral palsy. It empowers people to talk using just their eyes or fingers. Express yourself naturally with a large selection of voices, and the ability to switch smoothly between a wide choice of languages and different conversation topics. Engage more actively in conversations with fast word and phrase prediction, and easy in-sentence editing. Communicate face-to-face by making your screen transparent with See Through Mode and your typed text visible in the rear-facing Partner Window. It's also possible to use a custom, synthetic clone of your natural voice, with a choice from among several leading voice banking providers. TD Talk is pre-loaded on TD I-Series TD Pilot, and TD Navio, or available cost-free to try on your own iPad with touch access only (no eye tracking) and a smaller selection of languages and voices. This can help people with progressive degenerative conditions who want to try the app before the need for a dedicated speech generating device.

The 90-minute TWIST® is an easy-to-use and fun time management tool. To use, turn the outer ring until you reach your desired time, up to 90 minutes, then push the play button. A digital display shows at a glance how much time remains. At home, use the TWIST® for everything from helping kids' morning and bedtime routines, timing homework and study sessions, or baking the perfect batch of cookies. In the classroom, it's great for timing tests and turn-taking exercises, timing group activities, and helping kids with special needs transition between activities. In the office, use it to keep track of presentations, team-building activities, and more.

Time Timer WASH + Soap Dispenser
Time Timer LLC
Price: $72.95
Disability: cognitive, hearing, learning, physical, vision

The Time Timer WASH + Soap Dispenser is a touchless, automatic soap dispenser integrated with a visual timer to teach proper handwashing techniques. The timer's visual aspect helps people of all ages and abilities understand the duration and process of washing hands. You can initiate the timer without touching it by simply holding your hand under the spout. Soap (not included) automatically dispenses, and the timer begins the countdown. As the disk disappears, time elapses, encouraging scrubbing through the duration with playful icons. The countdown timing allows users to wet their hands first, wash for the approved 20 seconds, then rinse. Music and sounds can reinforce the steps, or the soap dispenser can be used silently in sound-sensitive environments. USB Rechargeable.

Time Timer® MAX
Time Timer LLC
Price: $119.95
Disability: cognitive, hearing, learning, vision

The Time Timer MAX visual countdown timer is 17 inches so that you can display it in larger spaces such as gymnasiums, cafeterias, auditoriums, and large meeting rooms. It's also eight timers in one - with customizable durations and changeable timer faces, the MAX can countdown as low as 5 minutes or as high as 24 hours. The Time Timer MAX includes 3 double-sided timer faces - 5/15 minutes, 30/60 minutes, and 120 minutes/Dry Erase Board timer face - allowing maximum flexibility and customization. Create time blocks on any face using the three colored time-dividing set markers by snapping them into the grooves between the red disk and numbers. Use your Time Timer MAX on a flat surface or hang it on a wall, whiteboard, or map rail. One bracket mount is included.

Time Timer® MOD + Dry Erase Board
Time Timer LLC
Price: $51.95
Disability: cognitive, hearing, learning, vision

Our magnetic Dry Erase board enhances your teaching, studying, or parenting routine. It is available as a complete set with the Time Timer® MOD 60-minute visual timer or as an accessory to your existingTime Timer® MOD - Education Edition. (Please note that the Time Timer® MOD must include asilicone caseto fit correctly in the Dry Erase Board.) This multifunctional board serves as a message center. It is perfect for managing time-sensitive messages, creating visual schedules, jotting down to-do lists, and keeping everyone on track. Whether in the classroom, at home, or work, this combination helps you stay organized and productive.

Time Timer® MOD 10 Minute Education Edition
Time Timer LLC
Price: $36.95
Disability: cognitive, hearing, learning, speech
Seeing 10 minutes on a traditional 60-minute Time Timer® disk can be hard for some people to accept. It can seem small and insignificant. Time Timer® understands that not everyone needs long durations of time. Therefore, we are excited to offer the fan-favorite Time Timer MOD-Education Edition in this 10-minute duration. Educators and therapy professionals often have tasks lasting less than an hour, sometimes as short as 10 minutes or less. And they often need to bring their timers with them to various environments. These short-duration timers are intended to do just that. They are small enough to pack up, perfect for working one-on-one with students or for personal time management, and protected with a soft silicone case.

Time Timer® MOD 120 Minute Education Edition
Time Timer LLC
Price: $36.95
Disability: cognitive, hearing, learning, physical, speech
By popular demand, the Time Timer MOD-Education Edition now comes in a longer 120 minute duration. In the calming color of purple, this desktop companion gives you two hours of visual time representation, helping you reduce procrastination and focus for long periods. Use this silent and discreet 2-hour timer, with an optional audible alert, to keep on track. Keeping it on a desktop or table while studying or during long writing sessions lets you see how much time is left with a glance, ensuring your flow is not interrupted. We all have different time management needs, so use the MOD 120-Minute - Education Edition timer to enhance your time awareness for all your longer-duration tasks and activities: think chores, playtime, test-taking, naptime, studying, meetings, or simply slow roasting your favorite dinner.

Time Timer® MOD 30 Minute Education Edition
Time Timer LLC
Price: $36.95
Disability: cognitive, hearing, learning, physical, speech
Looking for a non-digital way to display a 30-minute duration? This unique 30 minute visual countdown timer displays the time with a brightly colored orange disk in analog display - making it ideal for improving focus and self-regulation during shorter duration activities. Educators and therapy professionals often have tasks lasting less than an hour. And they often need to bring their timers with them to various environments. The Time Timer MOD - Educaiton Edition 30-minute timer is intended to do just that. Small enough to pack up, perfect for working one-on-one with students or for personal time management, and protected with a soft silicone case.

Time Timer® Original 12"
Time Timer LLC
Price: $41.95
Disability: cognitive, hearing, learning, vision
The Time Timer Original 12" is an ideal 60-minute countdown timer for groups or large room settings. The timer is visible across any room! The visual timer has a clear lens that protects the patented red disk. With its magnetic back and foldable feet, you can display your timer how it works best in your space. It's perfect for a workspace or learning center at home, in the classroom, or in the office. The Time Timer 12" includes a 3x3 inch Dry Erase Activity card that someone can slot into the top of the timer for visual schedules and time-to-task management.

Time Timer® Original 8"
Time Timer LLC
Price: $36.95
Disability: cognitive, hearing, learning, vision
The Time Timer Original 8" is an ideal 60-minute countdown timer for individuals or small groups. The visual timer has a clear lens that protects the patented red disk. Its magnetic back and foldable feet allow you to display the timer in many ways. It's perfect for a workspace at home, in the classroom, or the office. The Time Timer 8" includes one 3x3 inch Dry Erase Activity card that a teacher, student, or parent can slot into the top of the timer for visual schedules and time-to-task management. The Time Timer Original 8" can fit up to two Dry Erase Activity Cards across the top, making it perfect for First/Then Activities and Visual Schedules.Additional Dry Erase Cardscan be purchased separately.

Time Timer® Original 8" - Learning Center Classroom Set (Set of 3)
Time Timer LLC
Price: $104.95
Disability: cognitive, hearing, learning, vision
With the Learning Center Classroom Set, the Time Timer Original 8" is available in a multi-pack set of three. Each set comes with three timers of different colors to aid in color curriculum during the early years and for time management in color-coded classrooms. It is available in a Primary Color Collection of Red, Yellow, and Blue or a Secondary Color Collection of Orange, Green, and Purple. To further enhance the use of these collections in learning centers, each set includes 3 Dry Erase Activity Cards to label the stations and a bi-fold guide filled with Classroom Time Management ideas.

Time Timer® Original 8" Visual Scheduler
Time Timer LLC
Price: $59.95
Disability: cognitive, hearing, learning, physical, speech
The Time Timer® Visual Scheduler has everything you need to effortlessly create time-based visual schedules that all ages and abilities can understand. Visual schedules paired with ourresearch-provencountdown analog timer can be understood intuitively by people of all ages and abilities, including those with autism, ADHD, or other neurodivergent needs. The visual timer provides a calm transition for every activity, and the visual activity cards let students, kids, and adults know what to expect. Use the included cards, or you can add your own!

Time Timer® WASH
Time Timer LLC
Price: $28.95
Disability: cognitive, hearing, learning, vision
The Time Timer WASH 30-second handwashing timer makes handwashing fun and easy, helping preschoolers and young learners playfully develop healthy habits. It's the perfect companion for kiddos on their potty training adventures! It encourages children to follow the recommended 20-second handwashing duration in three simple steps: Get Soap (5 seconds), Scrub (20 seconds), and Rinse (5 seconds). With a bright blue LCD screen, playful icons, and optional enjoyable music, the WASH increases engagement, improves and teaches an essential life skill, and encourages independence and hygiene. Consistent use can create a safe and clean home, school, or daycare environment.

Time Timer® Watch
Time Timer LLC
Price: $84.95
Disability: cognitive, hearing, learning
The Time Timer® Watch provides an easy way to increase focus throughout the day and improve independence and self-regulation in a discreet and portable manner. Mix and Match with your favorite watch band colors to reflect your style. Or carry the watch face in the FOB accessory for further portability. Whether you depend on Time Timer® products to support yourself or others with ADHD, Autism, or other cognitive variances, or you want the look of a fun, sporty watch that increases productivity, the Time Timer Watch is your solution. The sporty design makes this wristwatch an excellent accessory for students, adults, athletes, teachers, and professionals of any age or ability.

TM100 - Trigger Mechanism
Be Adaptive Equipment, Inc.
Price: $334
Be Adaptive Equipment Model TM100 is a vacuum actuated trigger system that attaches to your trigger guard. Is simple to install on any weapon with a standard trigger guard. The unique design of the mechanism allows it to fire most weapons if placed anywhere inside of the trigger guard. The simplicity of the set up allows the trigger mechanism to be moved from one weapon to another easily and quickly. The TM100 fires the weapon by a very slight suction on the blue tube in the picture which is attached to the control box. The control box is attached to the stock of the weapon with a Velcro cinch strap. The mechanism operates on 12 volt DC power and comes with a pigtail that can be attached to one of the batteries in your power chair or attached to an auxiliary battery.

Toe Straps
Bodypoint Inc.
Price: $26
Disability: physical
Add our durable, hook-and-loop toe straps to slotted wheelchair footplates to limit aggressive foot rotation and dorsiflexion. Length is fully adjustable and can be trimmed shorter as needed. For enhanced foot positioning needs, consider our Ankle Huggers Support Straps instead. Use them alone or in conjunction with toe straps.

Tower Volcano Lamp
Adaptive Tech Solutions
Price: $49.98
Disability: physical
Our switch adapted Volcano Lamp has been adapted to accept a standard switch (sold separately) or it can be used without a switch. When you press your switch, the colored 'lava' balls flow from the volcano

up into the water and back down again. Measures approximately 8" x 3" x 3" and requires 3 AA batteries (not included).

Traceable Name Stamps for Students | AT
Say it with Symbols AAC
Price: $20.95
Disability: cognitive, learning, physical
SignitwithStamps.com is your source for personalized, traceable name stamps for special education students. Our exclusive Learn To Write personalized traceable name stamps help kids learn to print or improve their handwriting! Children with special needs as well as preschoolers will have fun using our easy-grip name stamps to trace the letters and "write" their own name. Simply trace the dotted letters in their name stamp and voila, they can "sign" their school work, artwork, books and cards! Available in both print or cursive traceable fonts. Order online student names stamps online at www. SignitwithStamps.com, or use a school purchase order.

Trexo Home Robotic Gait Trainer
Trexo Robotics Inc.
Price: $34900 - $39900
Disability: physical
The Trexo Robotic Gait Trainer helps with ambulation for children with mobility challenges. We offer a Home model and a Clinic Model.

Trimline Shoulder Harness
Bodypoint Inc.
Price: $107 - $119
Disability: physical
Focused shoulder retraction for wheelchair users with two separate, adjustable padded straps that comfortably accommodate asymmetry. Each shoulder can be independently controlled while keeping the chest clear for maximum freedom of movement. New MD (multi-directional) Pull Straps allow it to be set up on the spot as a front-pull or a rear-pull harness. Machine wash and dry.

Twirling Bead Chain
Enabling Devices
Price: $289.95
Disability: cognitive, hearing, learning, physical, speech, vision
Feel the cool beads! Activate the built-in red gumball switch and the carousel begins to turn causing the colorful cool beads to gently touch your hand as they spin by. In addition, upbeat music plays and red and blue lights sparkle. Great sensory experience that also teaches cause and effect.

Twister
mo-Vis
Price: $138
Disability: physical
Small and elegant switches with very light sensitivity for electric wheelchairs. Available in 5 colors and in different models.

Twister Pro
mo-Vis

Disability: physical
A qualitative and durable switch for electric wheelchairs, which requires medium force. Can also function as a safety button for R-net or LiNX operated systems.

Two Handed Oven Mitt
The Color-Coded Chef
Price: $20
Disability: learning, physical
The two-handed oven mitt is a must-have kitchen accessory that combines functionality, safety, and convenience. With its unique design, this oven mitt offers a full hand and arm protection, shielding you from burns and providing peace of mind during cooking and baking. Experience the ultimate safety and comfort as you confidently handle hot dishes from the oven while enjoying the added benefit of safeguarding both sides of your hands and arms. Elevate your cooking experience and prioritize safety with our two-handed oven mitt, an essential tool for all culinary enthusiasts.

U-shaped Joystick Handle
Bodypoint Inc.
Price: $79
Disability: physical
Our U-Shaped Joystick Handle provides maximum wheelchair driving control for those with limited hand function. The curved "goalpost" design with waterfall edge is form-fitting and ergonomic, comfortably cradling hands while keeping them from sliding off. Available in two widths to fit different hand sizes, and can be custom-molded with hot water.

Ultra Light Switch
Adaptive Switch Laboratories, Inc.
Price: $50 - $180
Disability: cognitive, hearing, learning, physical, speech, vision
The ASL 314 Ultra Light Switch has a very light activation force and low profile. It is ideal for people with limited movement or weakness. It can attach with a reusable sticky base or 2 screw mounting holes for secure placement. It comes with 5 colorful exchangeable switch tops - we recommend red.

Uncle Goose Braille Blocks
Uncle Goose
Price: $45
Disability: vision

An educational toy for those who use Braille to communicate. Touch each embossed Braille letter on two sides of every block in this 28 piece set. Use your fingertips to trace the clean, European-style font that accompanies every Braille letter. Feel the attention to detail in every hand crafted cube.

Uncle Goose Braille Math Blocks
Uncle Goose
Price: $26
Disability: vision
We debossed each colorful block in this 16 piece set with either a number or a math symbol. Then, we used the Nemeth Braille Code for Mathematics to emboss the Braille translation next to each number or symbol.

Uncle Goose Classic ABC Blocks
Uncle Goose

Wiggle Seat Discs
Therapy Shoppe® Incorporated
Price: $24.99 - $26.99
Disability: learning
Air cushion wiggle seats for kids, teens, and students! You'll love our new 10-3/4" early elementary size sensory seat disc, or a 13" size that's especially nice for older elementary age and/or middle school students. These high quality focus seats are excellent for providing vestibular movement input in the classroom or in community settings. Each disc features 100's of delightfully tactile "spikes" on one side, and shorter raised sensory bumpies on the other side; they're like having 2 different cushions in one great combo seat! Kids love the subtle wiggly movement these allow - perfect for enhancing focus and attention for kids who need movement input without having to get out of their seats! Each comes with its own hand air pump.

Wiggle Wobble Chair Bouncers
Therapy Shoppe® Incorporated
Price: $21.99
Disability: learning, physical
Wiggle Wobble Chair Bouncers are a set of 4 rubbery "feet" that transform standard school chairs into bouncy "rocking" chairs! Students can subtley rock, roll, and bounce in all directions with these innovative focus tools. Perfect for kids who tip back on

the legs of their chair, movement seekers, wigglers, and others who need vestibular input to concentrate better and be able to stay in their seat. These foot fidget helpers provide just the right touch of sensory input to help kids-adults of all ages reach their optimal level of arousal. Durable and effective. Designed for use on tile, wood, or carpeted floors. No tools are required. Kids love rocking and bouncing back, forth, up, down, and all around as the continuous movement helps regulate their brains and relax their bodies!
